## Pantograph Features continued . . .

A “Pantograph” is a continuous line design, also called a panto. Pantographs allow you to quilt an “Edge-to-Edge” design, which is a single design that covers the entire quilt top. Pantographs are also used to quilt your borders and sashing borders around and your quilt.

“Single Continuous Line Design”

Repeated single design making a single “Pantograph Design” for borders or border sashing

Rows of the pantograph design making an “edge-to-edge quilt design, covering the entire quilt top

## Pantograph continued. . .

A “Pantograph Design” is a continuous line design used for quilting “all over quilt design” (also called “edge-to-edge quilt design”).

“Edge-to-edge quilting ” is a continuous line design quilted from one edge of the quilt to the other and is a repeated design from top to bottom. It is a quick, easy, and economical way to quilt. It also provides a balanced proportion of stitching and enhances your quilt without highlighting any individual feature on it.

# Pantograph continued. . .

A “pantograph design” is a continuous line design used for quilting borders.”

“Border Pantograph Design” is a single pantograph design used to frame your quilt. Using the right pantograph design on your borders will add an extra decorative finish, helping draw attention to your beautiful masterpiece.

# Pantograph continued. . .

A “Pantograph Design” is a continuous line design used for quilting “Border sashings.”

“Quilt Border Sashing Design” is a single Pantograph design used to quilt around your quilt block border. “Sashing Pantograph Design” can create a windowpane look to your quilt, making each block stand out.

# Pantograph continued. . .

Important things to do before putting your quilt on the frame:

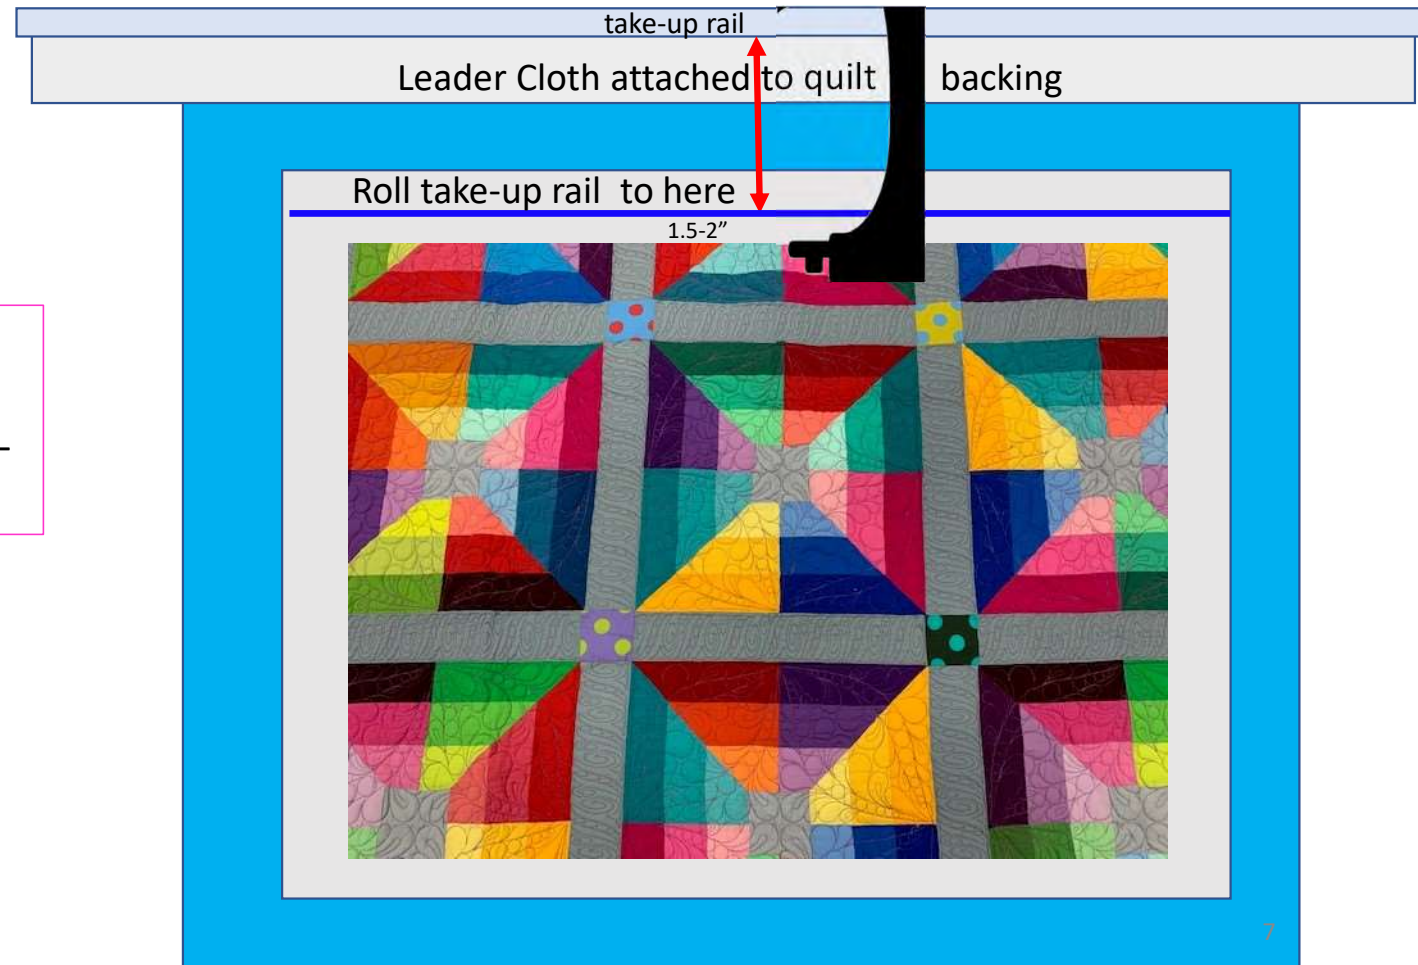

1. Backing should always be wider than your quilt top. 6-8" wider on all four side.
2. Batting should also be larger than you quilt top (2-3" wider each side) but smaller than the backing.
3. Measure your quilt top width and height/length write it down.

## Pantograph continued. . .

Important things to do after attaching quilt to leaders on take-up rail:

4. Roll quilt up on take-up rail toward you or the front of the frame until there is 1.5-2" unrolled from your top.

## Pantograph continued. . .

Important things to do after attaching quilt to leaders on take-up rail.

5. Baste or sew along the quilt top edges to tack it down. This is important when quilting an edge-to-edge design; your design will sew off the edges of your quilt. If you don't tack down the edge your hopping foot can get caught and tear your quilt. Start on the left edge as far as the machine can reach and sew along the edge of the quilt top to the upper left corner then towards the upper right corner and down the right edge as far as the machine can reach.

\*After every roll tack down the left and right-side edges! When you get to the bottom tack, around the bottom edges as well.

# Pantograph continued. . .

“Pantograph” let’s you choose to quilt using:

“Power Panto” which is a quick, and easy way to quilt an edge-to-edge design across your quilt.

“EZ Panto” let’s you decide the size of your design width and height.

“Basic Panto” help’s you customize your design for a one-of-a-kind quilt.

“Advanced Panto” is used with “Gold Card Access” to customize your quilts with greater detail.

We will learn how to use and place our pantograph design using the best placement method for our quilt.

## Pantograph Power Panto continued. . .

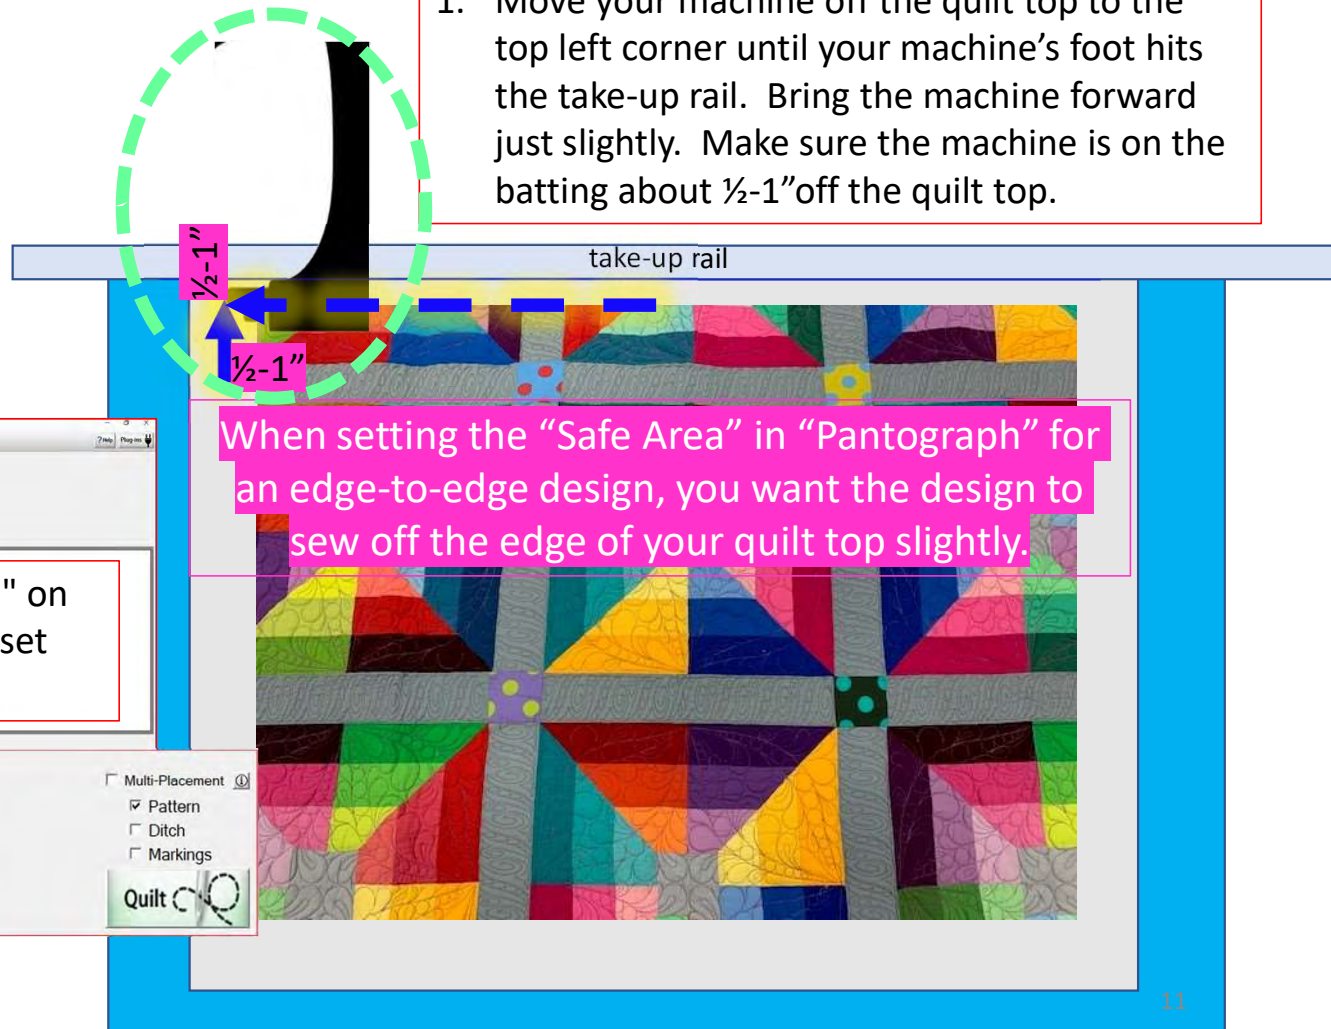

The “Safe Area” is your “quiltable,” space on your quilt. It will be different for every quilt. The “Safe Area” is defined by quilt size, machine throat and design. For pantograph edge-to-edge design, you will want to set your safe area just off the edge of your quilt top so the design will sew off the edge slightly. How far off is determined by you and how wide your backing and batting are. Remember, you always cut your backing and batting wider than your top.

Let’s set the safe area.

# Pantograph continued. . .

1. Move your machine off the quilt top to the top left corner until your machine's foot hits the take-up rail. Bring the machine forward just slightly. Make sure the machine is on the batting about  $\frac{1}{2}$ -1" off the quilt top.

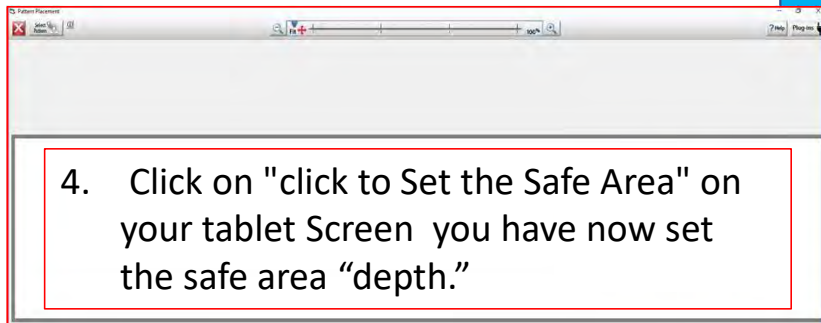

2. Click on "click to Set the Safe Area" on your tablet screen. You have now set the safe area "width."

## Pantograph continued. . .

3. Move your machine across the width of the quilt top off the right edge onto the batting about  $\frac{1}{2}$ -1". Now bring the machine as far as you can towards the front of the frame until you hit the back of your machine.

4. Click on "click to Set the Safe Area" on your tablet Screen you have now set the safe area "depth."

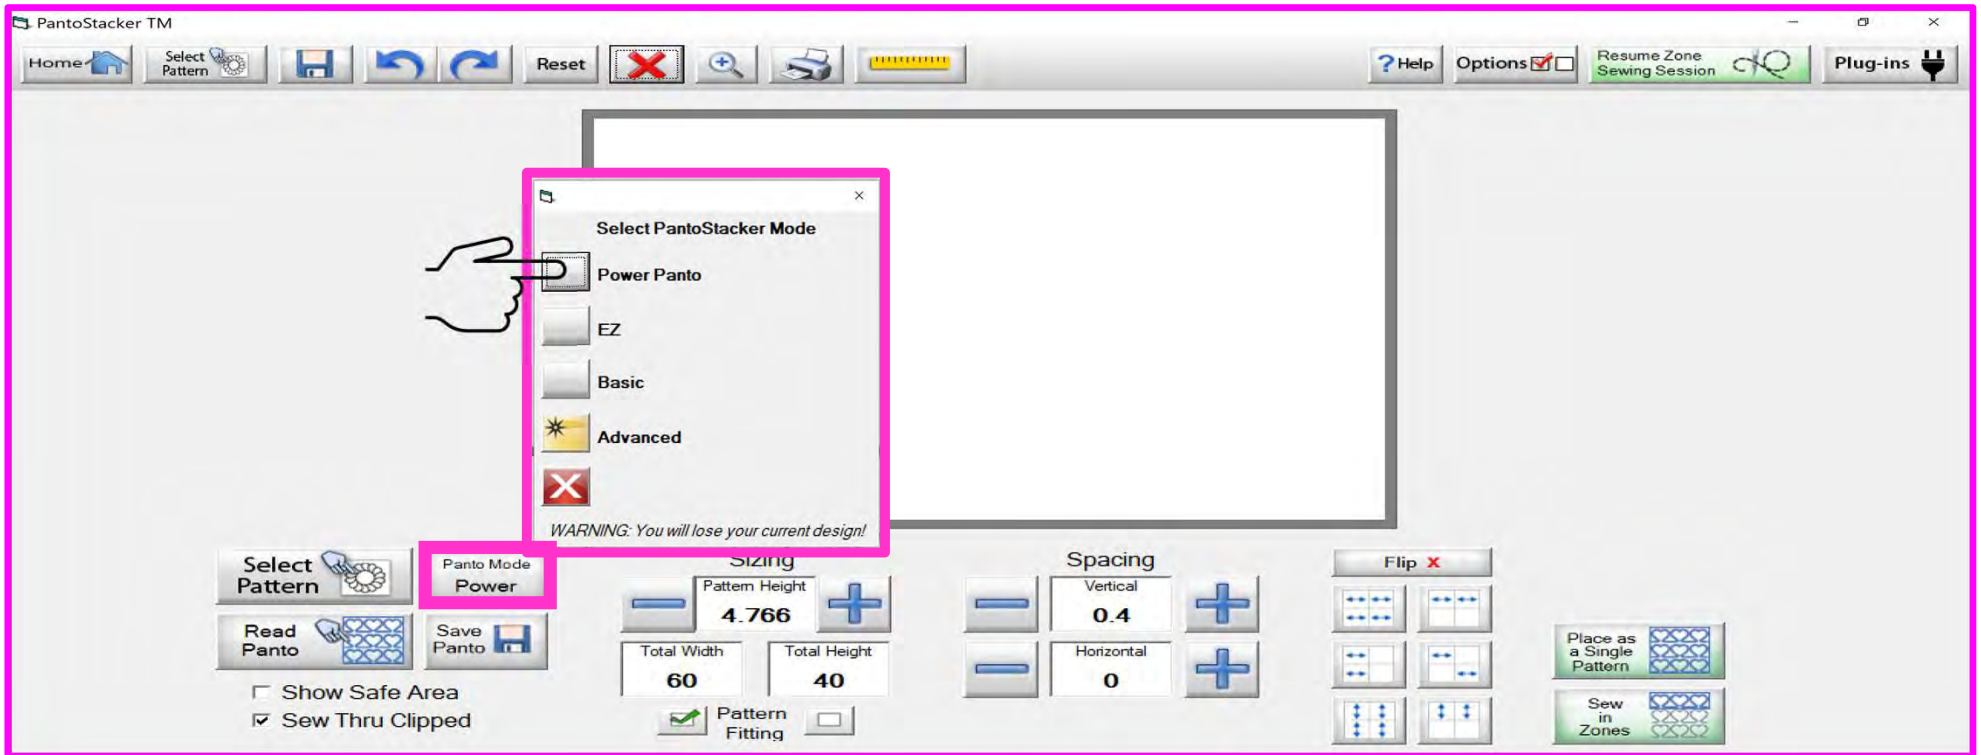

# Important Notice:

Always remember that your machine will determine the size of your pantograph design. If you are quilting with a machine that has 9" throat (measure from the back of the machine to the needle) Make sure your design is less than 9" wide. Allow for reduction of your quilting area as you roll your quilt. The take-up rail (the rail/pole that goes through the arm of the machine) "takes up" the quilt layers as you roll to a new section and gets wider as you quilt. As the take-up rail gets wider when you roll the quilt you will loose from 6"- 9"of quilting area as you roll your quilt. This decrease is determined by the size of your quilt, batting loft (thickness), and piecing.

