

- 1. Push the 2 ends of the gasket together to form one solid loop.
- 2. Line it up with the centre of the back of the Trim Tote (the side that will be inserted into the M108).

- 3. Push the gasket onto the back rim of the Trim Tote.
- 4. Moving from back to front, continue pushing the gasket onto the Trim Tote, working on both sides simultaneously until it is securely in place around the entire rim.

- 5. Slide the Trim Tote into the opening shown at right.
- 6. Lock in place by lifting both blue levers on either side. Push arms inwards and up until they click into place.
