

BestChem Disinfectant

Active Ingredient: Isopropyl Alcohol 70%

- Isopropyl alcohol is an effective, fast-acting chemical for getting rid of microorganisms such as bacteria, viruses and household pests.
- Spraying a light mist of isopropyl alcohol over high-touch equipment and hard surfaces most at risk of collecting germs (e.g. table tops, door knobs, grab bars and handles, chairs, curtains, etc.) while allowing to air-dry can eliminate germs and odour swiftly and successfully.
- BestChem Disinfectant (Isopropyl Alcohol) is available in *250ml, 500ml, 1 litre, 4 litres and 20 litres.*

This product's active ingredients are listed in the **National Environment Agency's Interim List of Household Products and Active Ingredients for Disinfection of COVID-19 (Coronavirus Disease 2019) Virus.**