# Pantograph continued...

This is your “PantoStacker” screen. “PantoStacker” is our suite of tools to design pantographs—from a single row design to a whole quilt edge-to-edge design. The PantoStacker modes include “Power Panto,” “EZ,” “Basic,” and “Advanced.” Click on “Panto Mode Power” to choose a mode. We’ll start with “Power Panto.”

9. Print your Pantograph design to follow with along manually laser.

To print your pantograph design, click on "Print"

# Pantograph continued...

9. Print your pantograph design to follow along using a laser.

To "print" your single pantograph design, change your pattern height and total height to what size you want each single design to be. If you want each design/pattern to be 5" then change your "Pattern Height" and "Total Height" to "5." How wide is your quilt that is want size you will use for the "Total Width." Now that you have those measurements you can decide how many designs look good in space. Below we only have 5 designs to cover 60" width. Reminder, the throat of your machine will also determine the depth/size.

<b>Select Pattern</b>	Panto Mode Basic	Row Height 5		<b>Select Row</b>		<b>Reset</b>	<b>Stagger</b>		<b>Step</b> Medium
Patterns 5	Pattern Width 12	Pattern Height 5							Place as a Single Pattern
Rows 1	Total Width 60	Total Height 5		All/None Alternate					Sew in Zones

9. Print your pantograph design to follow along using a laser.

“Block Border” checked shows a border line around your pantograph design.

With “Block Border” unchecked, you will not have a border around your pantograph design.

# Pantograph continued. . .

9. Print your pantograph design to follow along using a laser.

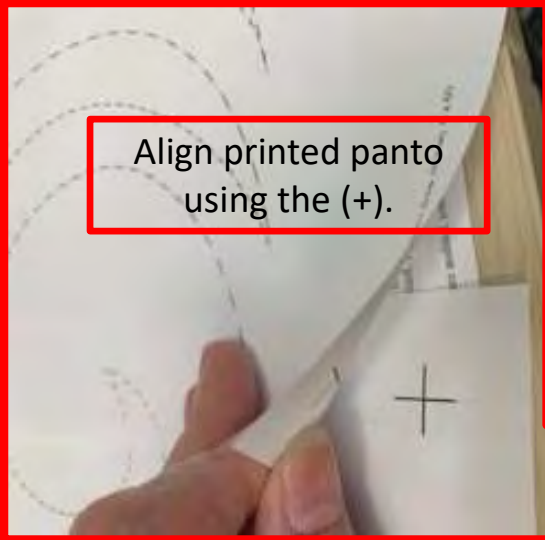

"Show Page" checked shows how many pages you have for your pantograph design.

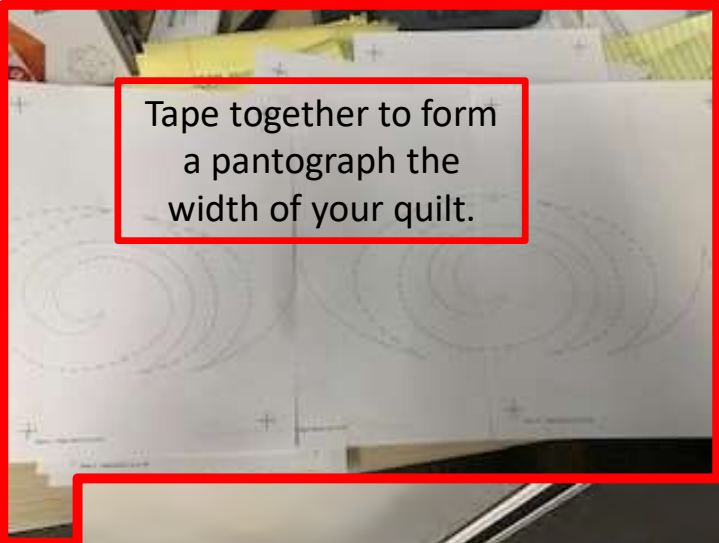

"Show Page" uncheck no pages showing for your pantograph design.

## Pantograph continued. . .

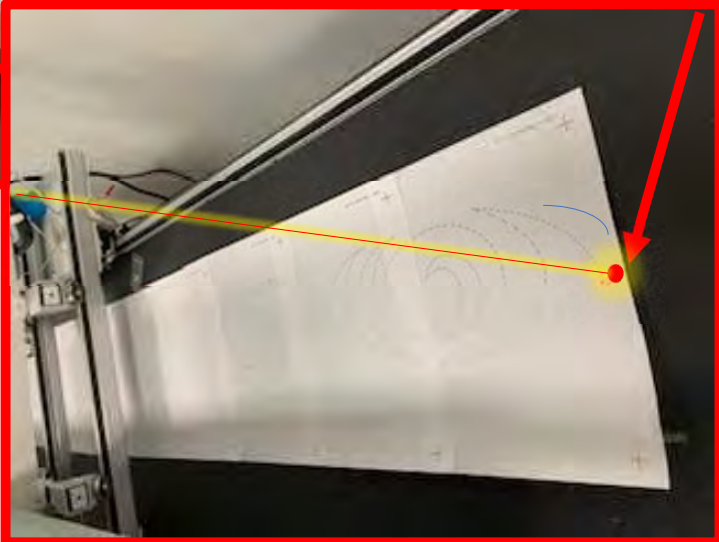

Align printed panto  
using the (+).

Tape together to form  
a pantograph the  
width of your quilt.

It is important to make sure you have enough space to quilt from the back of your frame. You will need at least 24-30" of clearance to quilt.

Place the pantograph on the back of your quilting frame table. Move your machine forward until the machine's throat hits the take-up rail. Move the machine back as far as you can or until you come close to the needle without hitting the take-up rail. This will help you determine where to position the pantograph on the table. Move the machine down your quilt moving forward and back to help position the pantograph the width of your quilt.

Use your laser to follow from the back of your frame. You will need "Rear Handles," which are an added accessory for some machines.

10. The ruler enables you to measure distances on your quilt. You can measure borders, sashings, or block lengths and widths and find the center on those measurements. The measurements can be used to size your quilt top or block, to precisely place and quilt a design or pantograph.

Discover the many uses of the Ruler . . .

OK Cancel Do Not Show Again

Mark Next Zone Tool Enabled

Move the Fabric

**Move the Fabric**

Move the fabric so that marker  
2A  
is beneath the sewing machine  
needle.

This does not have to be precise,  
but try to get it as close as  
possible.

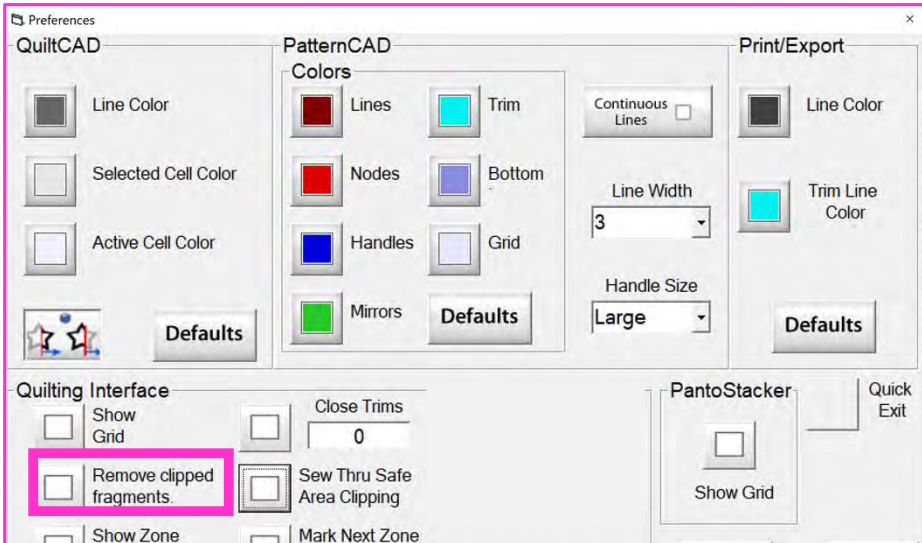

OK

Would you like to be guided in moving the fabric?

Yes No Do Not Show Again

“Mark Next Zone Tool Enabled” helps you mark your quilt top placements before you roll or shift the quilt to the next zone/section on your quilt to resume quilting.

Options

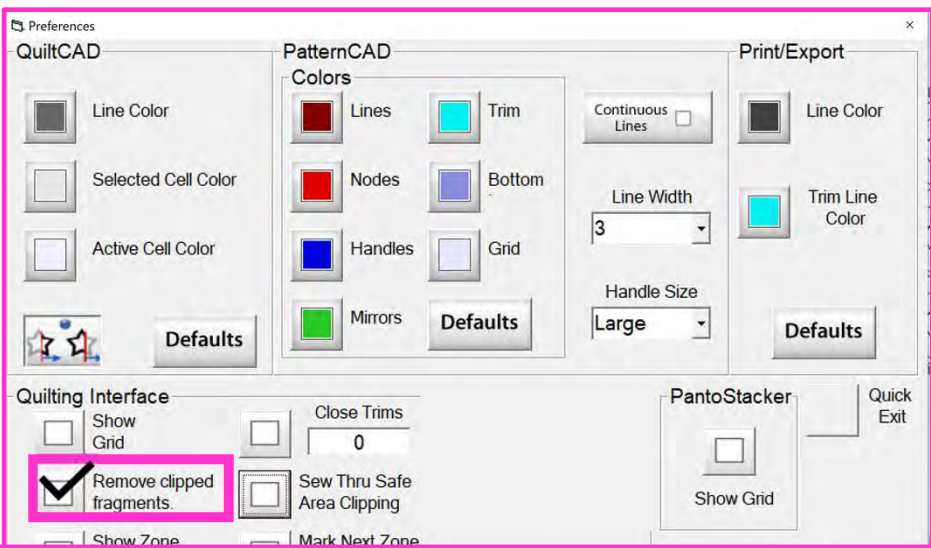

“Remove Clipped Fragments” unchecked will sew to the edge of the small fragment section and stop, asking for permission to move to the next section of the design. Your machine will stop at every section before it will sew the next portion of the design.

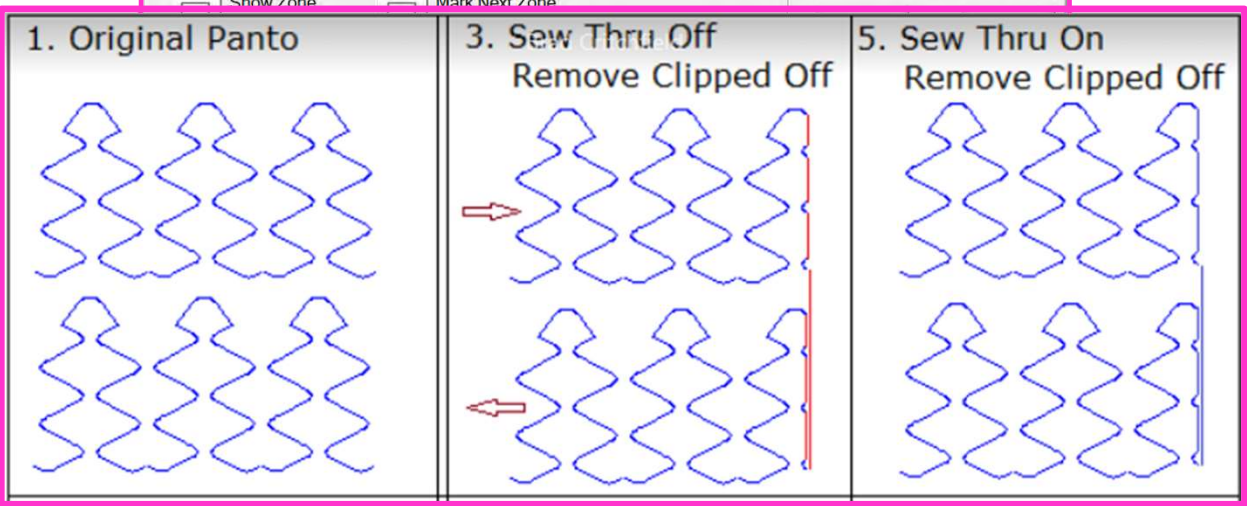

Sews small fragment section and stops.

Options

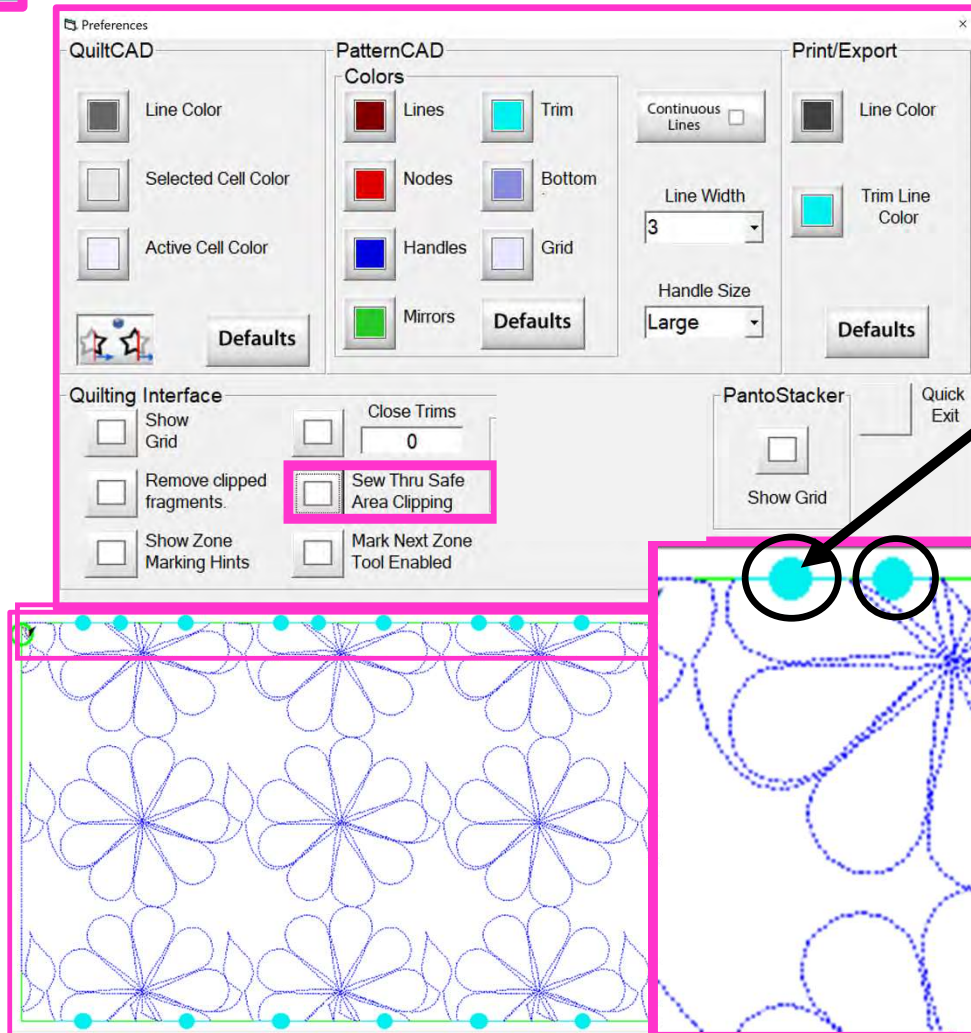

When "Remove Clipped Fragments" is checked, sews the machine sews an edge for the design fragment leading to the next. This allows continuous sewing with NO STOPS.

Sewed fragment to the next without stopping

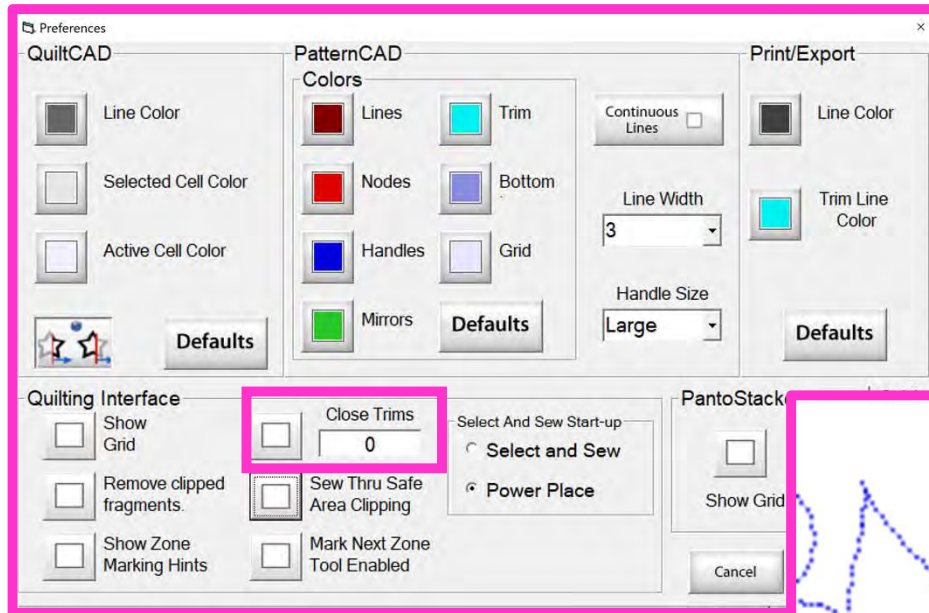

## Options

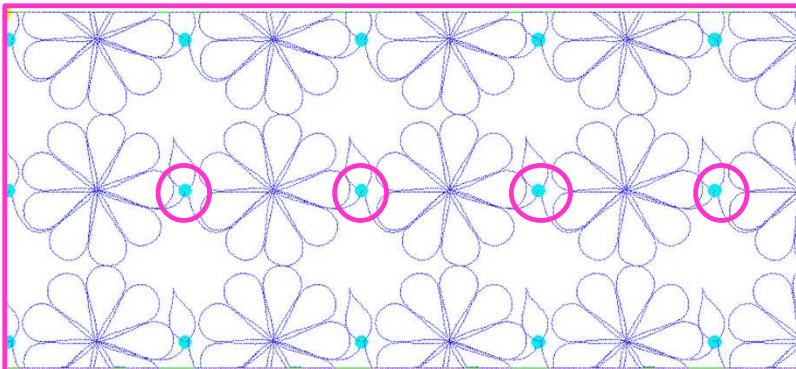

“Sew Thru Save Area Clipping” unchecked will stop quilting whenever there is a break in the design. The blue dots are breaks and when the machine will stop then it will prompt you to move to the next stitch.

