# Yamaha **R6**

Part# 005-3850405-S1

## Parts List

| Qty. | Description                               | Part Number    |
|------|---|----------------|
| 1    | Yamaha R6 Muffler Canister S1R            | 8" S1R Vertica |
| 1    | Yamaha R6 Muffer Clamp S1R                | S1R Vertical   |
| 1    | Yamaha R6 Slip-On Tube                    | 005-38504S     |
| 1    | Muffler Clamp                             | Varies         |
| 1    | Yamaha R6 Billet Muffler Mounting Bracket | 005-212B       |
| 1    | 8x16mm Flange Bolt                        | 005-FB816      |
| 1    | Barrel Clamp                              | 005-27-61MSH   |
| 2    | Flange Nut 8mm                            | 005-FN8        |
| 1    | Spring Puller                             | 005-SP         |
| 1    | Permatex Anti-Seize                       | 031-P09175     |

# IMPORTANT - PLEASE READ CAREFULLY

We recommend that this performance part be installed by a qualified motorcycle technician. If you have any doubts as to your ability to install this performance part, please consult with your local motorcycle dealer. Read all instructions first before starting installation. Make sure the motorcycle and exhaust system are completely cool before starting the installation. Also, make sure the bike is secure on a centerstand or ideally a service lift during installation. Be sure to save all stock components for possible use later.

### Installation Instructions

- 1. Make sure the bike is completely cool before starting the installation. Make sure the bike is secure on a rear stand or ideally a service lift.
- 2. Remove lower right fairing from the motorcycle.
- 3. Remove muffler inlet cover from front of muffler to expose exhaust valve cables (noise reduction valve).

4. Remove cables from muffler and cable clamp from right side rear set assembly.

5. Remove muffler joint clamp and muffler mounting bolt.

6. Remove muffler assembly. Also be sure to remove the OEM retaining ring and gasket from the stock slip tube.

7. Remove bracket holding the brake reservoir to the frame.

9. Remove servo by pulling out from the right side of the motorcycle and disconnect the cables. Disregard cables.

 Remount the servo without the cables. This step is necessary in order to keep an error code from being displayed on the LCD screen. Make sure servo is plugged into wiring harness.

11. Reinstall the brake reservoir.

12. Attach S1R muffler to slip tube using supplied hook springs.

# Slide the barrel clamp over the TBR slip-tube and install

Installation Instructions

 Attach supplied muffler bracket using OEM muffler mount bolt. Use supplied nut.

| Yamaha R6 Muffler Canister S1R            | 8" S1R Vertical   |
|---|---|
| Yamaha R6 Muffer Clamp S1R                | S1R Vertical  |
| Yamaha R6 Slip-On Tube                    | 005-38504S  |
| Muffler Clamp                             | Varies  |
| Yamaha R6 Billet Muffler Mounting Bracket | 005-212B  |
| 8x16mm Flange Bolt                        | 005-FB816   |
| Barrel Clamp                              | 005-27-61MSH  |
| Flange Nut 8mm                            | 005-FN8   |
| Spring Puller                             | 005-SP  |
| Permatex Anti-Seize                       | 031-P09175  |

15. Attach muffler to muffler bracket and then securely tighten muffler using supplied bolt and nut.

16. Tighten barrell clamp.

 Double check your work and make sure all hardware is securely tightened.

### Care & Cleaning / Warranty

### Care & Cleaning

Keep system free of dirt and moisture. Store in a cool, dry place. For cleaning use a mild spray cleaner. Always apply cleaner or polish with a soft, clean cloth.

Stainless Header System: Polished stainless steel pipes will turn a light golden hue after a few heat cycles, this is a normal characteristic of high quality stainless steel.

Carbon Fiber Mufflers: Always make sure the fiberglass packing inside is in good condition and not burned out, as exhaust heat inside an empty canister will deteriorate the Carbon Fiber sleeve. TBR sells repack kits (TBR part # 005-10038) that include new rivets and repack material as well as a drill bit (#30), making it easy to do yourself. Also, NEVER dyno test your bike with carbon fiber mufflers installed - the intense heat and lack of cooling air can quickly cause the CF material to burn. Two Brothers Racing does not provide a warranty for burned carbon fiber.

Aluminum Mufflers: Use an aluminum or mag wheel polish such as Mother's to restore the bright finish to factory spec.

### Warranty Information

Two Brothers Racing products are intended for closed course competition purposes only, and therefore are sold "as is" without warranty. Two Brothers Racing specifically disclaims any warranties of merchantability or fitness for a particular purpose and disclaims all responsibility for consequential and incidental damages or any other losses arising from the use of these products or parts.
