Studio Mumbai

Bijoy Jain nació en Bombay, India, en 1965, y obtuvo el título de Arquitecto por la Universidad de St. Louis, EEUU, en 1990. Trabajó en Los Angeles y Londres entre 1989 y 1995, y regresó a la India en 1995 para fundar su estudio profesional.

Studio Mumbai es una infraestructura humana de arquitectos y artesanos especializados que se ocupan directamente del diseño y la construcción de sus obras. Este grupo, que ha ido formándose a través del tiempo, comparte un entorno surgido a partir de un proceso iterativo, en el que las ideas son exploradas mediante la producción de modelos a gran escala, maquetas, estudios de materiales, croquis y planos. Los proyectos se desarrollan mediante una meticulosa consideración del lugar y una forma de hacer inspirada en las artes tradicionales, las técnicas de construcción local y los materiales, así como de una ingenuidad producto de manejar recursos limitados.

La esencia de su obra reside en la relación entre la tierra y la arquitectura. Su objetivo es mostrar cuáles son las auténticas posibilidades de crear edificios surgidos a partir de un proceso de diálogo colectivo y de un intercambio mutuo de conocimiento

Bijoy Jain was born in Mumbai, India in 1965 and received his M. Arch from Washington University in St Louis, USA in 1990. He worked in Los Angeles and London between 1989 and 1995 and returned to India in 1995 to found his practice.

Studio Mumbai is a human infrastructure of skilled craftsmen and architects who design and build the work directly. Gathered through time, this group shares an environment created from an iterative process, where ideas are explored through the production of large-scale mock-ups, models, material studies, sketches and drawings. Projects are developed through careful consideration of place and a practice that draws from traditional skills, local building techniques, materials, and an ingenuity arising from limited resources.

The essence of the work lies in the relationship between land and architecture. The endeavour is to show the genuine possibility in creating buildings that emerge through a process of collective dialogue and a face-to-face sharing of knowledge.