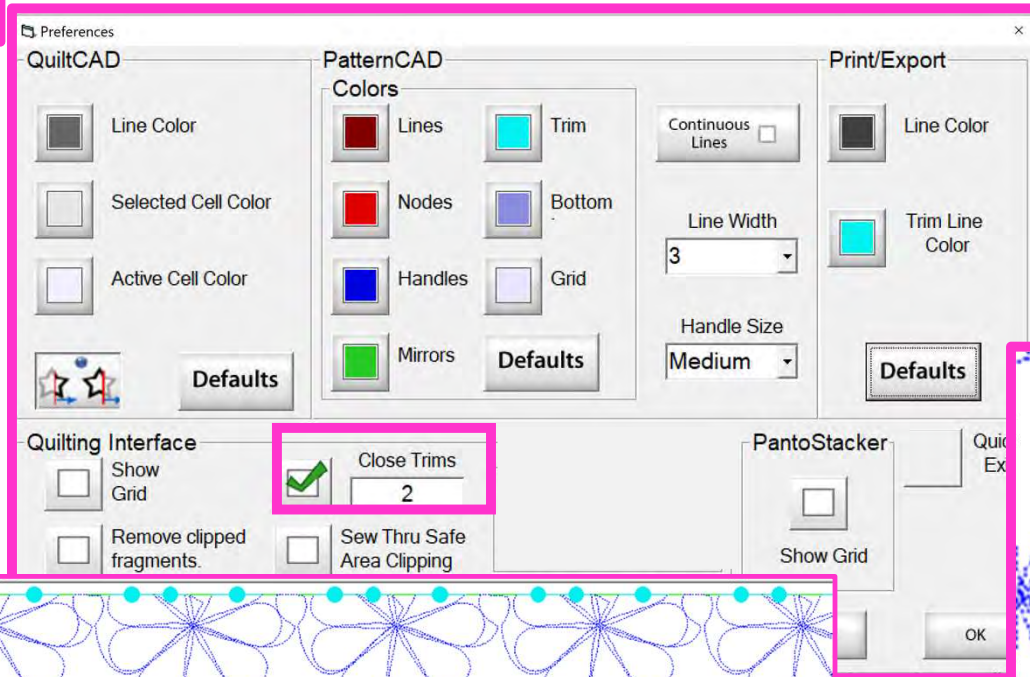

## Options

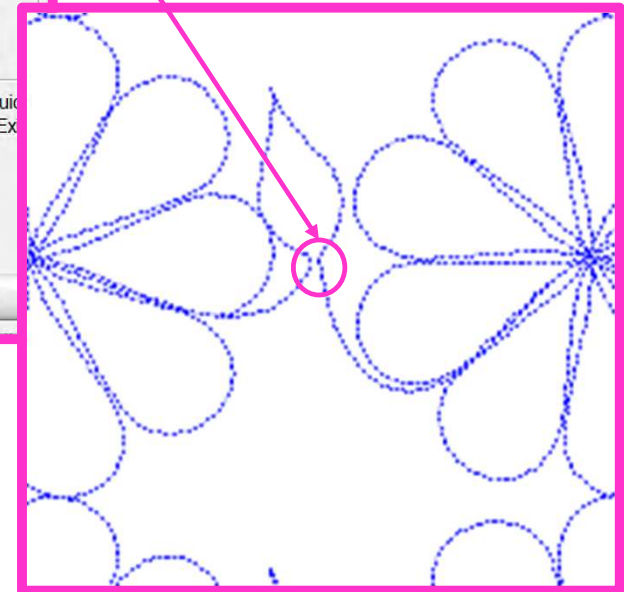

“Close Trims” unchecked will stop quilting at the end of the design before moving to the next design. This will leave a gap between designs will not be continuous.

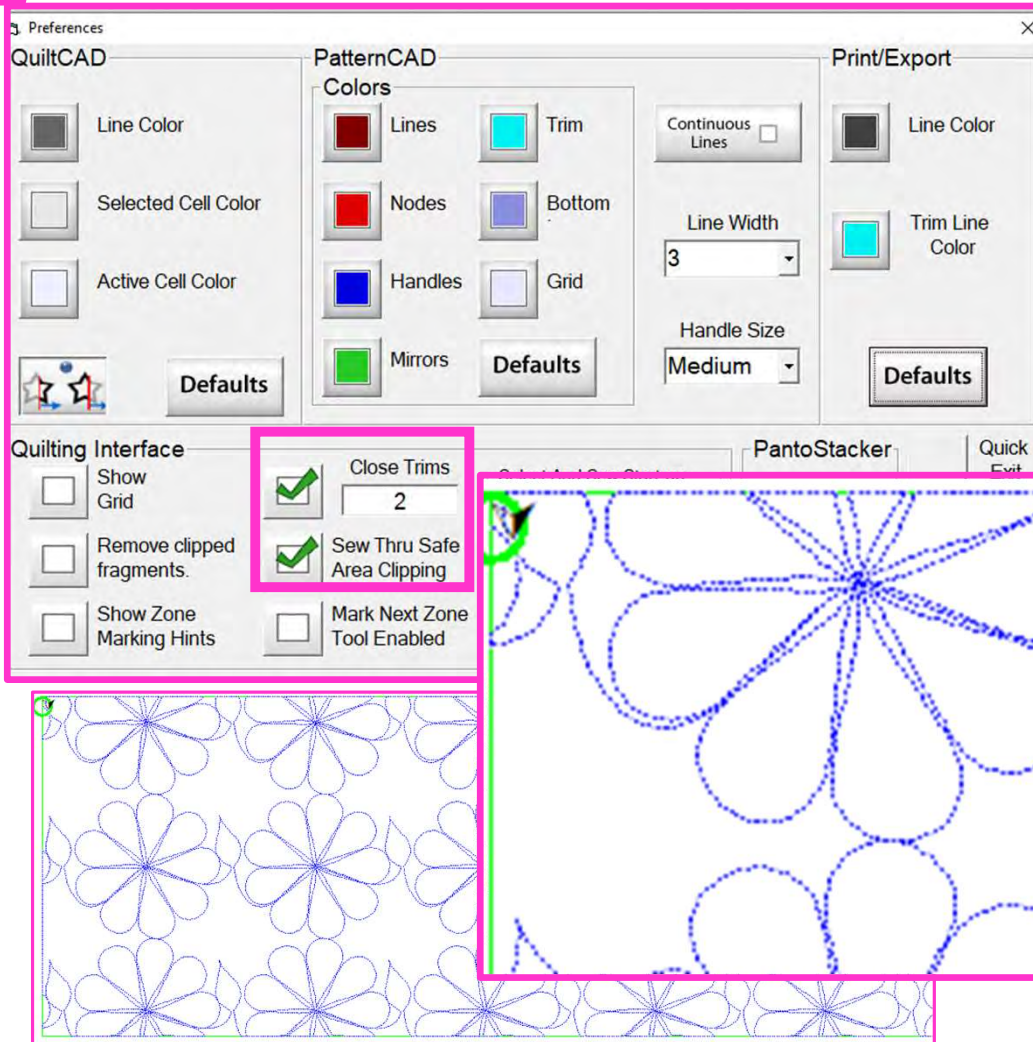

## Options

“Close Trims” checked will add stitches to the design to connect to the next design making it a continuous design across the quilt.

## Options

“Close Trims” & “Sew Thru Safe Area Clipping”

When both are checked, and your trims are at “2,” you will have no break --a pantograph design that will sew edge-to-edge without stopping!

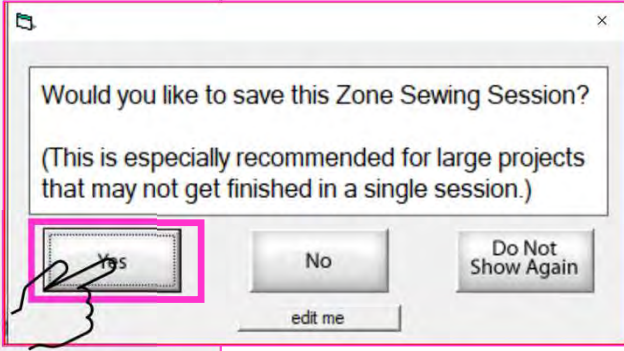

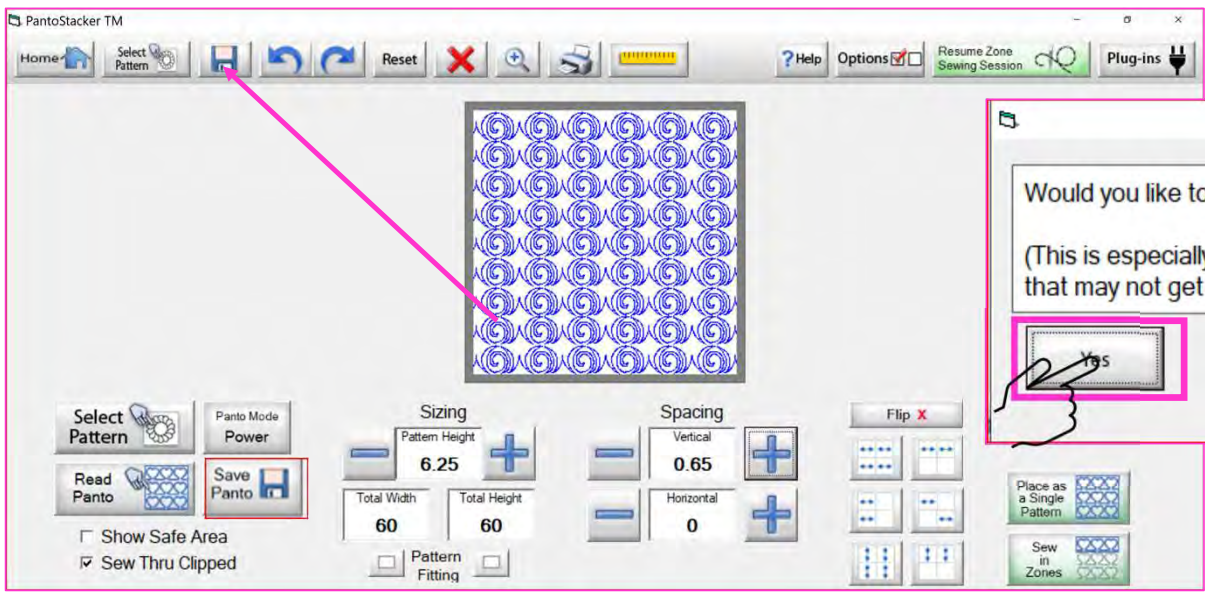

# Pantograph continued. . .

13. RESUME ZONE SEWING SESSION - Opens your saved pantograph to resume quilting.

You can save your pantograph design and reopen to begin quilting from where you left off. Let me take your through the process. When you are ready to quit for the day, Click on "Save."

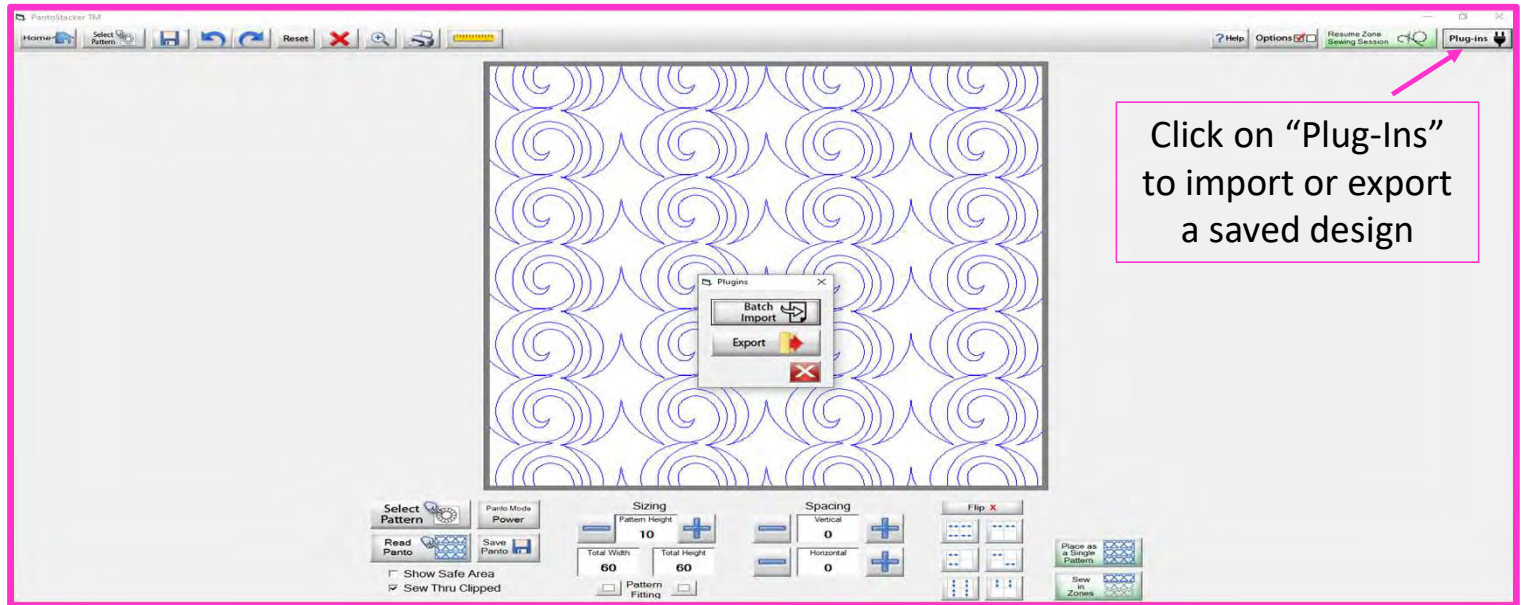

Click on "YES"

