

The Buck Academic Package

M530 Infrared Spectrophotometer

(list price \$10,500)

- Rapid scan and high energy optics for most applications
- Scan-n-Search software for instrument control & data acquisition
- Handles 85% of IR Applications
- Solid, liquid, and gas samples accessories
- Fun chemistry experiments

310 Educational Gas Chromatograph

(list price \$5,650)

- TCD or CCD Detector
- On-Column Injector
- 1 Channel PeakSimple Data System & software
- 1-Meter Haysep-D column
- Ultra compact 310 Chassis
- Fun chemistry experiments

BLC-10 Isocratic HPLC

(list price \$9,895)

- Isocratic system with fixed wavelength UV/VIS detector
- PeakSimple data station allows complete data handling and automatic control
- All polymer components for durability
- Ultra compact BLC-10 Chassis
- Fun chemistry experiments

Get A FREE Jenway 7305 With Purchase Of The Buck Academic Package

The Jenway 7305 non-scanning single-beam Visible Spectrophotometer is fitted with 10x10mm cuvette holder, supplied with pack 100 disposable cuvettes, instruction manual, universal power supply, PC software on CD ROM and interface cable.

Features:

- Icon driven software
- 5nm Bandwidth
- Small footprint
- Autologging capabilities
- Press to read xenon lamp
- Extensive range of accessories available
- 3 year warranty
