Innovative Quilting Leaders For 30 Years

The Grace Company consistently generates new and exciting ideas in product design, and is always on the rise in excellence and quality. With the release of the **Q'nique 14+**, the Grace Company revolutionized a new segment of the quilting industry, bringing professional features to quilting enthusiasts at an affordable price.

Now, with the release of the **Q'nique 21 Longarm**, every product made continues its focus on the customer by employing quality, comfort, and convenience at every level. Like the Grace Company itself, quality is at the heart of the Q'nique quilting machine line of products.

For over 30 wonderful years, The Grace Company continues in the tradition of creativity, innovation, and service.

Q'nique 21

*The Professional Features You Want
At A Price You Will Love*

The Q'nique 21 offers a level of quality in precision stitching, user-friendly features, and designed engineering never available before in such an affordable package.

*A Value That Will
Revolutionize The
Longarm Market*

Superior Stitching

The Q'nique 21 features a powerful motor, delivering up to 1,800 stitches-per-minute.

It also includes a built-in stitch regulation (a high-end feature normally found only on more expensive long-arm quilting machines.) The Q'nique 21 has been precisely encoded for a beautiful, consistent stitch. Stitch regulation is available on three of the four different stitch modes to give you maximum control over your quilting.

High-Resolution Encoders

High-resolution encoders precisely track the machine's movement and tell the motor how fast or slow to stitch.

1,800 Stitches Per Minute

The Q'nique 21 features a powerful motor, delivering a smooth stitching experience with a top speed of 1,800 stitches-per-minute.

Precise Mode:

In "precise" mode, you control the stitch per inch (SPI) setting for consistently sized stitches. Stitch regulation adjusts the stitch speed as you quilt faster or slower. Precise Mode stops stitching when you stop moving the machine.

Cruise Mode:

In "cruise" mode, you set the SPI as well as a minimum stitch speed. Regulation adjusts to keep stitches consistent, but whenever you stop or slow your movements, the machine will continue to stitch at the minimum set speed.

Manual Mode:

The "Manual" stitch mode lets you control the stitch speed of the quilting machine. With the buttons on the handle bars, you can increase or decrease the constant speed. This is great for detailed or intricate stitching.

Baste Mode:

"Baste" mode is perfect for when you want to do some long basting stitches on the edges of your quilt. You can set the basting stitch length to short, medium or long.

*Built-In
Stitch Regulation
For Beautifully
Consistent Stitches*

Powerful
Increased Stitching Speed

Get More Done With More Space

The Q'nique 21 features 21 inches of throat space from the needle to the back of the work area. This extended work area gives you the freedom to quilt larger patterns and blocks.

