

# Ring Size Guide

## HOW TO MEASURE

1. From your collection, select a ring that fits your finger best.
2. Place your ring inside the circles below. When your ring matches the inside edge of the circle, you've found the right one.

## HELPFUL TIPS

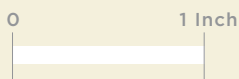

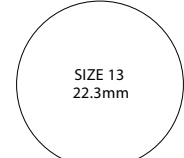

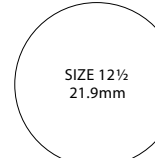

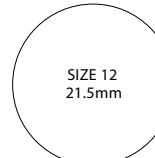

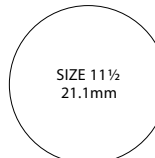

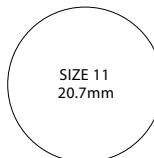

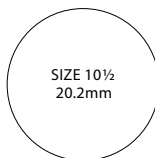

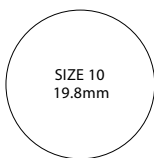

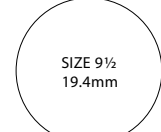

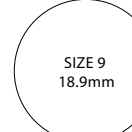

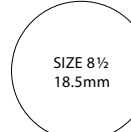

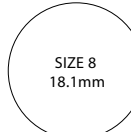

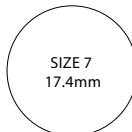

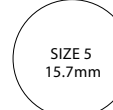

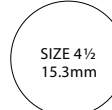

Please note this serves as a guide. For a perfect fit, we recommend stopping by Mann's Jewelers to be measured by one of our trained associates.

Wider rings tend to fit more tightly. For anything 5mm or wider, go a 1/2 size up.

Most ladies rings in our inventory are size 6 or 6.5. In many cases, we will need to special order your ring or wedding band.

Most mens rings in our inventory are a size 10 or 10.5. In many cases, we will need to special order your ring or wedding band.

Some of our rings can be resized by our goldsmiths. Please contact us to inquire about a specific ring that interests you.

PLACE  
PENNY  
HERE

To ensure you've printed correctly, use a ruler to measure the bar. Confirm that the bar is 1" long.

Alternately, you can place a penny in the circle. It should fit precisely, covering the edges completely but with no overlap.
