

Quilter's Creative Touch 4

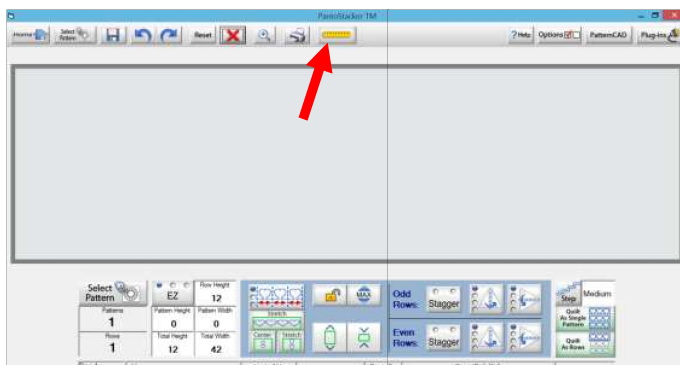

STANDARD

Measurements in QCT4

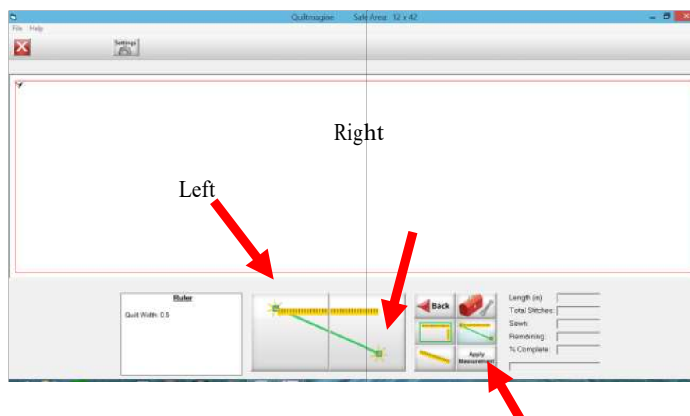

There's a great feature within QCT4 that I use on every single quilt, often in multiple ways. So for starters open QCT4 select the Pantograph button – following the prompts on your screen and set the safe area.

Now you are in the PantoStacker TM screen.

Look at the top of the Screen and you Will see a yellow IconOf a ruler.Select And we have a screen Which allows us To measure our quilts.

Quilter's Creative Touch⁴

STANDARD

It's easy to use, simply move the machine to your first measurement, say upper left corner of the quilt top, and select to register, then move to the right-hand top corner of the quilt and select to register. Then to register this measurement we need to select **Apply measurement**.

You will note that it puts the measurement in the total Height and /or total width on the Pantostacker. Why is this so great? Well we have 3 ways in which we can measure something. Select the Block Icon and a rectangle appears, this allows us to measure both the height and width of a block and apply measurement. Length icon gives us a straight line, which we can apply measurement, and the Width icon will give you a diagonal line to apply measurements to. You are able to toggle between all features.

Always remember once you have measured something simply select **Apply Measurement**

What's great about this? Well, it means that when you do panto's you can decide where you want to start and finish on the quilt to. I always like to add at least 2' inches to my measurements that I did in the beginning with my measuring tape. So instead, I simply use the measuring tape Icon and select where I want the panto to start and finish on my quilt top.

This is a great tool for using in sashings, and borders of quilts.