Standard Size Block

Q'nique¹⁴⁺ Size Block

Q'nique²¹ Size Block

The Latest Quilting Technology

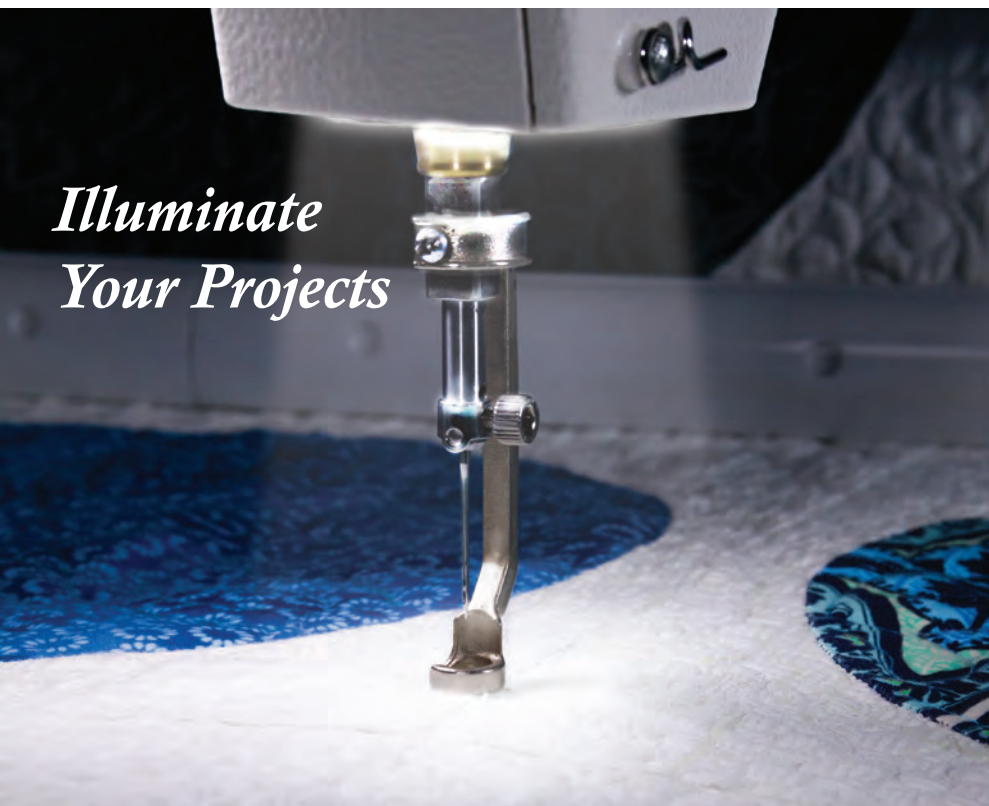

The Q'nique 21 uses cutting edge technology for all of the professional quilting features you'd expect in a longarm. Yet the quilting machine has been designed to be as quilter-friendly and easy to use as possible.

A bright, full-colored OLED screen conveniently displays all of the current quilting machine settings and menus.

