

OVEN SENSITIVE TAB

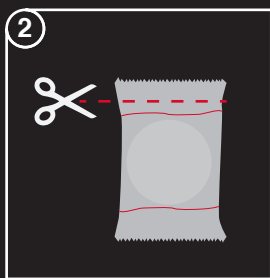

DETERGENT & SANITIZING POWDER
TABLET FOR SELF-CLEANING OVENS

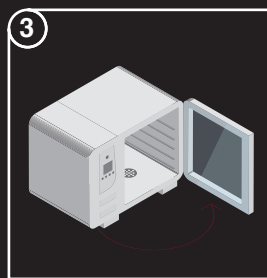

DIRECTIONS FOR USE

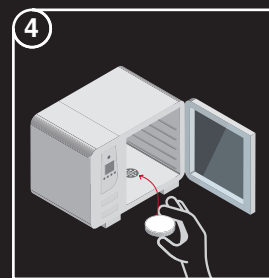

1 Use protective gloves and goggles. Avoid skin contact with the powder.

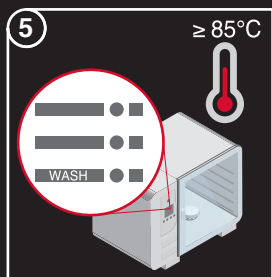

2 Cut the package on the top.

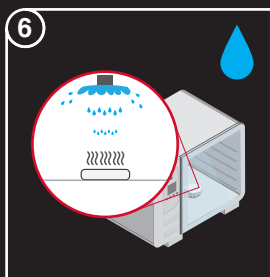

3 Open the oven window.

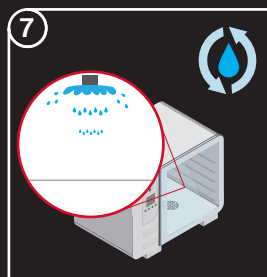

4 Place the tablet on the grill in the middle of the oven chamber.

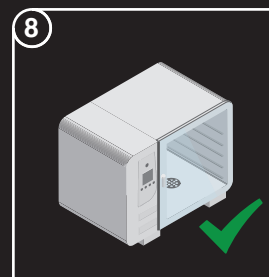

5 Close the oven and start the cycle of solubilization. Minimum solubilization temperature: 85°C.

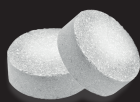

6 Wait for the end of washing phase. Do not stop the cycle of solubilization and do not open the oven window.

7 At the end of the washing phase always start the rinsing cycles.

8 Ready for another cooking cycle.

OVEN SENSITIVE TAB Features

It is a caustic formulation studied for the cleaning phase inside the professional self-cleaning ovens. It has a strong decarbonising action on cooking residues and adds a sanitizing one by destroying odors and bacterias.

The tablet must be dissolved in an appropriate way to ensure its effectiveness. For this reason it is recommended a water temperature of at least 85°C to the dissolution.