# Pantograph continued. . .

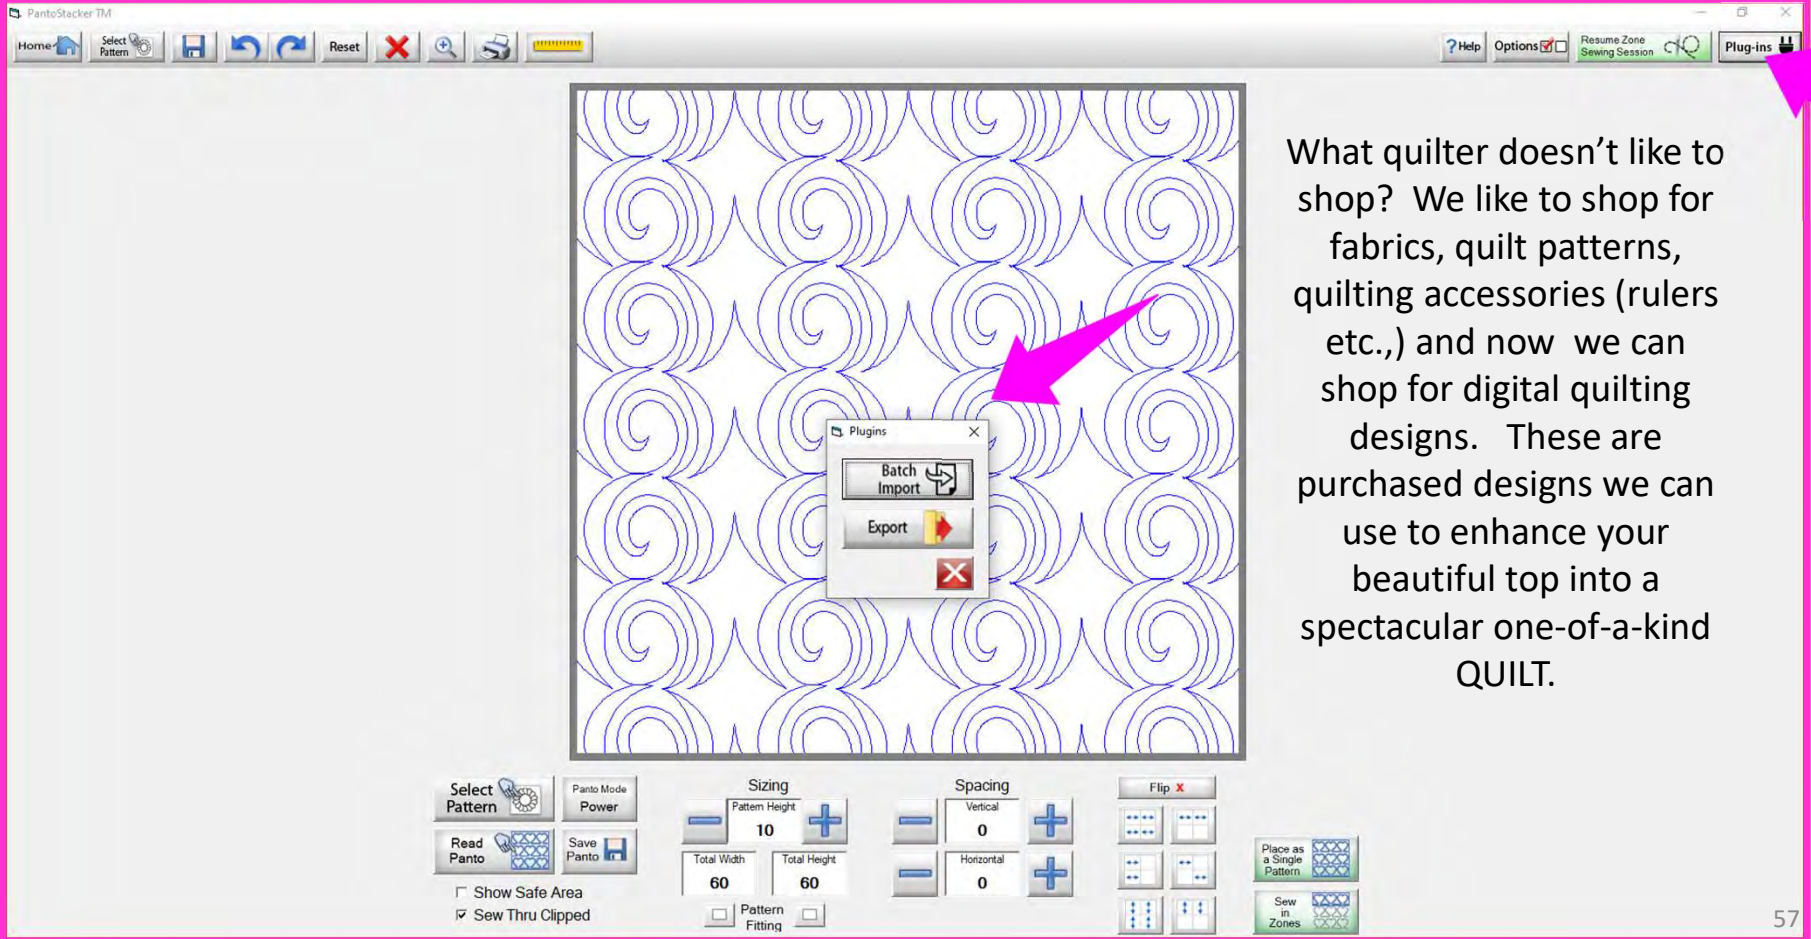

14. PLUG-INS - Access Batch Import and Export to import and export quilting designs.

# Plug-Ins Batch Import

The screenshot shows the PantoStacker TM software interface. The main window displays a quilt pattern with a repeating scroll design. A 'Plugins' dialog box is open in the center, featuring a 'Batch Import' button with a folder icon and an 'Export' button with a red arrow icon. A pink arrow points from the 'Plug-ins' button in the top right corner of the software window to the 'Batch Import' button in the dialog box. Another pink arrow points from the text on the right to the 'Batch Import' button. The software interface includes a top toolbar with icons for Home, Select Pattern, Save, Undo, Redo, Reset, and a yellow 'PANTOSTACKER' button. The bottom toolbar contains buttons for Select Pattern, Panto Mode Power, Read Panto, Save Panto, Sizing (Pattern Height: 10, Total Width: 60, Total Height: 60), Spacing (Vertical: 0, Horizontal: 0), Flip X, Place as a Single Pattern, and Sew in Zones. Checkboxes for 'Show Safe Area' and 'Sew Thru Clipped' are also visible.

What quilter doesn't like to shop? We like to shop for fabrics, quilt patterns, quilting accessories (rulers etc.,) and now we can shop for digital quilting designs. These are purchased designs we can use to enhance your beautiful top into a spectacular one-of-a-kind QUILT.

Just to let you know — we've received your order #25292, and it is now being processed!

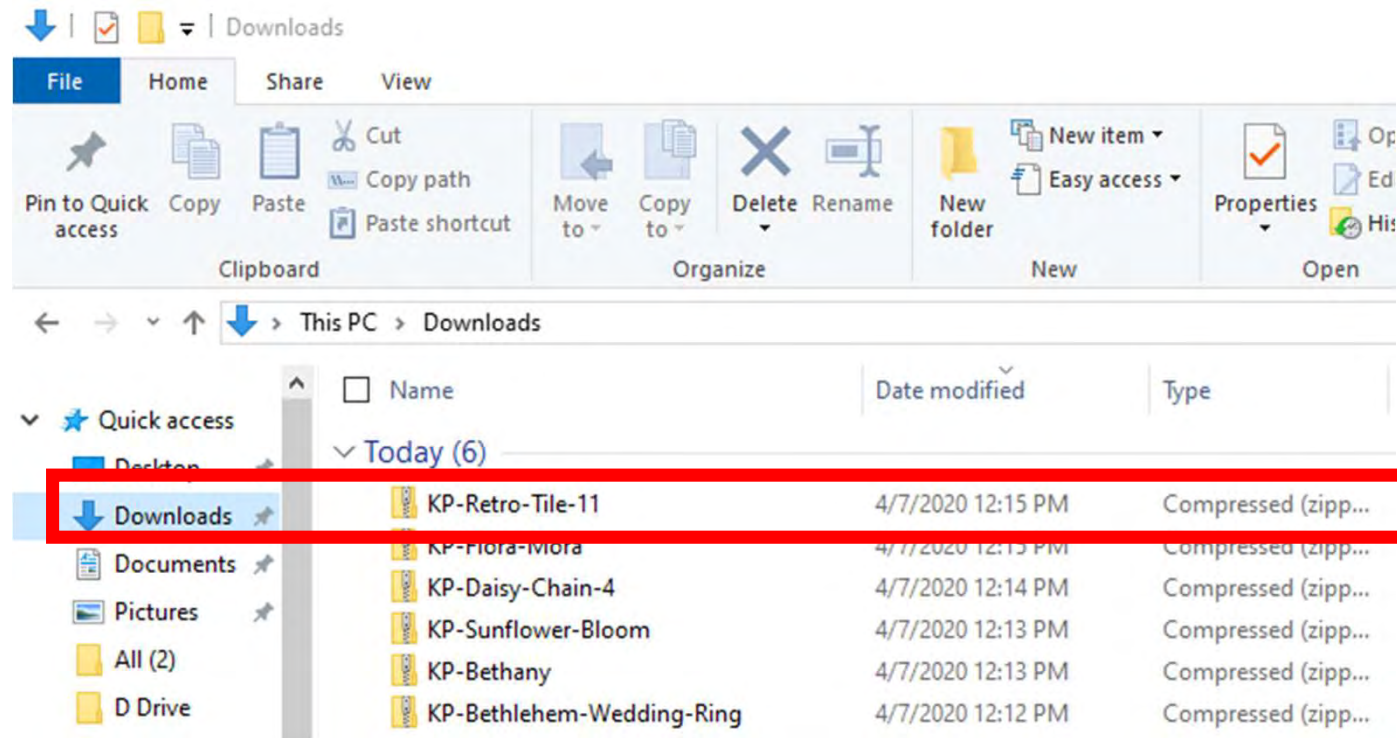

### Downloads

Product	Expires	Download
<a href="#">Bethlehem Wedding Ring</a>	Never	<a href="#">KP Bethlehem Wedding Ring</a>
<a href="#">Bethany</a>	Never	<a href="#">KP Bethany</a>

Another way to download your purchased design(s) is through your email. A receipt is emailed to you and contains download links for the designs.

Click on name of your design (**KP Bethlehem Wedding Ring**) to save the file to the Downloads folder on your computer.

## Plug-Ins Batch Import continued. . .

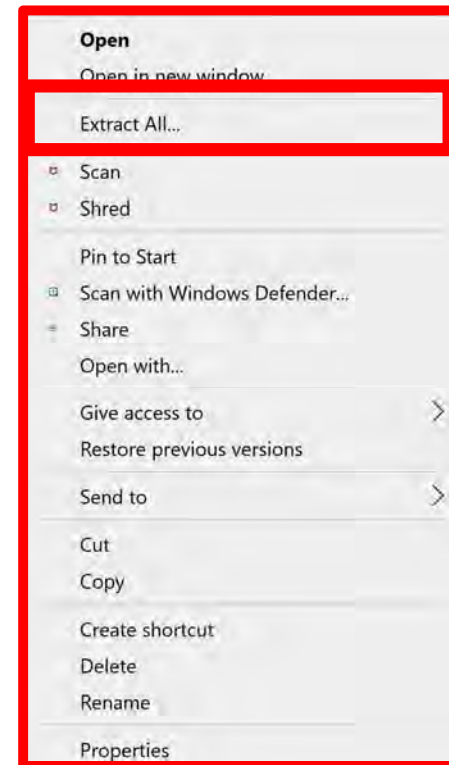

Locate the design you want to use in your Downloads Folder. Notice that under “Type” it is a compressed file. This means there are several different file formats (CMD, **CQP**, CSV, DXF, HQF, QDATA, **QLI**, SSD, TAP, TXT, XY) of the design included in you purchase. Some websites will have you pick your favored file format before you purchase. Others, like this site, provide the design in several different formats.

# Plug-Ins Batch Import continued. . .

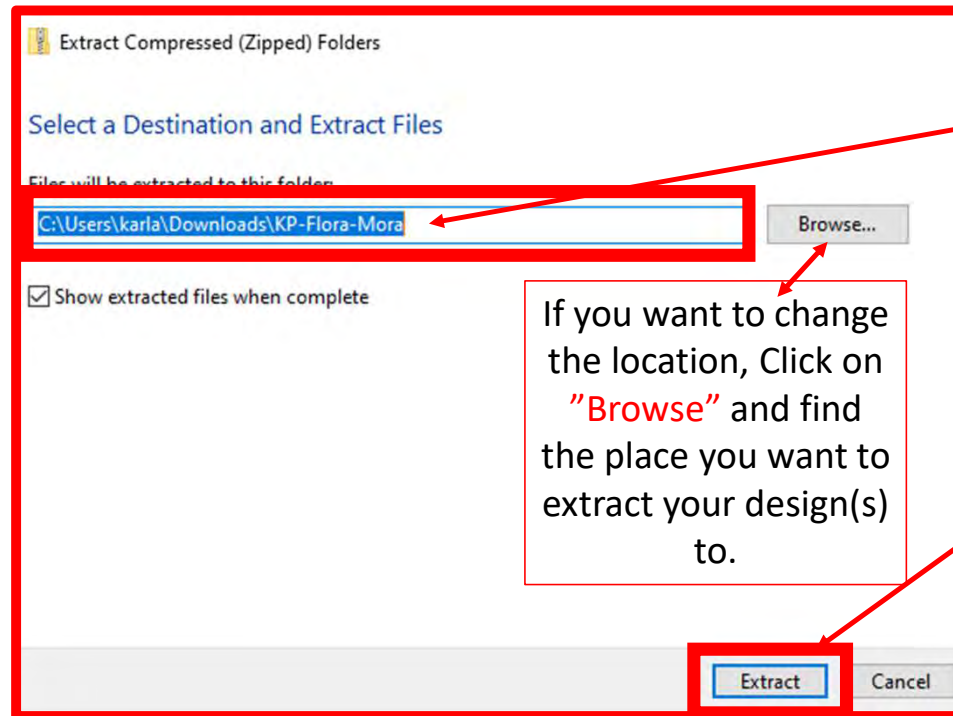

“right-click” on design file, then Click on “Extract All”

## Plug-Ins Batch Import continued...

Click on  
"Extract All"

If you want to change the location, Click on "Browse" and find the place you want to extract your design(s) to.

A popup will show you where your design will be extracted to. For example:  
C:\Users\karla\Downloads\KP-Flora-Mora. Then Click on "Extract" at the bottom of the popup.

Repeat this same process until all your purchased designs are extracted.

## Plug-Ins Batch Import continued. . .

Since our files are no longer compressed, we are ready to save our design to our USB thumb drive in the desired format.

Before we save to our USB thumb drive, let's make a file folder so we can find them easily.

# Plug-Ins Batch Import continued. . .

Before we copy our design(s) to our flash drive to import onto our tablet into QCT 5, we need to make a file folder and name it.

You can decide how you want to file (arrange) your designs, such as by designer or design type, style etc. Whatever method you choose, stick with it. **This is a very important; if you stick with your design filing system you won't double purchase designs or have a hard time finding one.** This will also keep your designs separate so you know which folder it is in to import.

Plug USB Flash Drive into computer.

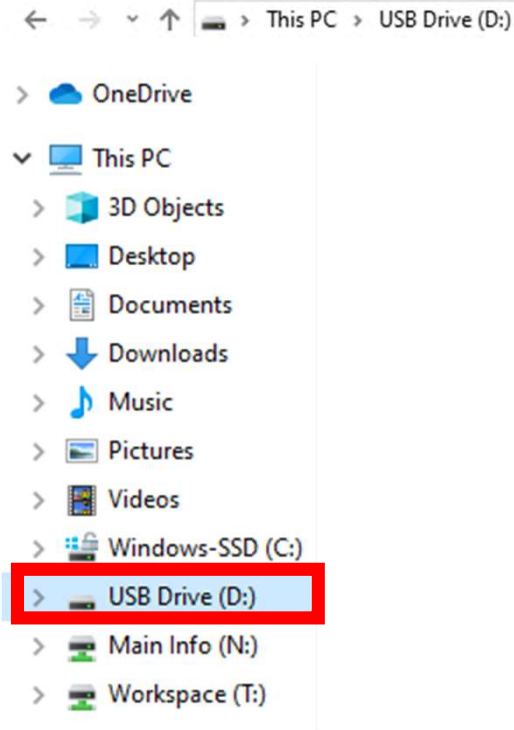

1. Find and select the new drive that appears, when you plug your flash drive in. It could be called USB Drive, or another name but it will have a letter after it. Mine is the USB Drive (D:) in this example.

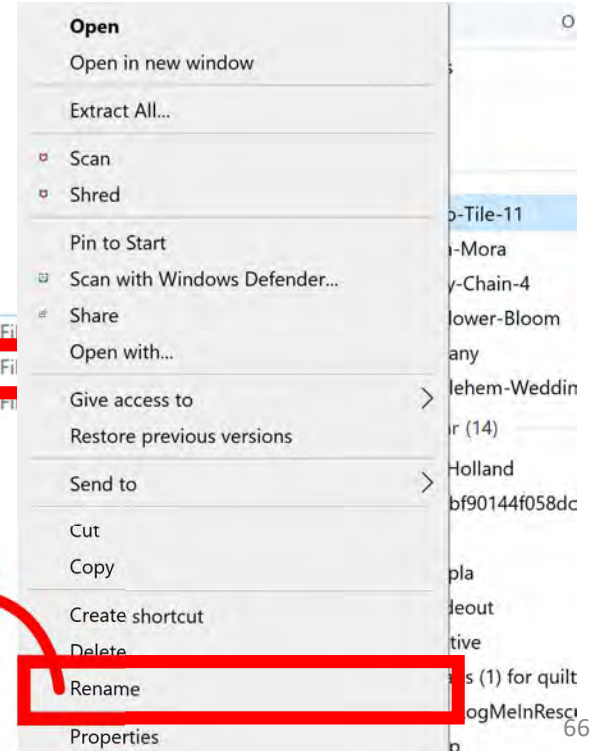

# Plug-Ins Batch Import continued...

2. Inside the USB Drive, Click on "New Folder." A new folder titled "New Folder" will appear.

3. "Right-click" on the new file folder and a popup screen will appear. Click on "Rename."

## Plug-Ins Batch Import continued...

The image shows a Windows File Explorer window with the 'Drive Tools' ribbon tab active. The 'New folder' button is highlighted with a red box. Below the ribbon, the address bar shows 'This PC > USB Drive (D:)'. A list of folders is displayed, with 'New folder' selected and highlighted by a red box. A context menu is open over the selected folder, and the 'Rename' option is highlighted with a red box. A text box with the instruction '4. Rename the folder.' is overlaid on the screen. To the right, another File Explorer window shows the contents of the USB drive, with the folder 'april 4 2020 kite quilt design' selected and highlighted by a red box.

4. Rename the folder.

We are now ready to save our designs to our USB flash drive. Open the folder where you first saved your extracted design.

## Plug-Ins Batch Import continued. . .

The screenshot shows the 'Extract Compressed (Zipped) Folders' dialog box on the left and a Windows File Explorer window on the right. The dialog box has a text field for the destination folder set to 'C:\Users\karia\Downloads\KP-Flora-Mora' and a checked checkbox for 'Show extracted files when complete'. The File Explorer window shows a list of files extracted to the same folder, with a red box highlighting the 'Type' column.

