

HOW TO: CROSSBOX INSTALL

RC264_V2_10/25/2019

STEP 1: Place Crossbox lid on black base. Insert steel hinge pin into one end while making sure to insert through both lid and base channels. Tap into place with a hammer.

STEP 2: Start pressing cord gasket into lid channel and work your way around the lid as you go. Start at the middle of the hinge side. Make sure to leave a 1" gap in the cord gasket—otherwise you may get a vacuum lock. You may need to tear a small piece off the cord gasket to leave a gap.

HELPFUL TIP : To close latches, push on the raised ridges in the center of the latch with your thumb.
