

## Hats

### How to wear a hat: a Felt Hat

1. Hold the brim on the front and one side
2. Place your forehead against the front edge of the hat to pull it downward from the front
3. While keeping the same edge position on your forehead, pivot back of the hat down
4. Pull it down until the crown of the hat ALMOST touches the crown of your head. Ensure that it is NOT actually touching the crown of your head to prevent deformation.
5. Style by tilting the hat with half of the front brim pulled down, while half of the back brim lifted up

For the best way to frame your face with Horizontally Extending Wide-Brim Visors, the edge of the hat should stay on the level of approx. 2 times higher than the distance between "eye" and eyebrow levels. t-size:11.0pt;font-family:"Arial","sans-serif";mso-ansi-language: EN-GB>edge of the hat to pull it downward from the front

For the best way to frame your face with Back Tilt Hats such as Bowler Hats, Pork Pie Hats, the edge of the hat should stay on the level of approx. 3 times higher than the distance between "eye" and eyebrow levels. Opt;font-family:"Arial","sans-serif";mso-ansi-language: EN-GB'>edge of the hat to pull it downward from the front

The best way to wear wavy brim hats such as Capelines is to bring the edge of the hat to the widest point of your forehead to lift up your entire face and the brim with both sides being naturally dropped.