Files will be extracted to this folder:  
C:\Users\karia\Downloads\KP-Flora-Mora

Show extracted files when complete

Name	Date modified	Type	Size
KP Flora Mora.ans	4/8/2020 9:26 AM	ANS File	27 KB
KP Flora Mora.cqp	4/8/2020 9:26 AM	CQP File	56 KB
KP Flora Mora.dxf	4/8/2020 9:26 AM	DXF File	29 KB
KP Flora Mora.hqf	4/8/2020 9:26 AM	HQF File	92 KB
KP Flora Mora.iqp	4/8/2020 9:26 AM	IQP File	28 KB

# Plug-Ins Batch Import continued...

## Plug-Ins Batch Import continued...

## Plug-Ins Batch Import continued...

1. Click on each design you are importing. Selected designs will have a blue box around them.

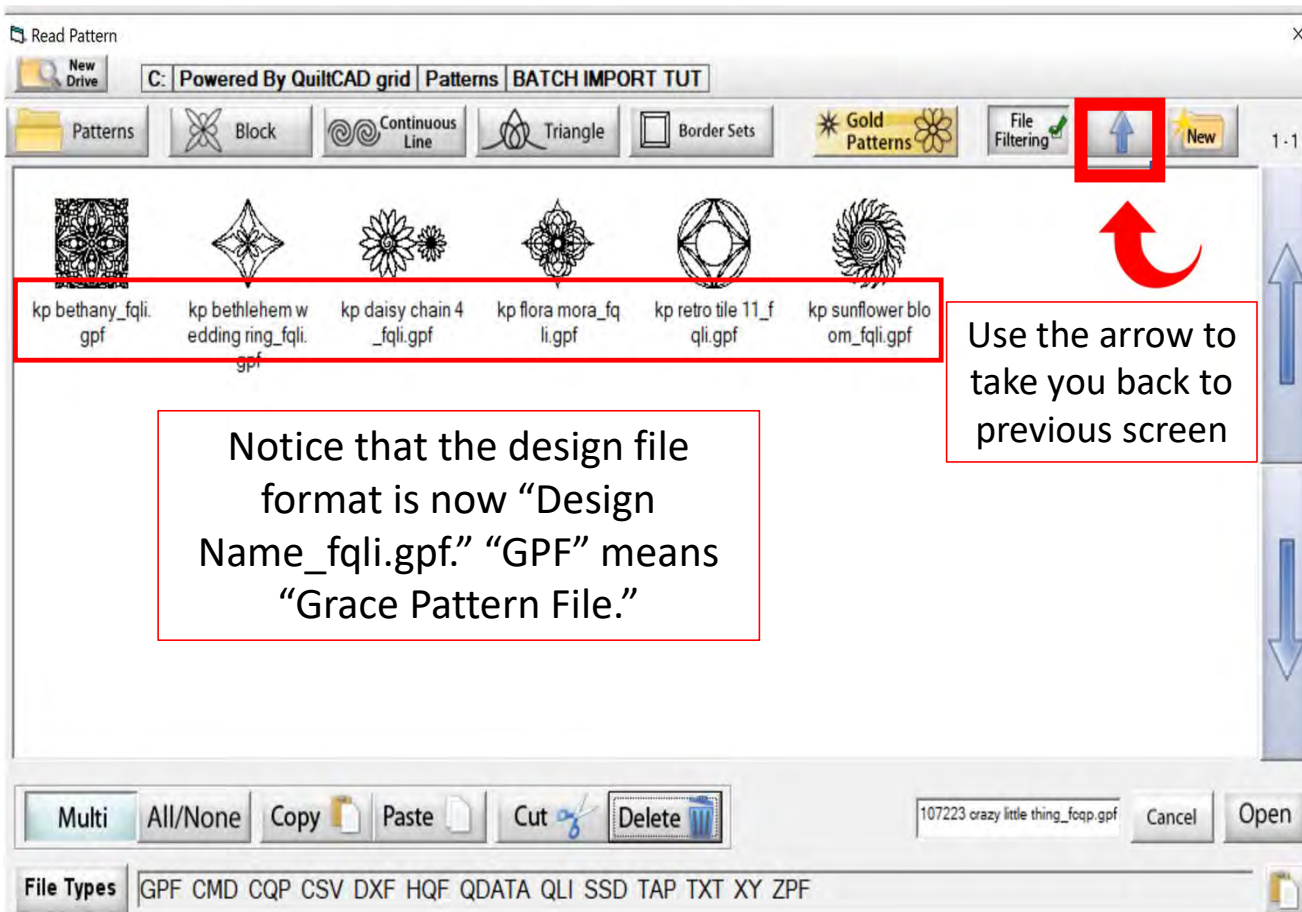

2. Click on "Import."

## Plug-Ins Batch Import continued. . .

Click on "Patterns" and see you have Designs are imported into a new folder called "Batch."  
This is a holding folder until you move your designs to a permanent folder.

## Plug-Ins Batch Import continued. . .

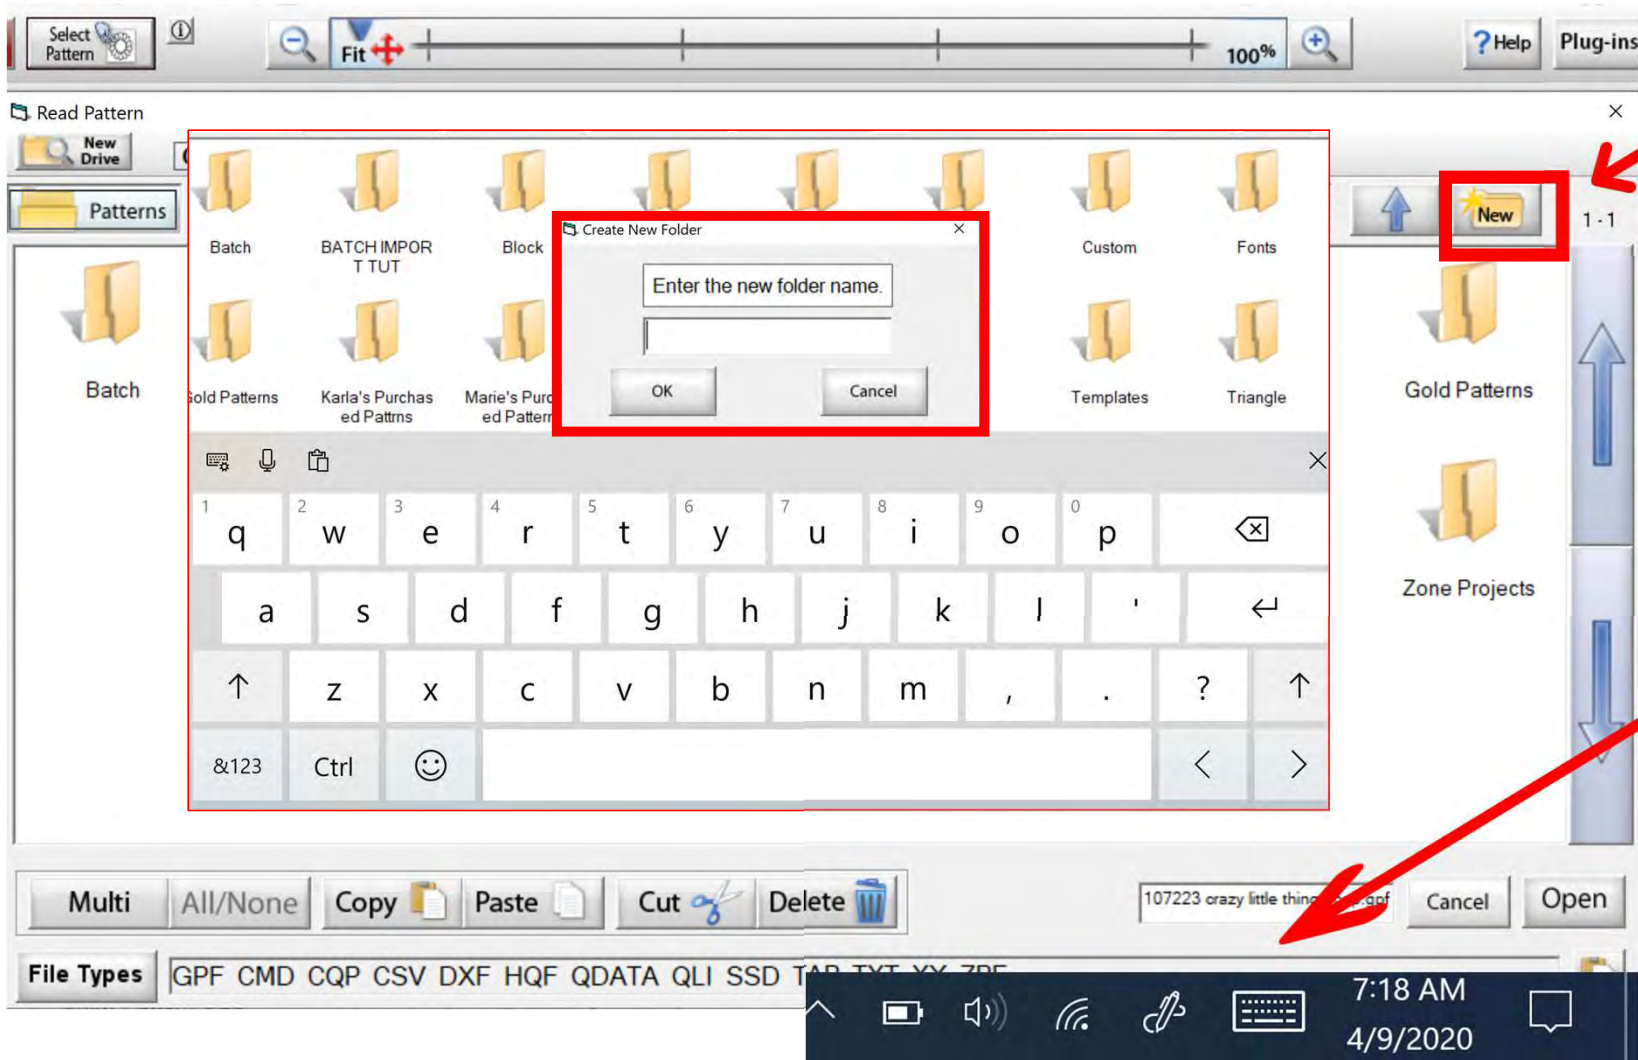

Notice that the design file format is now "Design Name\_fqli.gpf." "GPF" means "Grace Pattern File."

Use the arrow to take you back to previous screen

Your open "Batch" folder will show you your newly imported design(s). Let's move our design(s) to our new filing folder.

To create a new for your design(s), Click on the "Back Arrow" top right corner.

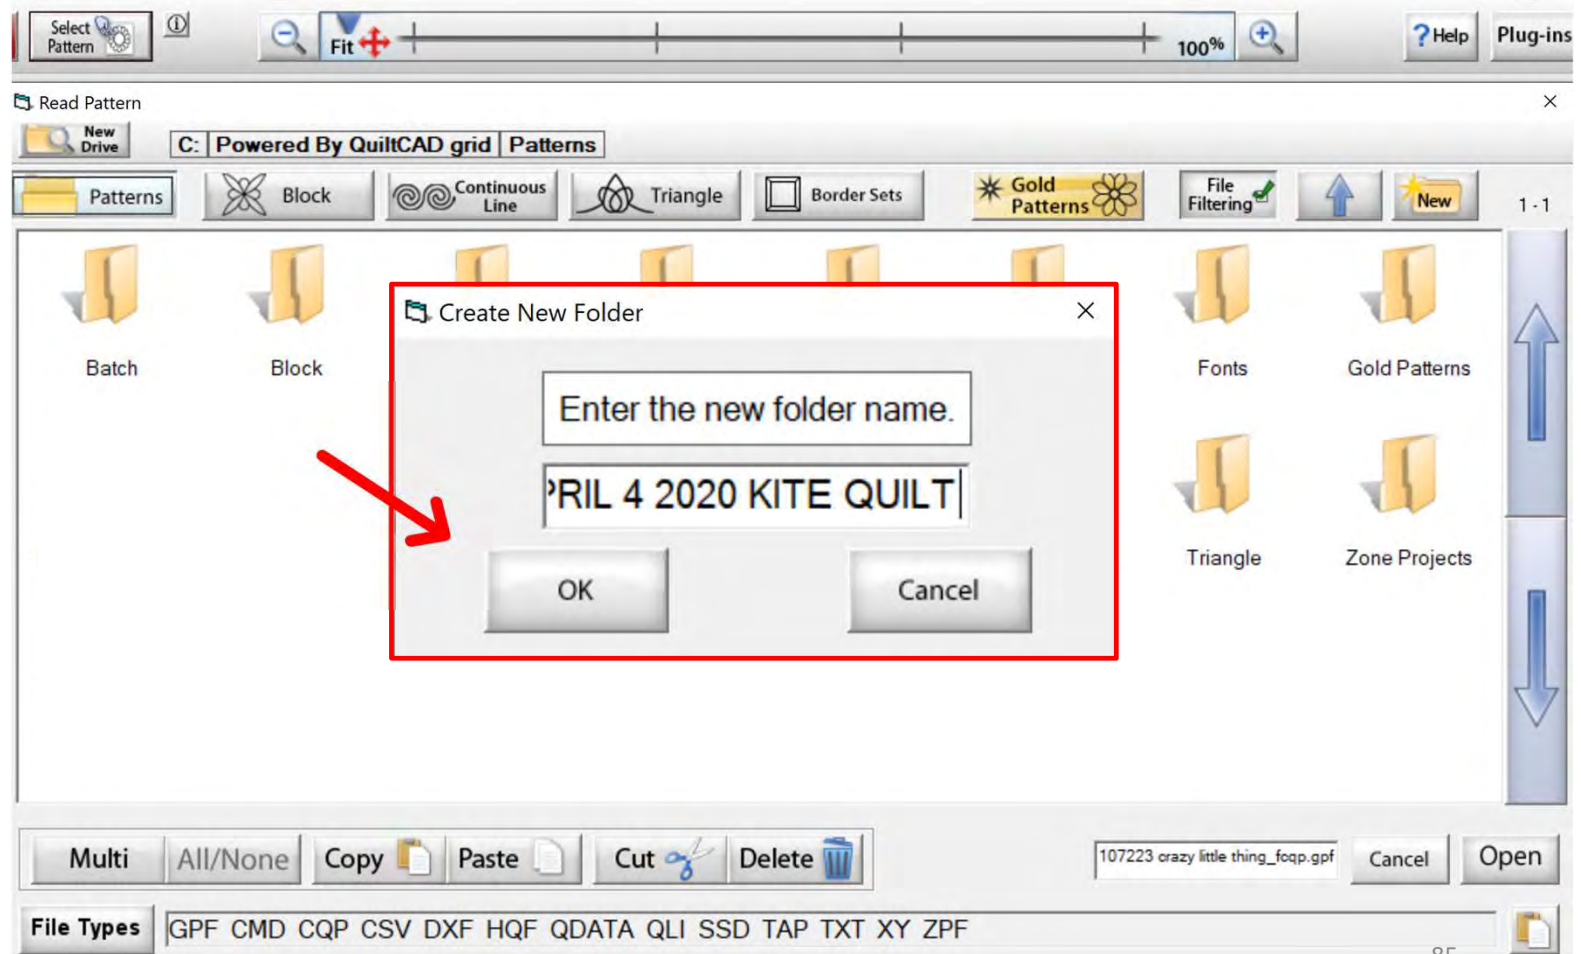

## Plug-Ins Batch Import continued...

Back in the folders screen, Click on "New" folder icon. Find your keyboard at the lower left of tablet screen. Click it and your keyboard will appear. Type the name for the new folder.

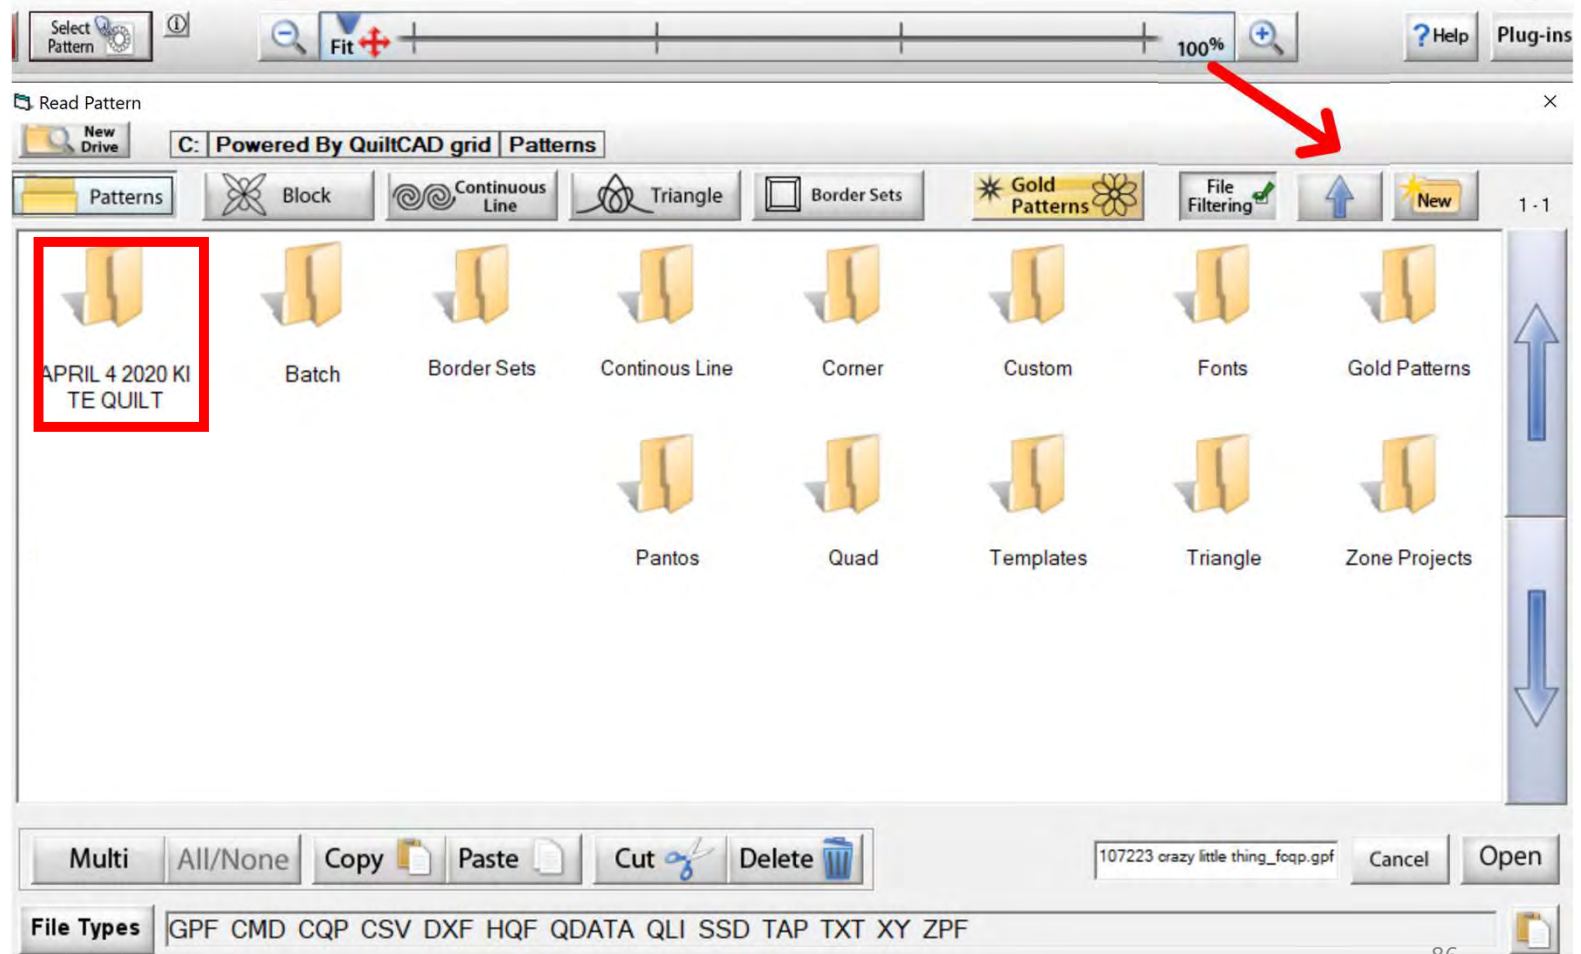

## Plug-Ins Batch Import continued...

When you have finished entering the "folder name," Click on "OK."

