CORDLESS TRIMMER

Specifications, Maintaining Blades, Proper Use, Safety Precautions, and Warranty

Specifications: (FOR INDOOR USE ONLY)

Electric trimmer specs: Charges from a 110VAC outlet. Lithium ion battery provides 80 min of run time for a 2 hour charge.

Red light= battery charging.

Green light= battery is fully charged.

Maintaining Blades:

Always keep blades well lubricated for optimum performance. With the blades removed from unplugged trimmer, apply a few drops of salad oil (light weight multi-purpose household oil) in between blades. It may be necessary to do this several times during long periods of continuous use. Blades should be lubricated after cleaning and before each use. Very important, always clean blades thoroughly after each use.

Proper Use: (For Indoor Use Only)

The angle that the blade is held at will determine the amount of material removed when trimming. When trimming leaves, be sure to trim with the blade perpendicular to the leaf to allow for the teeth to catch properly. This trimmer is solely intended for trimming small house -plants and shrubs no more than 1/16" in diameter. Also, be sure to keep trimmer above plants and flowers when trimming with the blade angled downward to the plant. Trimming from below can cause buildup of offcut material to get clogged in motor. Leather gloves and safety goggles should be worn when using to prevent injury.

Safety Precautions:

Read all instructions before operating. Save these instructions.

Make sure trimmer is off when not in use.

Disconnect battery before cleaning, installing, or removing blades.
