

The following are recommendations that I would use for this project. Feel free to try different mixes of colors, wood and grains. I used 1 1/4" thick wood to for the first row of snow make this a free standing piece. The rest of the parts were cut from 3/4" thick wood.

On this project I used aspen for the "W" areas, and western red cedar for all the different shades. Western red cedar has a wide variation of colors.

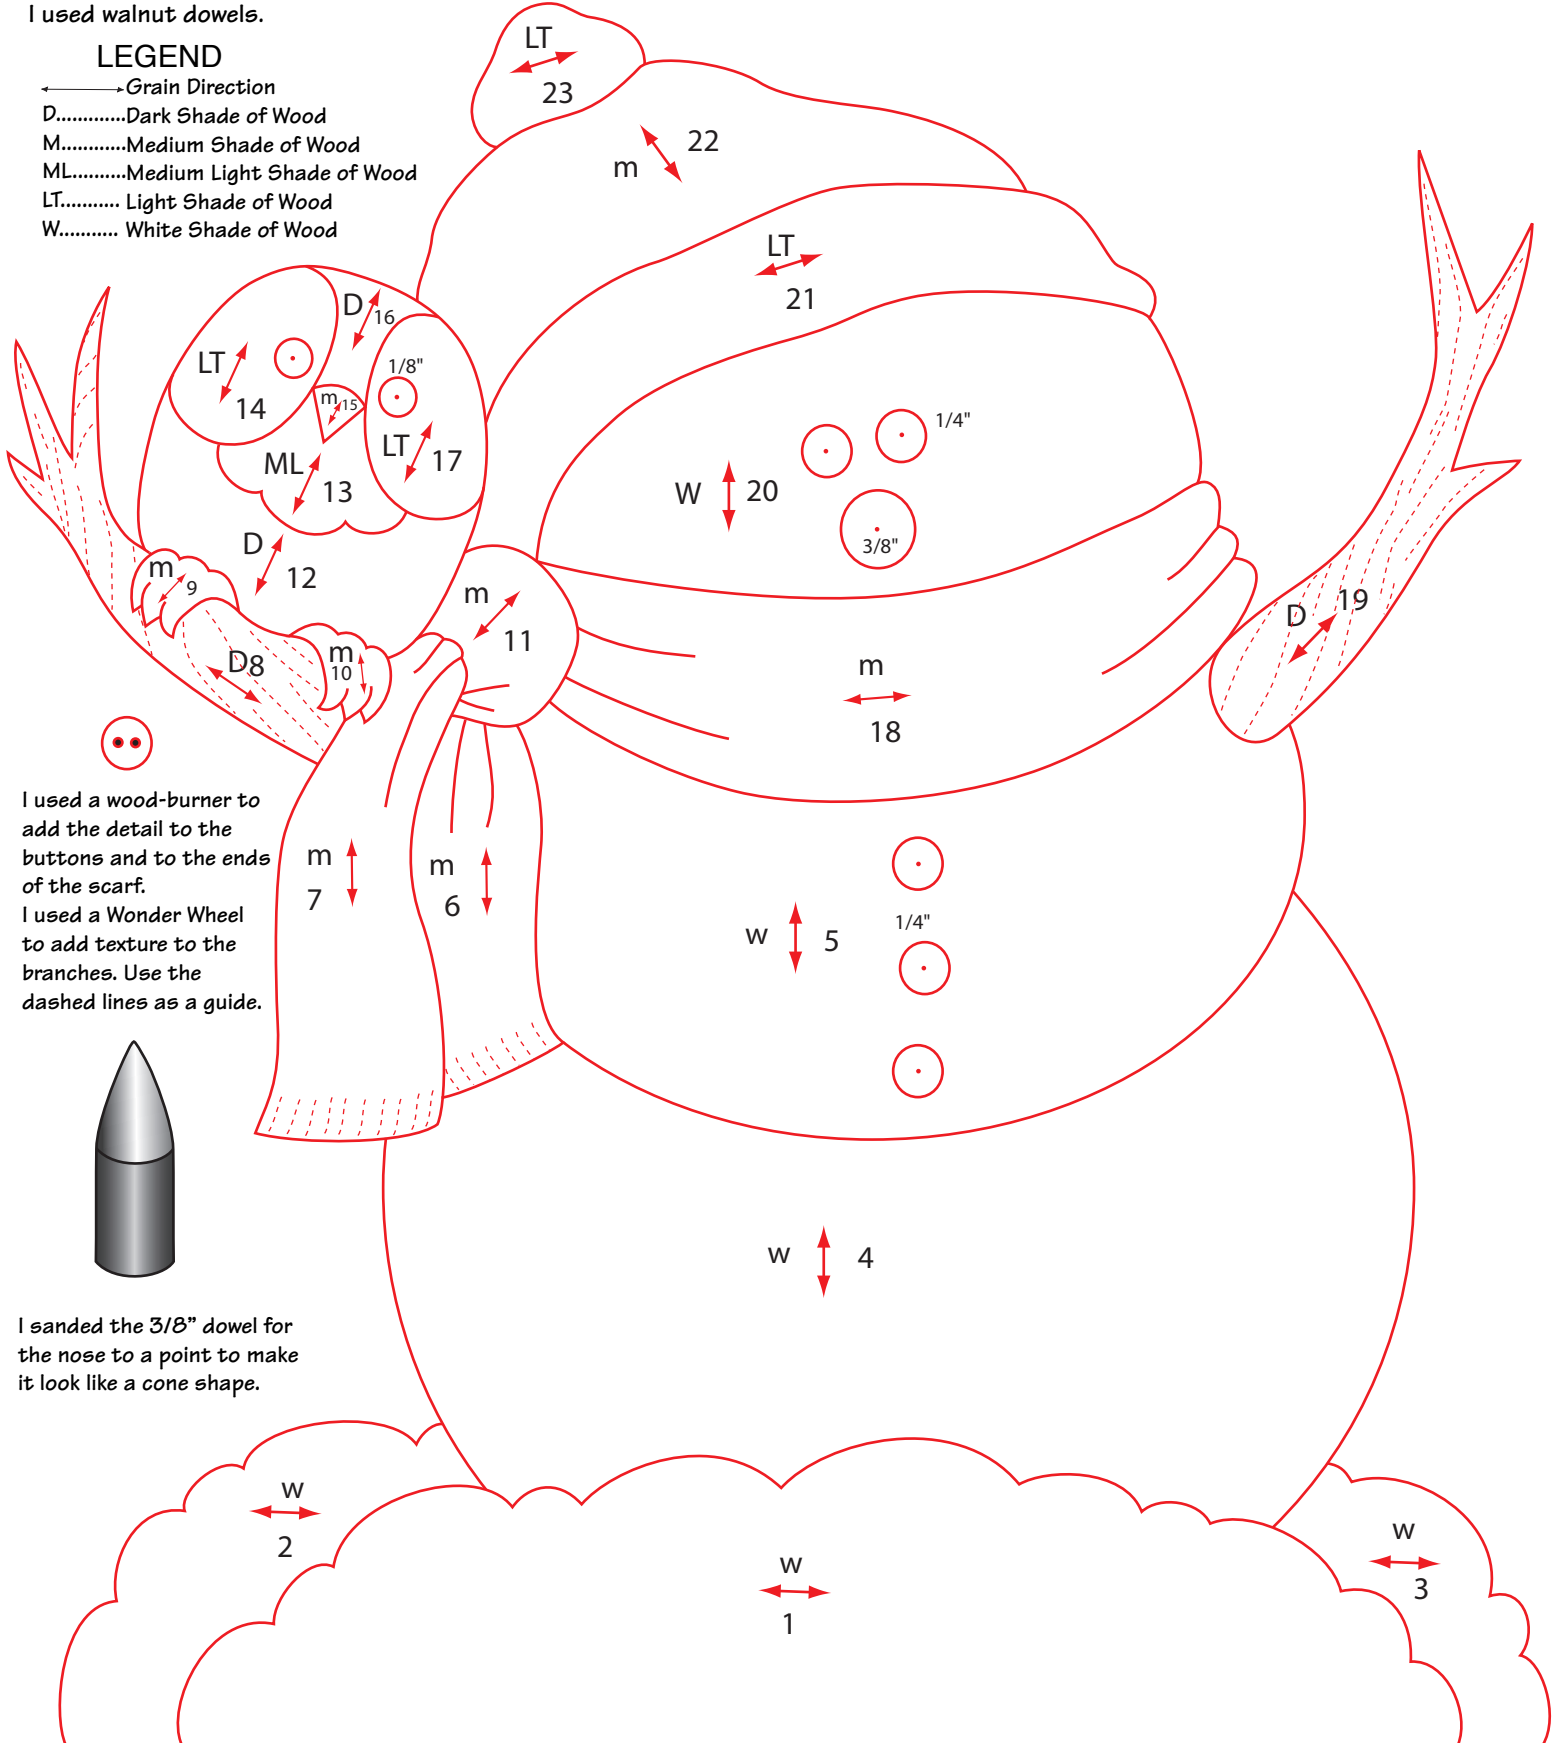

You will need 1/8", 1/4" and 3/8" dowels for the eyes, nose and buttons.

I used walnut dowels.

LEGEND

- ←————→ Grain Direction
- D.....Dark Shade of Wood
- M.....Medium Shade of Wood
- ML.....Medium Light Shade of Wood
- LT..... Light Shade of Wood
- W..... White Shade of Wood

This pattern was featured in the Spring 2001 issue of Scroll Saw Woodworking and Crafts magazine. The issue is sold out, we have many requests from people that see the snowman in our showroom.

I used a wood-burner to add the detail to the buttons and to the ends of the scarf.

I used a Wonder Wheel to add texture to the branches. Use the dashed lines as a guide.

I sanded the 3/8" dowel for the nose to a point to make it look like a cone shape.