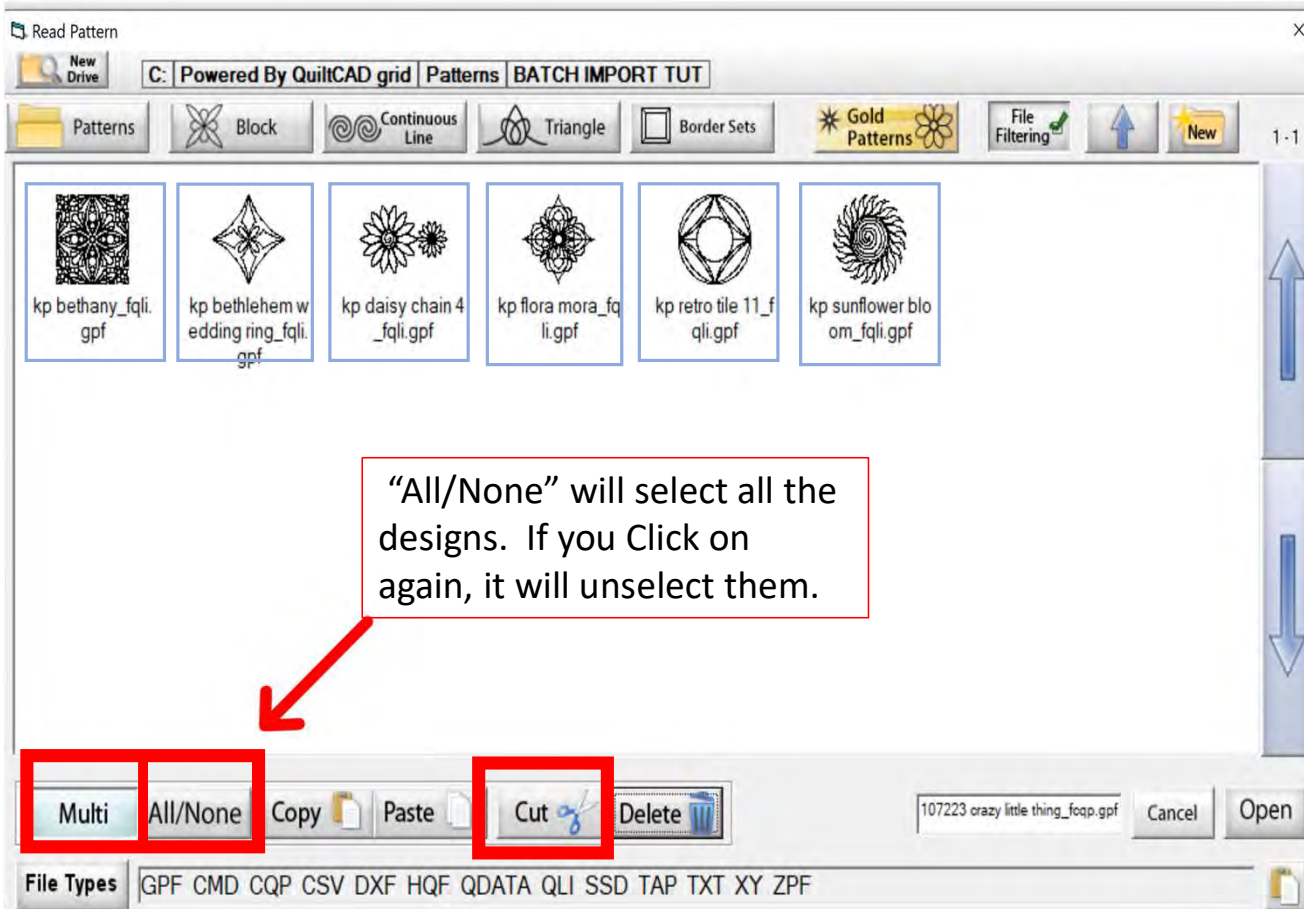

## Plug-Ins Batch Import continued. . .

Your new file folder is now ready for your new design(s). Click on the back arrow (top right) to find your batch folder and design(s). We will cut them out of our "Batch" folder and paste them into our new file folder.

## Plug-Ins Batch Import continued...

“All/None” will select all the designs. If you Click on again, it will unselect them.

Click on “Multi” and “All/None.” This allows you to select all the designs so we can cut and paste them all at the same time.

After selecting the design(s) you want in your new folder Click on “Cut.” The design(s) will disappear. Click on the back arrow (remember top right).

## Plug-Ins Batch Import continued. . .

When you are in your new file folder, Click on "Paste." Your design(s) will appear in the new folder.

Now you are ready to start quilting using your newly purchased design(s).

# Plug-Ins Batch Export

The screenshot shows the PantoStacker TM software interface. The main window displays a repeating pattern of blue and pink swirls. A 'Plugins' dialog box is open in the center, with the 'Export' button highlighted by a hand cursor. The 'Batch Import' button is also visible. The top toolbar includes 'Home', 'Select Pattern', 'Reset', and 'Plug-ins'. The bottom toolbar contains various settings and actions like 'Select Pattern', 'Panto Mode', 'Row Height', 'Pattern Width', 'Pattern Height', 'Total Width', 'Total Height', 'Select Row', 'Fit', 'Size', 'Move', 'Reset', 'Stagger', 'Flip', 'Rotate', 'Step', 'Medium', 'Place as a Single Pattern', and 'Sew in Zones'.

# Pantograph Power Panto Mode Read Panto

Open your saved Panto design Click on “Read Panto” find your panto you want to open and Click on “OPEN.”

The screenshot displays the PantoStacker TM software interface. At the top, there is a menu bar with 'Home', 'Select Pattern', and 'Plug-ins'. Below the menu bar is a toolbar with icons for Home, Select Pattern, Save, Undo, and Redo. The main workspace is divided into two panes: the left pane shows a small pattern labeled 'test file 3.pow', and the right pane shows a larger pattern labeled 'zone 1.pow'. A 'Read Power Panto' dialog box is open, showing a file list with 'zone 1.pow' selected. The dialog box has a 'File Name' field containing 'zone 1.pow' and 'Open' and 'Cancel' buttons. Below the dialog box is a 'Sizing' panel with 'Pattern Height' set to 0, 'Total Width' set to 60, and 'Total Height' set to 60. There is also a 'Spacing' panel with 'Vertical' and 'Horizontal' spacing set to 0. To the right of the dialog box is a 'Flip' panel with four icons. At the bottom right, there are two buttons: 'Place as a Single Pattern' and 'Sew in Zones'. A hand icon is pointing to the 'Open' button in the dialog box.

# Pantograph Power Panto Mode Show Safe Area

Without checking "Show Safe Area," uncheck, you cannot visually tell how large your panto design will be on your quilt.

"Safe Area" is your quiltable space on your quilt.

When "Show Safe Area" is checked, you will see a visual reference of how many rows will fit in your safe area.

# Pantograph Power Panto Mode Sizing

The image displays three screenshots of the PantoStacker TM software interface, illustrating the 'Sizing' controls for a quilt pattern. The central screenshot is the largest and most detailed, showing the pattern in the center and the control panel at the bottom. A pink arrow points from a text box to the 'Sizing' controls.

Use the "Sizing" (+) or (-) to scale your design larger (+) or smaller (-) on your quilt.

The control panel includes the following elements:

- Select Pattern** and **Read Panto** buttons.
- Panto Mode Power** and **Save Panto** buttons.
- Show Safe Area**
- Sew Thru Clipped**
- Sizing** section:
  - Pattern Height**: 5.918 (with a plus button)
  - Total Width**: 60
  - Total Height**: 60
  - Pattern Fitting**
- Spacing** section:
  - Vertical**: 0
  - Horizontal**: 0
- Flip X** button.
- Place as a Single Pattern** and **Sew in Zones** buttons.

# Pantograph Power Panto Mode Height

PantoStacker TM

Home Select Pattern Save Undo Redo Reset X Zoom Print Progress ? Help Options Resume Zone Sewing Session Plug-ins

Reducing the design height will add more rows of the design. Increasing the height will make fewer rows of the design.

The screenshot displays the PantoStacker TM software interface. At the top is a menu bar with icons for Home, Select Pattern, Save, Undo, Redo, Reset, X, Zoom, Print, Progress, Help, Options, Resume Zone Sewing Session, and Plug-ins. Below the menu bar is a large central area containing three pattern preview windows, each with its own control panel. The central window shows a pattern with 4.25 rows. The left window shows a pattern with 10 rows. The right window shows a pattern with 6.667 rows. Each window has a 'Sizing' and 'Spacing' control panel. The 'Sizing' panel includes 'Pattern Height', 'Total Width', and 'Total Height' controls. The 'Spacing' panel includes 'Vertical' and 'Horizontal' spacing controls. A 'Pattern Fitting' checkbox is also present at the bottom of the control panels.

Window	Pattern Height	Total Width	Total Height	Vertical Spacing	Horizontal Spacing
Left	10	60	60	0	0
Center	4.25	60	60	0	0
Right	6.667	60	60	0	0

Pattern Fitting

Flips every other row of the design vertically.

# Pantograph Power Panto Mode

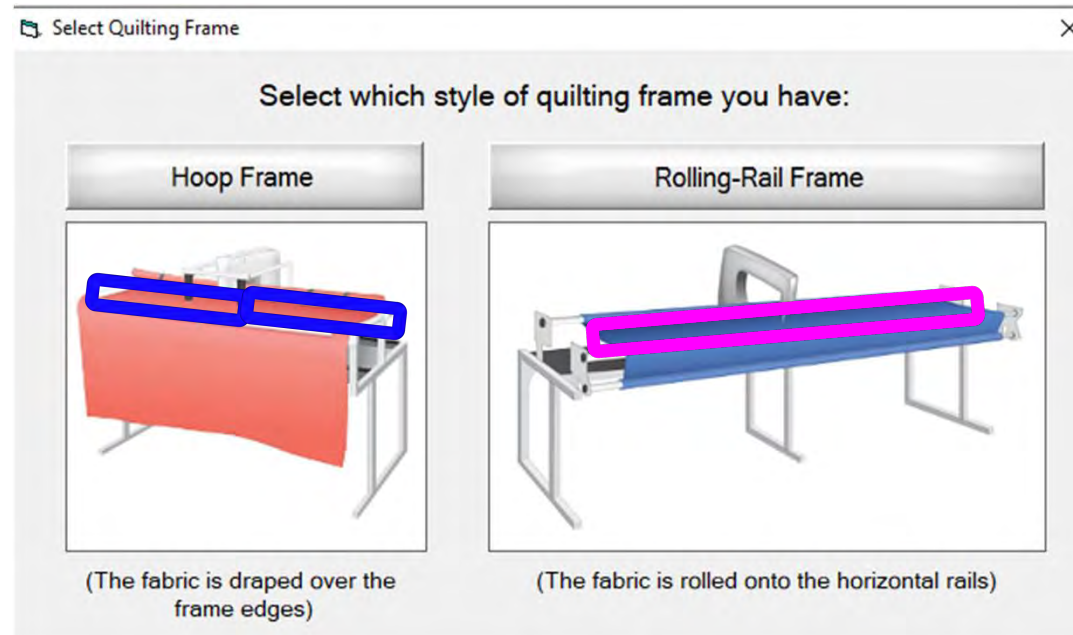

Quilting an Edge-to-Edge Design using  
“Power Panto” always choose:

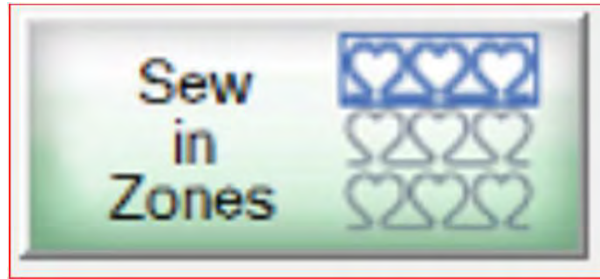

When quilting an edge-to-edge design using the “Power Panto Mode,” you would never want to “Place as a Single Pattern.” This mode is made to help you quickly quilt edge-to-edge. It fills in your design using your quilt size. With “Power Panto” you don’t need to determine how many designs will fit onto your quilt-does all the math for you. The only thing you do is choose the height you want your design to be. If you want to quilt a single pantograph, then go to the “Basic Mode” section of the help files to learn how to quilt your single pantograph.

# Pantograph Power Panto Mode

What is a “zone” in quilting? A “zone” is the section of the quilt that can be quilted within your frame without reposition or rolling your quilt. For example, if you own a hoop frame you may have 2 zones/sections going across your quilt and several zones/sections going down the quilt, because your quilt is wider and longer than your frame. On a rolling frame, a quilt is only one zone/section across but several zone/sections down.

Example hoop frame quilt "Zones"

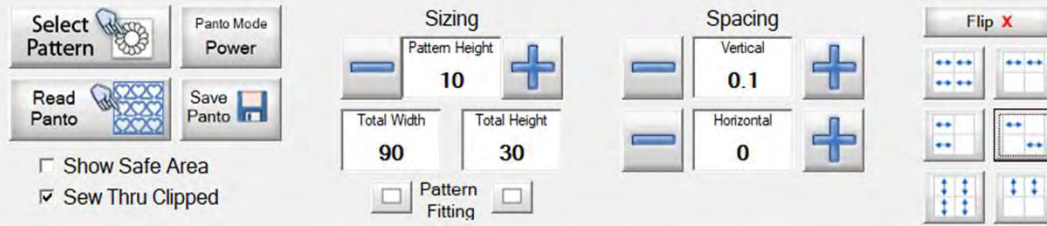

Example rolling frame quilt "Zones"

# Pantograph Power Panto Mode

Learn how to quilt an “edge-to-edge” design across your quilt. Click on “Sew in Zones.”

The control panel includes the following sections:

- Select Pattern:** A button with a gear icon.
- Panto Mode Power:** A button with a power icon.
- Read Panto:** A button with a hand icon.
- Save Panto:** A button with a floppy disk icon.
- Options:**  Show Safe Area,  Sew Thru Clipped.
- Sizing:** Pattern Height: 10, Total Width: 90, Total Height: 30. Includes minus and plus buttons for Pattern Height.
- Spacing:** Vertical: 0.1, Horizontal: 0. Includes minus and plus buttons for both.
- Flip X:** A button with a red 'X' icon.
- Grids:** A 3x2 grid of icons for pattern alignment.
- Sew in Zones:** A button with a quilt icon, highlighted with a pink box and a pink arrow pointing to it from above.

# Pantograph Power Panto Mode

Always save your design! You can delete it when you are finished quilting. Saving your design will allow you stop at the end of a zone, then start quilting again where you left off. Click on "YES" and you will be taken to the Auto-saved Zone Projects folder.

Would you like to save this Zone Sewing Session?  
(This is especially recommended for large projects that may not get finished in a single session.)

Yes

No

# Pantograph Power Panto Mode

This is the “Pantograph Sew in Zones” “Quilting Interface” screen. Here we will learn each button, and when to use them. Let’s start with the top tool bar. Since we already know how to save our pantograph design, we will start with “Settings.”

# Pantograph Power Panto Mode

1. EXIT the “Quilting Interface” screen and go back to “Pattern Placement” screen.
2. SAVES your pantograph design
3. SETTINGS: Open to change your sewing machine and QuiltMotion settings, such as stitches per inch, tie offs, and sewing speed.
4. SHOW TRIM allows you to see your trims lines.
5. OPTIMIZE allows you to connect sections of your pantograph design to make it a single design with no breaks.
6. Single Stitch allows you to make a “Single Stitch” while connected to the automation.
7. ZONE UTILS allows you to move, refresh, adjust end point and zone placement.
8. HELP allows you to access the help files, to get more detailed information about QuiltMotion/QCT software.
9. OPTIONS accesses the Preferences Menu.
10. PLUG-INS accesses the Marking Tool to help you place your design with precision and accuracy.

# Pantograph Power Panto Mode

SETTINGS - Change your sewing machine and QuiltMotion settings such as Stitches per inch, tie offs, and sewing speed.

Click to set sewing/automation speed to Slow, Medium or Fast.

Use the (+) to increase or (-) to decrease the stitch length.

Checking will automatically prompt pull your bobbin and pause at a trim line.

Pattern statistics shows you the height and width of your design and length you have quilted. It also counts your stitches as it is quilting and informs you how many trims you have on your design.

“Tie-Off mode” ties a knot to keep stitches in place. Choose between a small “micro stitch” or “back and forth” and set the number of tie off stitches desired to secure the beginning and end of your design.

