

To ensure a positive custom tuning experience for your vehicle at Fastlane, please check each item below. If you have any questions about our checklist, please contact us at (713) 600-8600 or email us at sales@fastlaneturbo.com

- All tunes will be for 93 octane fuel, unless specified by the customer
- Vehicles should arrive with at least ½ tank of 93 octane fuel, no mixtures with other fuels
- Vehicles fluid levels need to be checked and topped off if required
- Verify that all charge piping and clamps are secured
- Verify the correct spark plugs are installed and plug gaps are set correctly, if guidance is needed on plug gaps, please call the shop
- Create a complete list of all vehicle performance parts and brands installed on the vehicle.
- Solder all aftermarket electrical connections
- Ensure there is proper tension on all belts, specifically supercharger belts
- Verify the correct tire pressure
- Verify that there are no leaks for exhaust or fluids
