

PORT-A-FIELD

Youth Football Fields

- ✓ Age-appropriate sizes
- ✓ Durable
- ✓ Portable
- ✓ Easy to use

The Concept is simple: Shorter yards, smaller fields.

Each yard line is printed on the field line.

We scale the “yards” down to maintain proper dimensions.

The result: Kids can learn true 4-down, 1st and 10 football on a field appropriate for their size.

It’s more fun for everyone.

Size	Length/width	“Yard” Length	Endzone / 1 st down	Ages	Price
60%	72 yds x 96 ft	21.6 inches	6 real yds	5-6	\$365
70%	84 yds x 112 ft	25.2 inches	7 real yds	7-9	\$375
80%	96 yds x 128 ft	28.8 inches	8 real yds	10-12	\$385
90%	108 yds x 144 ft	32.4 inches	9 real yds	13-14	\$395
Full	120 yds x 160 ft	36 inches	10 yd	15+	\$425

Since 2003, PORT-A-FIELD portable athletic field lining systems, made from Superstrength HTP (High Tenacity Polymers), have been a safe, cost-effective, and green alternative to paint. Sport-specific printed elements denote yard and goal lines. The engineered elasticity of HTP creates a non-rigid perimeter that gives on contact, creating a give & go design that alleviates tripping concerns. Port-a-Field products are used worldwide, including by the NFL Flag Football program.