Optimize

## Pantograph Power Panto Mode

This is the “Optimization” screen, which allows you to make the design you are quilting sew smoothly without stopping. Let me take you through the process of using these tools to optimize your design.

Optimize

# Pantograph Power Panto Mode

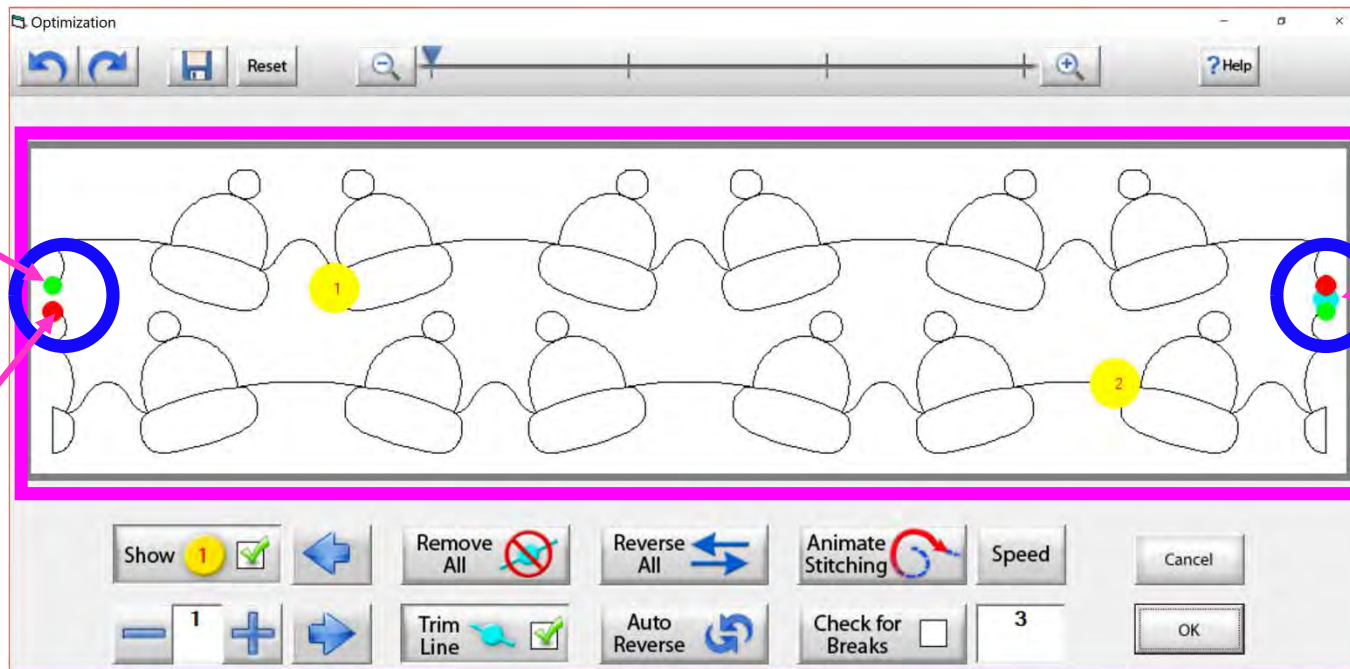

1. Undo - Undo last action on screen.
2. Redo - Reapply last undo.
3. Save - Save your pantograph design.
4. Reset - Resets pattern to its original state.
5. Zoom-in – Zooms in to make design larger.
6. Zoom-out – Zooms out to make it smaller.
7. Help - Opens this help file.

# Pantograph Power Panto Mode

Start sewing green  
Stop sewing Red

Here is a trim line. The blue dot indicates the designs has ended. It is not connected to the next design.

The optimization screen shows where your pantograph will start sewing (green dot) and where it will stop (red dot). It shows the direction the pantograph design will sew. The yellow dots show which section will sew first (1) and next (2). You will also see if there are trim lines (a trim line is a section of thread at the end of the design).

# Pantograph Power Panto Mode

- 1. Show Section Numbers** — Enables and Disables showing section numbers.
- 2. Move Section Numbers** — Moves the location of the section number on the pattern. This does not change the order of the pattern.
- 3. Remove All Trim Lines** — Removes all trim lines from the pattern and places a line that will be sewn in its spot.
- 4. Reverse All** — Reverse the sewing path of the entire selection.
- 5. Animate Stitching** — Will show the pattern being traced in the order that it will sew on the quilt.
- 6. Animation Speed** — Set the speed of the animated stitching.
- 7. Section Number** — When you set this to a section number, then tap on a section it will change that number to the one you want. This allows you to manually change each section number.
- 8. Show/Hide Trim Lines** — Enables and Disables trim lines from being shown.
- 9. Auto Reverse** — Will optimize the pattern automatically, in the reverse direction it started at.
- 10. Check for Breaks** — When enabled you will be prompted to remove trim lines during animated stitching.

Optimize

# Pantograph Power Panto Mode

Tap "OK" to accept the changes you have made to your design, or "CANCEL" to discard the changes and go back to the quilting interface screen.

Optimize

# Pantograph Power Panto Mode

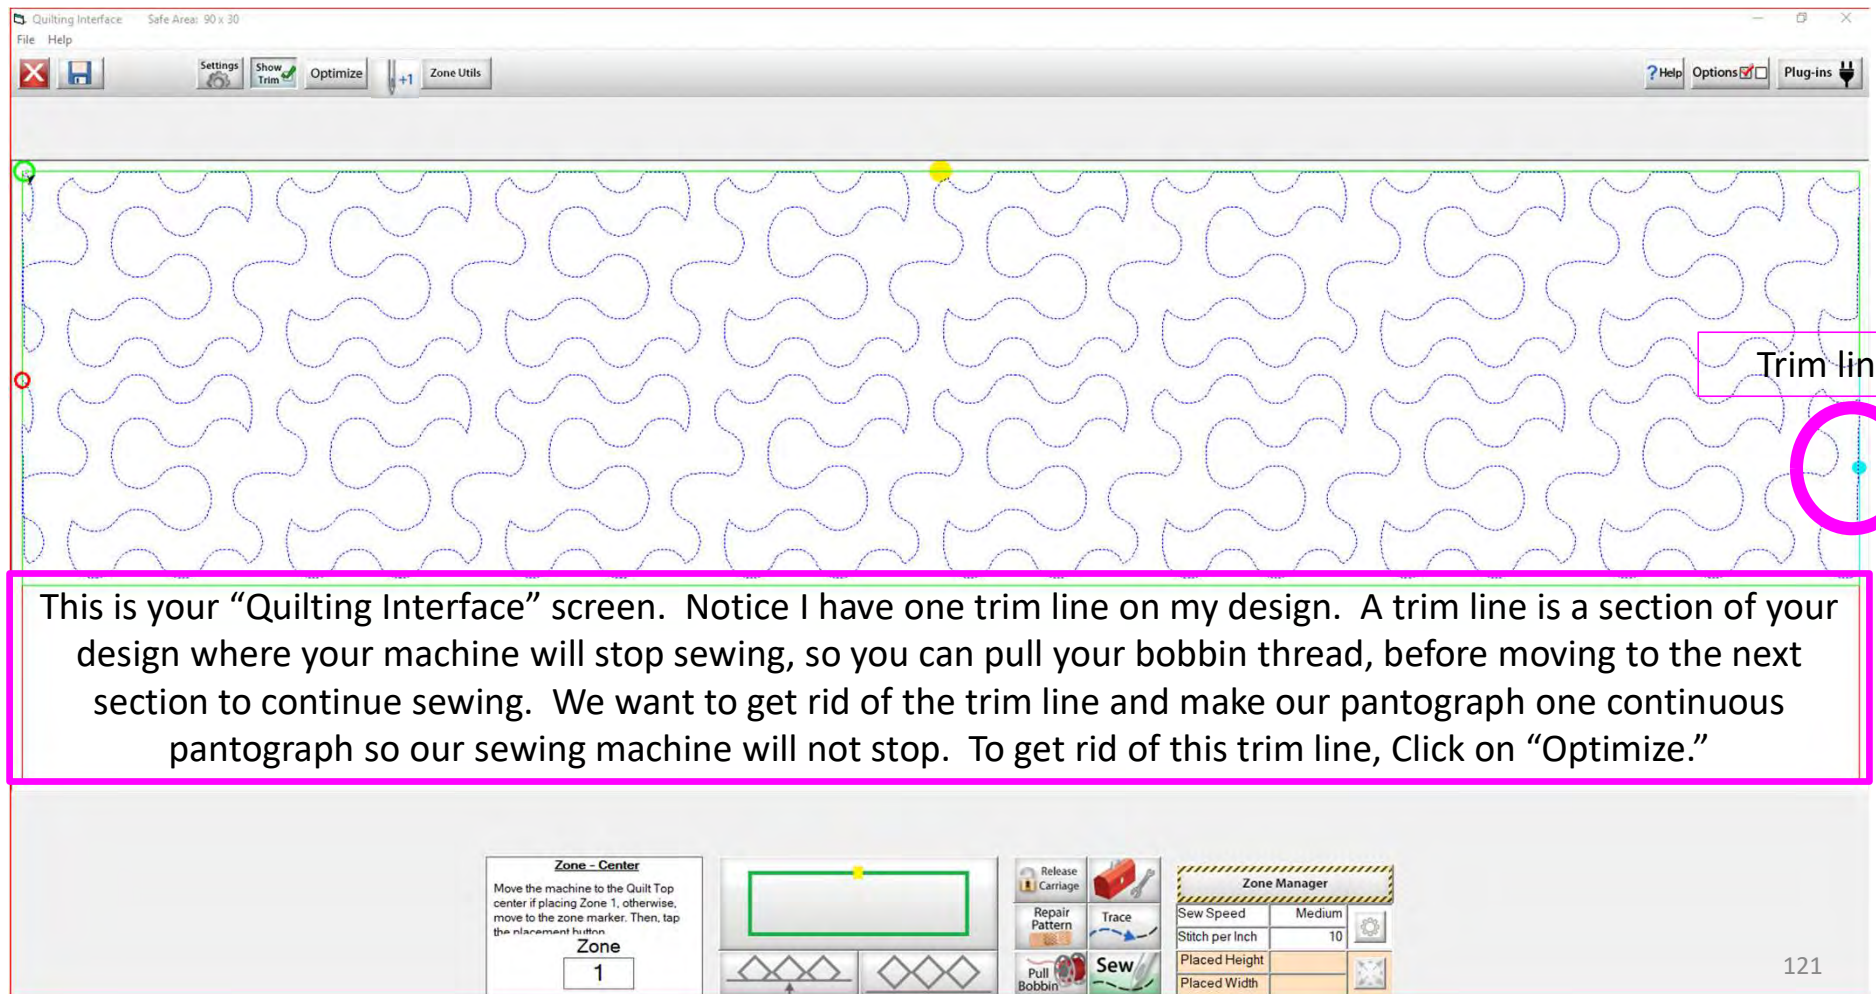

Select your design in your “PantoStacker” screen and make any adjustments you need to quilt your desired look. I adjusted the vertical spacing. Click on “Sew in Zones.”

# Pantograph Power Panto Mode

The screenshot shows the Optimization software interface. The main workspace displays a wavy pattern with several control points: a green circle at the top left labeled "Start point first section", a red circle at the top left labeled "End point section two", a red circle at the top right labeled "End point first section", a purple circle at the top right labeled "Trim line", and a green circle at the bottom right labeled "Start point section two". The toolbar at the bottom includes buttons for "Show", "Remove All", "Reverse All", "Animate Stitching", "Speed", "Cancel", "Trim Line", "Auto Reverse", "Check for Breaks", and "OK".

Let's get rid of that pesky old trim line. You can Click on "Remove All" to get rid of it with the Click of the button or you can Click on "Check for Breaks." While you are "Animating Stitching," it will stop the Animation and ask if you want to remove the break. Click on yes, and it will proceed to the next until your design is finished with the "Animate stitching."

Optimize

# Pantograph Power Panto Mode

The screenshot shows the Optimization software interface. The main window displays a pattern with two sections: a blue wavy pattern on top and a yellow wavy pattern on the bottom. A vertical trim line is positioned on the right side, separating the two sections. A dialog box titled "Pattern Break" is open in the center, asking "Do you wish to remove this break?" with "Yes", "No", and "Cancel" buttons. Red arrows point to various elements: "Start point first section" (green dot), "End point section two" (red dot), "End point first section" (red dot), "Trim line" (cyan line), and "Start point section two" (green dot). The software interface includes a toolbar at the top with icons for undo, redo, save, reset, search, and help. The bottom toolbar contains buttons for "Show", "Remove All", "Reverse All", "Animate Stitching", "Speed", "Cancel", "Trim Line", "Auto Reverse", "Check for Breaks", and "OK".

Notice that it stopped the animation sewing process when it came to a trim line. It is also a break in the design. The screen popped up to ask if I want to remove this break. I do so Click on "yes" and it will remove that trim line break.

Start point first section

End point section two

End point first section

Trim line

Start point section two

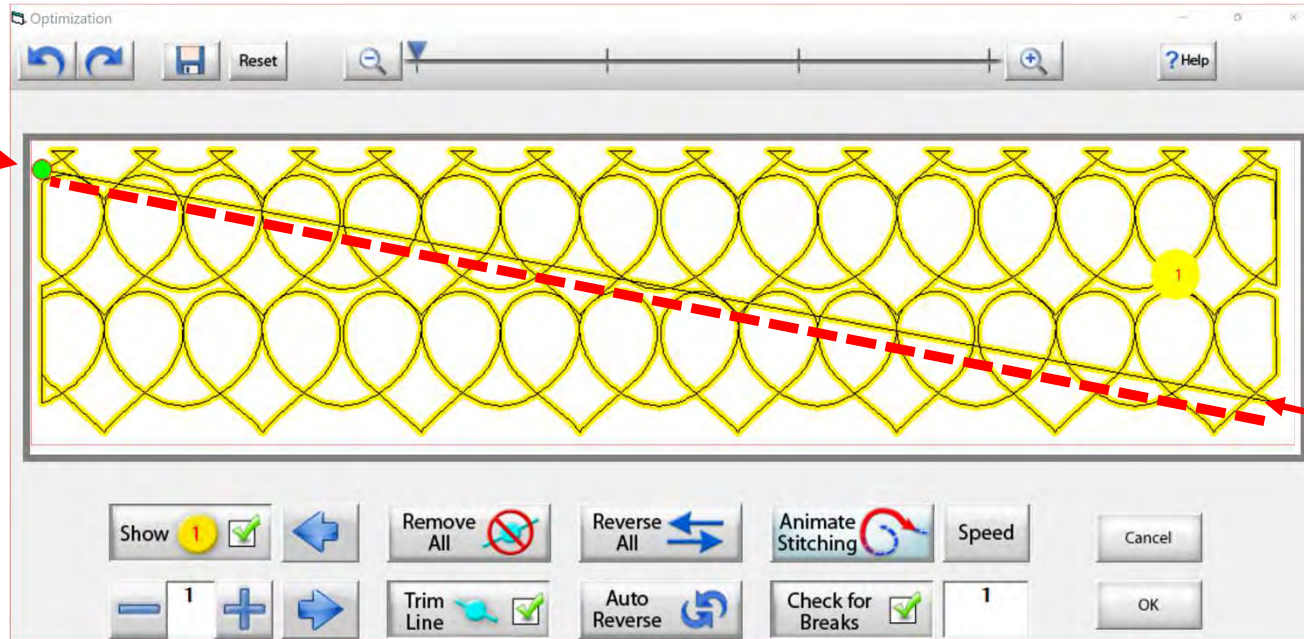

At the end of you design another screen will pop up asking “Do you wish to connect the first and last points,” meaning the start point of your first section and the end point of your last section. I always click on NO. With this design it would not hurt-your connection line would be on the edge of the design.

Optimize

# Pantograph Power Panto Mode

Start point

End point

On some patterns, connecting the first and last point would be disastrous. For example, look at the hearts design above, notice what happens when I say yes to connect the first and last point. It will sew across your design to connect.

Optimize

# Pantograph Power Panto Mode

Start point

End point

Now that we have changed the pantograph design and how it will sew, you can see there are no breaks or trims on the design, you only have one "start point" and one "end point." Play around in simulation mode and get to know how to use the optimization better.

Zone Utils

# Pantograph Power Panto Mode

“Zone Utils” are zoning tools to help you place and adjust your pantograph.

Use the “Zone Utils” to:

1. Move to Next Zone
2. Refresh your Zone
3. Move to Previous Row in Zone
4. Move to Next Row in Zone
5. End Point Adjust
6. Back to Zone Placement Screen

Zone Utils

# Pantograph Power Panto Mode

Next Zone

“Next Zone” moves your machine to the next zone placement to mark before rolling your quilt.

The screenshot shows a quilting software interface. At the top, there is a 'Zone Utils' button. Below it is a 'Next Zone' button with a blue arrow. The main area displays a quilt design with a repeating pattern of stylized figures. A black L-shaped marker is positioned on the quilt. Two red circles highlight specific points: one on a yellow dot labeled 'Placement for zone 1' and another on a yellow dot labeled 'Placement for zone 2'. A 'Mark Next Zone' dialog box is open at the bottom, showing a 'Marking Method' dropdown set to '+1 Single Stitch', a '1 inch' scale bar, a red L-shaped marker labeled '2A', and 'Cancel' and 'Continue' buttons. On the right side, a 'Thread Manager' panel shows 'Medium' and '10'.

To mark the placement of your design on your physical quilt, you can use tape, stickers or you can have your machine sew an “L” shape. We will learn how to mark our zones to advance our quilt a bit later.

# Pantograph Power Panto Mode

Zone Utils

Next Zone

“Next Zone” moves your machine to the next zone placement to mark before rolling your quilt.

Why do we need to mark our placement? Marking our placement creates a point of reference to place our next section of pantograph onto the quilt.

Zone Utils

# Pantograph Power Panto Mode

Refresh Zone

“Refresh Zone” will refresh your screen to show any changes made to your zone.

