

# **PORT-A-FIELD**

## **Deluxe Bungee Anchor Instructions**

### **1. Anchor leading end to the ground**

For Indoor/Turf Fields use a 10-25 lbs weight as needed and run the bungee cord through the center of the weight and attach hook to Port-A-Field's black corner ring.

For Beach Fields dig a hole using the black square end of the Deluxe Bungee Anchor. As seen in pictures below. Then bury the leading end with sand and attach the hook to Port-A-Field's black corner ring.

### **2. Walk to your next anchor point, unreeling the field along the way**

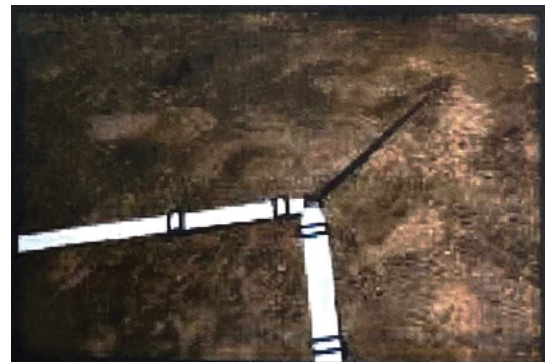

Pull the Material tight and repeat the anchoring process until entire Port-A-Field perimeter is established.

### **3. Finishing**

Force the two ends to meet clipping Port-A-Fields clip end to starting black ring.
