NORMAL CARE INSTRUCTIONS

For Light Stains: A mild soap and water solution is all that is required for most spills. (Detergents are effective cleaners, but their harshness may affect the water-repellent characteristics.) 1. Apply a cleaning solution of 1 part soap to 10 parts water to the fabric. 2. Rinse with clear water to remove any soapy residue. 3. Blot with a clean, dry cloth and allow time to air dry. 4. Repeat as necessary until the stain is gone.

For Stubborn Stains (Bleach Cleanable) Some stubborn stains may require light agitation with an upholstery cleaning brush or toothbrush. Never use stiff bristles or wire brushes, as they may damage the fabric. To prevent overall soil build-up, frequent vacuuming is recommended. 1. Apply a cleaning solution of 1 part bleach to 4 parts water to the fabric. 2. Rinse with clear water to remove any bleach solution residue. 3. Blot with a clean, dry cloth and allow time to air dry. 4. Repeat as necessary until the stain is gone.

LebaTex recommends the end use of a product as specified on the spec sheet only. It is the customer's responsibility to determine code compliance if a product is to be used in a way other than its recommended end use. If a product is ultimately selected and installed in an application that it was not intended for, all liability falls to the customer.