Previous Row

“Previous Row” will move you up to the previous row you just quilted.

Next Row

“Next Row” moves you down to the next row that needs to be quilted.

Zone Utils

# Pantograph Power Panto Mode

End Point Adjust

“End Point Adjust” helps you refine your end points to match up before proceeding to the next zone. This is very helpful when you are quilting on a Hoop style frame.

Motor Port: 0

Engages and disengages the carriage motors.

Reads and displays the encoders' positions.

Moves the carriage, then reads and displays the motor and encoder positions.

Runs test to sew a small rectangle.

This Self Test tool performs simple tests to check if the motors, encoders, and sewing is working.

Starts running the selected tests for how many cycles are selected.

Stops the running of the tests (if the cycles are not done)

Selects how many times to run the motion tests below:

- Y: Tests moving the machine forward and back.
- X: Tests moving the machine to the right and left.
- Perimeter: Moves the machine around the Safe Area
- Criss-Cross - Moves the machine across the Safe Area diagonals.

# Pantograph Power Panto Mode

Turn back to page 33 to learn about options.

The Preferences dialog box is divided into several sections:

- QuiltCAD:** Includes color selection for Line Color (dark red), Selected Cell Color (light blue), and Active Cell Color (white). A Defaults button is at the bottom.
- PatternCAD:** Includes color selection for Lines (dark red), Trim (cyan), Nodes (red), Bottom (purple), Handles (blue), Grid (light blue), and Mirrors (green). A Defaults button is at the bottom.
- Print/Export:** Includes Line Color (black), Trim Line Color (cyan), Continuous Lines (checkbox), Line Width (dropdown set to 1), Handle Size (dropdown set to Large), and a Defaults button.
- Quilting Interface:** Includes Show Grid (checkbox), Remove clipped fragments (checkbox), Show Zone Marking Hints (checkbox with checkmark), Close Trims (checkbox with checkmark and value 0.2), Sew Thru Safe Area Clipping (checkbox with checkmark), and Mark Next Zone Tool Enabled (checkbox with checkmark).
- PantoStacker:** Includes Show Grid (checkbox), Quick Exit (checkbox), Cancel, and OK buttons.

## Pantograph Power Panto Mode

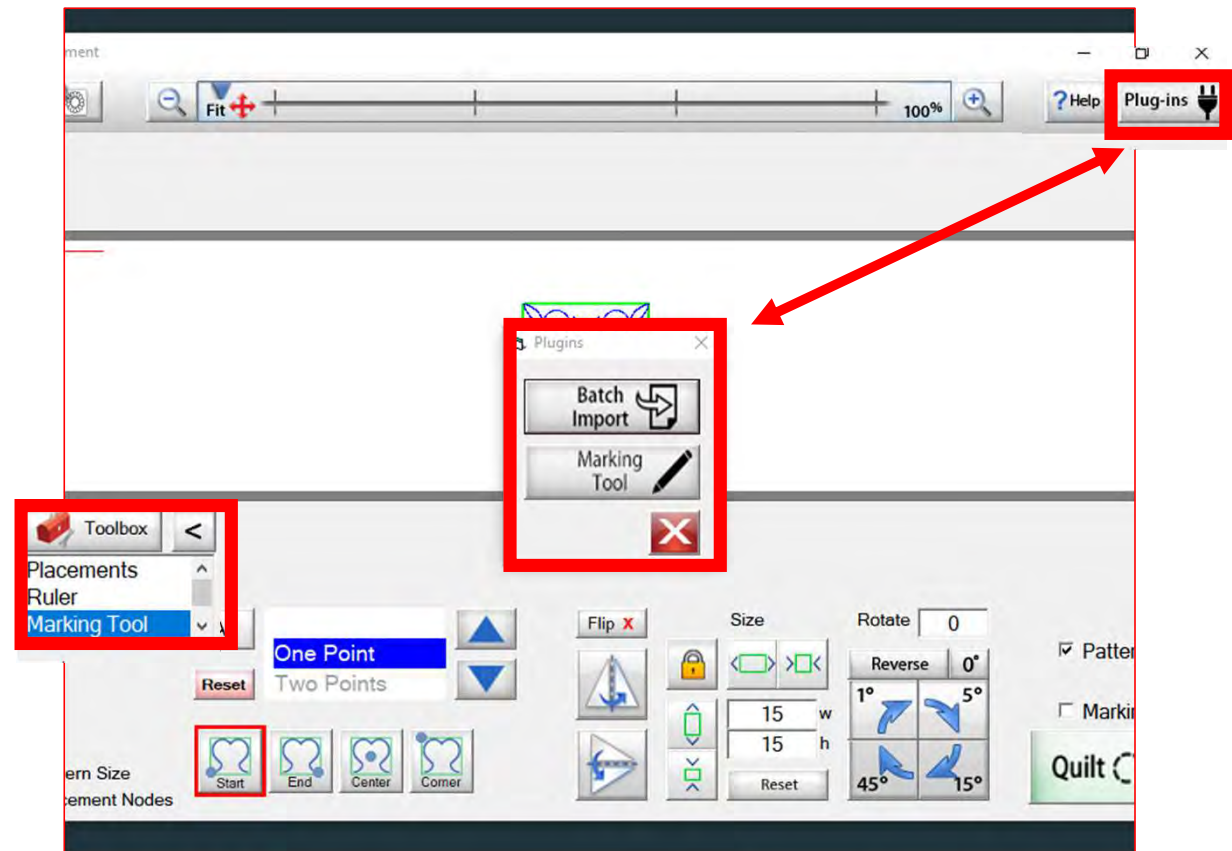

The “Marking Tool” is one of the best tools to use when placing a design onto your quilt. With the “Marking Tool” you can reference start points and endpoints on the design which enables you to connect to the next design and make it look like one seamless pantograph design. Discover how to use the “Marking Tool.”

# Marking tool

You can find this awesome feature a couple of places on your screen.

1. The Plug-ins button/icon is at the top right corner of your screen.
2. Inside the Toolbox on the Power Placement screen for Select & Sew.

Explore how the marking tool will help you place your design precisely inside your block using the marking tool.

## Marking tool continued. . .

Quilt block with design placement outside of block.

Quilt block with new placement of design inside the block.

Marking tool helps you draw around your block so you can see on your tablet screen how well you placed your design on your block.

# Marking tool continued...

Quilt Block

Move machine to first marking point and Click "Add +" button

"Add +"

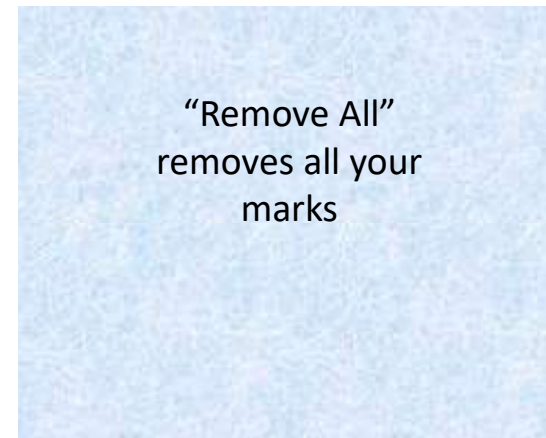

"Add +"

## Marking tool continued...

“Remove Last”  
removes  
previous mark

“Remove All”  
removes all your  
marks

## Marking tool continued. . .

## Marking tool continued...

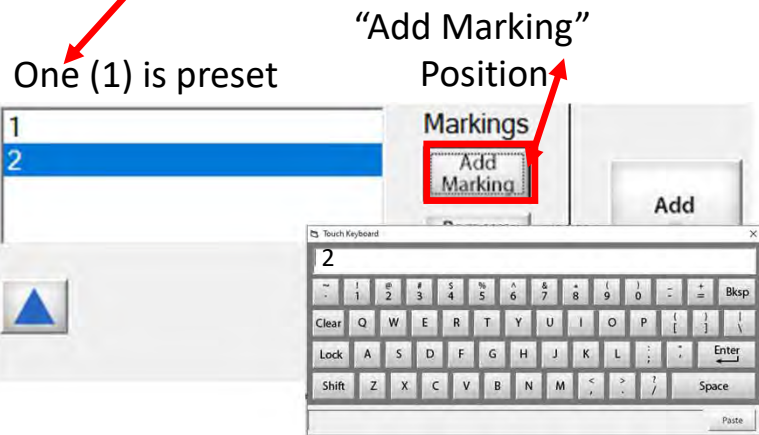

“Markings” will place “Marks” not lines around your block (—)

Quilt Block

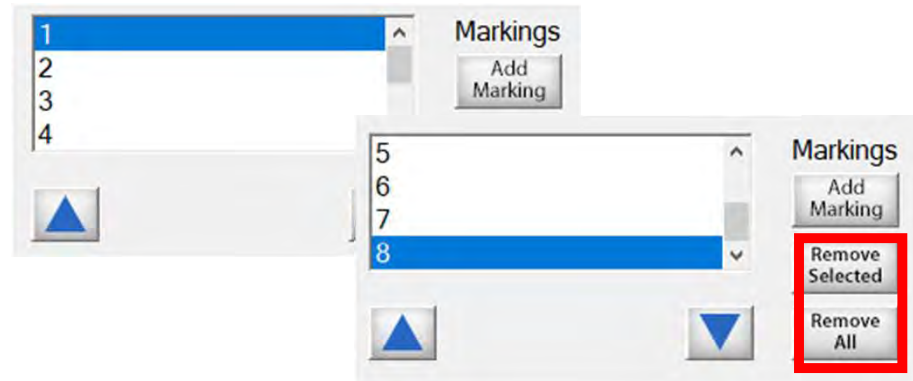

Decide how many placement marks you would like around your block for demonstration I have chosen 8

## Marking tool continued. . . Add mark (—) markings around your block

Add mark 2 and so on click on “Add Marking” button the “Touch Keypad” will appear, type the number 2 and select enter.

“Remove Selected”  
or  
“Remove All”

Continue until you have all your placement marking positions added. (remember I chose 8 positions.)

## Marking tool continued. . . Add mark (—) markings around your block

1. Use the arrows to find current position you want to mark.
2. Move your machine to that position on your block.
3. Click on "Add +" button to add marks.

Let's place some marks around our block!

## Marking tool continued. . . Add mark (—) markings around your block

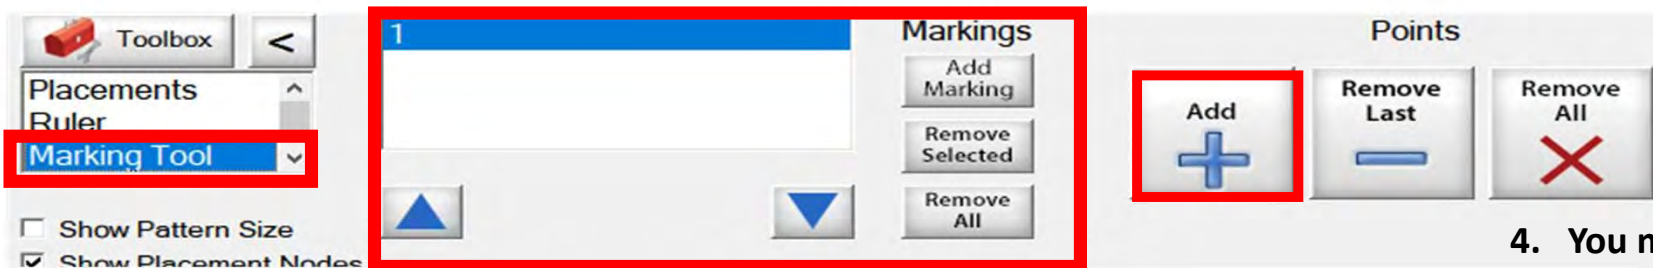

**1. "Markings"**  
Position 1 first mark, use arrow tabs or tap on each position.

**2. Move machine to position 1 on your block.**  
You must be on what ever position you are placing in the placement marking screen.

**3. Click on "Add +" button to add mark.**

## Marking tool continued. . . Add mark (—) markings around your block

4. You must change the marking position to (3) before you can move machine and click "Add +" to place the next mark and sew fourth.

1. Tap on position (2) or scroll down using arrow to move to the new marking position on the screen.

2. Move machine to position 2 on your quilt block.

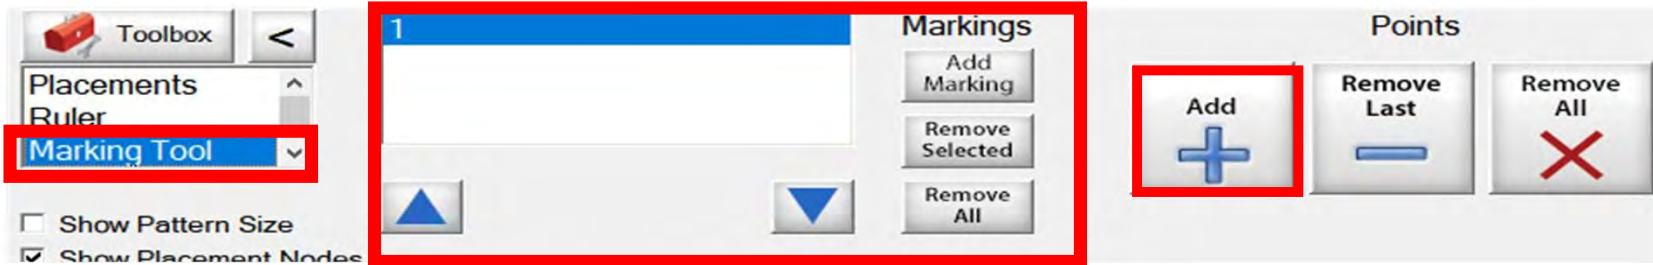

3. Click on "Add +" button to add mark.

## Marking tool continued. . . Add mark (—) markings around your block

markings  
design is  
now placed  
inside  
the block.

## Marking tool continued. . . Add mark ( ) markings around your block

\*I moved my machine to center of my block tapped on the center node of design to place design inside my (8) marks around my block.

Center node

\*Notice the design will quilt outside my block

Screen shot of “Markings” to place your design inside the block, so it won’t sew outside your block seams boundary. . .

## Marking tool continued. . . Add mark (—) markings around your block

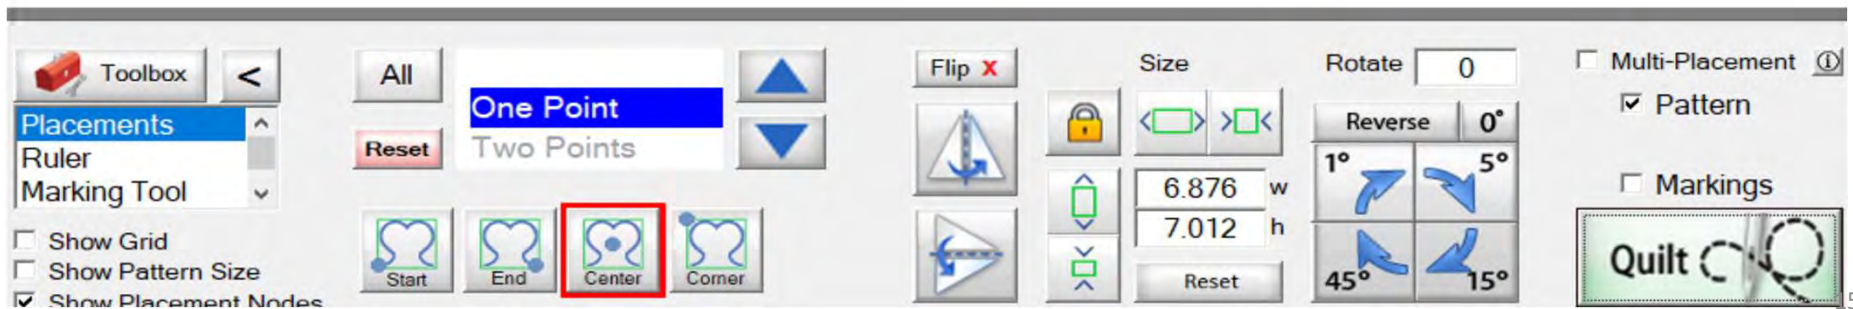

Change from  
"Marking Tool" in  
Toolbox to  
"Placement"

Change to  
"One Point"  
"Center" placement

Place design in the center of your block using the placement node. Notice it is just outside the block, use the "Center Placement Node" along with the "Size". You will want to keep it locked to have it size in proportion. Size it in if to large or size it out if to small. Make the adjustments to get the right size and fit.

# Marking tool continued. • • Add mark ( ) markings around your block

## CHOOSING A PLACEMENT METHOD

Let me show when to “PLACE AS A SINGLE PATTERN”  
and when to “SEW IN ZONES.”

VS

Place as  
a Single  
Pattern

Use "Place as a Single Pattern" if you are quilting a Border, Border sashing, or a block you have on your quilt that you want to put a pantograph design in.

PANTOGRAPH  
SEWED ACROSS  
SEVERAL BLOCKS

SASHING PANTOGRAPH

BORDER PANTOGRAPH

“Sew in Zones” is the perfect method for quilting an “edge-to-edge” pantograph. The “Zone” is the section of the quilt on the top of the frame available for quilting without rolling or repositioning the quilt. On a rolling frame, your zones are from top to bottom determined by the width of your quilt and throat of your machine. Smaller machines will not quilt as far down as a longer throat, so this will increase the amount of zones you will quilt.

Rolling frame with small throat machine has more zones

Rolling frame with longer throat machine has fewer zones

On a hoop-style frame, a full-sized quilt will have more “Zones” than it would on a rolling frame. With the hoop frame, you shift your quilt side-to-side and roll it up to move down your quilt. Depth of the quilt zone is still determined by the machine throat size; the smaller the throat, the greater number of zones.

Hoop frame quilt “Zones”

Rolling frame quilt “Zones”

This is an edge-to-edge quilt. The same design is repeated across the entire quilt.

Rolling frame quilt "Zones"
