NEW EDITION! Developing Agility and Quickness, Second Edition

Most competitive sports require rapid whole-body movements in which athletes need to accelerate, decelerate, and change direction in response to game situations. In this course, 19 of the NSCA’s leading experts provide evidence-based assessment tools, exercises, drills, and training regimens to improve agility and quickness. More than 130 drills—with instructions, photos, and diagrams—offer a smorgasbord of proven activities to enhance athletes’ ability to rapidly accelerate or decelerate in three dimensions.

Plyometric Anatomy
Elite players, coaches, and trainers rely on plyometrics to develop power, agility, speed, strength, body control, balance, and overall athletic performance. In this course you will learn 94 plyometric exercises with 78 variations that increase in difficulty for continued development over time. Each exercise is fully illustrated with detailed anatomical art to showcase the muscles that are activated during the drill, so you can clearly see how the exercise contributes to improved performance for your clients and athletes.

COMING SOON! Sports Massage for Injury Care With CE Exam
Experienced sports therapist Bob McAtee explains the types of soft tissue injury most common in sport and explains why manual therapy is so valuable in treating musculoskeletal injuries. The book emphasizes the importance of accurate assessment and evaluation, and focuses on 20 of the most common neuromuscular injuries seen in athletes. For each injury, there are assessment recommendations, treatment options and injury-specific protocols, and self-care options for when the athlete is not on the treatment table.

Robert E. McAtee, LMT, BCMTB, CSCS

NEW! Monitoring and Performance in Athletes
The use of performance monitoring systems in athletic training has grown due to technological advances. Practitioners who work with athletes in a range of sports use these systems to observe athlete data, including exercise intensity, athletic fitness, and body responses. Monitoring and Performance in Athletes CE Course is a compilation of evidence-based guidelines and best practices for athlete monitoring that will help certified professionals keep up with these advances and ultimately incorporate training adjustments to optimize performance.

$139.00 US ($178.95 CAD, £104.99, €125.08)

NEW! Deep Tissue Massage Video With CE Exam
Many clients enjoy the sensation of deep tissue massage, yet some therapists shy away from incorporating this form of massage into their treatments. In Deep Tissue Massage Video With CE Exam, Jane Johnson, a chartered physiotherapist and sport massage therapist specializing in musculoskeletal occupational health, demonstrates how to use compressive and stretching techniques in ways that are safe and effective for you and your clients.

NEW EDITION! Soft Tissue Release, Second Edition
In Soft Tissue Release CE Course, Jane Johnson shows you techniques for the three types of soft tissue release (STR): passive (clients do not help), active-assisted (clients and therapists work together), and active (clients do it on their own). The book and video provide guidance on performing each type, along with key holds, moves, and stances for various muscles, helping you incorporate the proper techniques into a treatment program for your clients.
