

The 2012 BMW S1000RR gets an 8.5-horsepower boost from the Two Brothers Racing Full Race Exhaust System

Orange County, California – 4/13/12 – Two Brothers Racing brings Absolute Top Level™ performance to the 2012 BMW S1000RR with the 4-2-1 Full Exhaust System. Boasting gains of 8.5 horsepower in the mid-range and a peak increase of 2 horsepower, this high quality full system increases power throughout the rev-range of the most powerful superbike on the market. In addition to an elevated 186.5-peak hp at the rear wheel, torque numbers jumped 4.5 ft-lb in the meat of the powerband.

Available with a carbon fiber, titanium, or aluminum canister mated to mandrel bent #304 stainless steel head pipes, this full system drops 13 pounds from the S1000RR's chassis to improve handling and acceleration. The M-2 exhaust canister features Two Brothers Racing's trademarked V.A.L.E. modular connection system that uses an X-Lite™ retaining ring to ensure a perfect fit. The Teflon coated, blunted and cast magnesium cap can be fitted with various inserts such as the P1 PowerTip™ to fine tune the sound and performance of this full system.

2012 BMW S1000RR FULL RACE EXHAUST HIGHLIGHTS:

- **+8.5 More horsepower**
- **+2 Peak horsepower**
- **+4.5 More ft-lb of torque**
- **-13 Pounds of weight**