Vivid Full Color OLED Screen

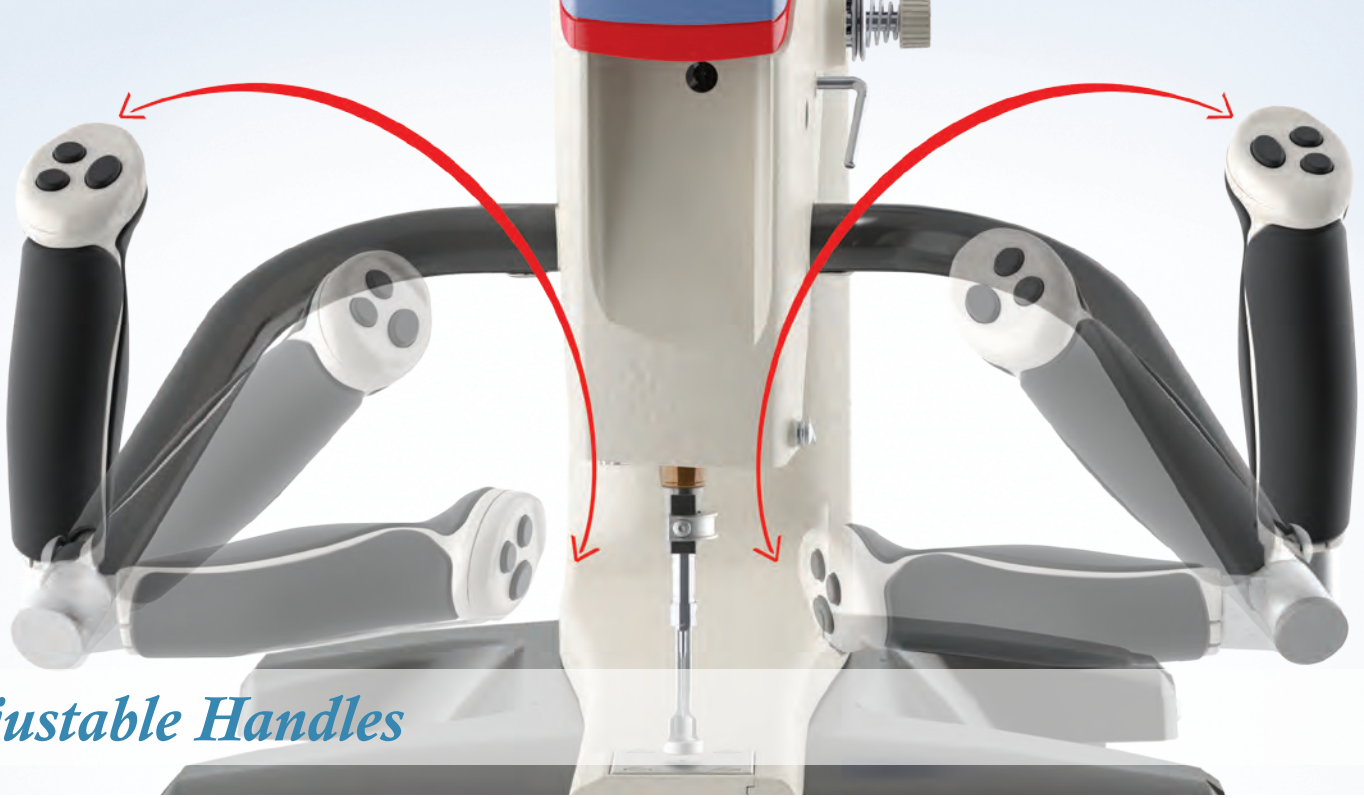

Illuminate Your Projects

Integrated LED Work Lights

The Q'nique 21 features high-powered LED work lights to illuminate your stitching and reduce eye-strain while quilting.

You'll love being able to clearly see each stitch defined with color-accurate, day-light balanced lighting.

Adjustable Handles

Full Control, Right At Your Fingertips

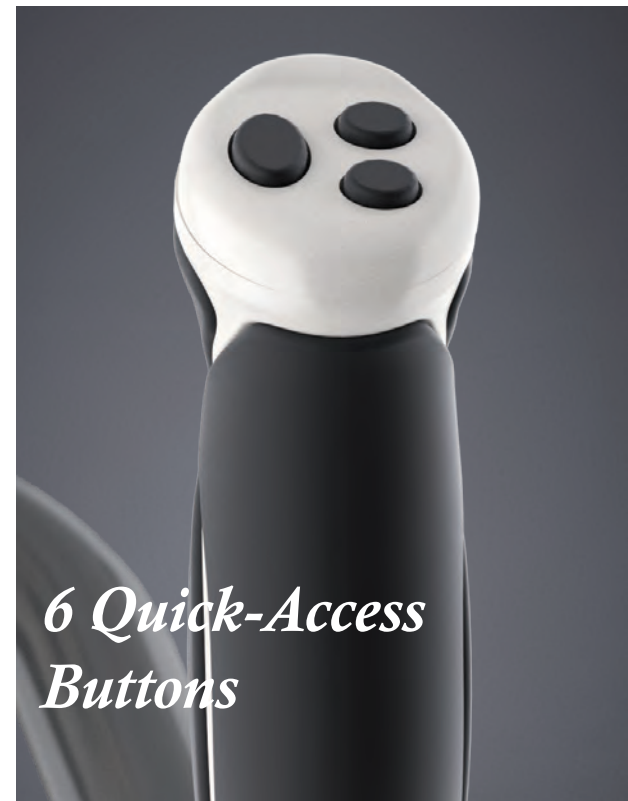

The handles are the number one way you interact with your sewing machine, so we designed the handles on the Q'nique 21 to give you the best quilting experience possible.

All major functions and settings can be controlled right from the handles and easily navigated using the full-color display.

The handles have been designed with a **comfort grip**, following the contours and curves of your hand. The soft ergonomic handles relieve stress on the hands, letting you quilt for an extended period of time.

The handles of Q'nique 21 adjust to the most comfortable position, so you can quilt in the way that feels most natural. The handles can also be rotated down to a "**micro-handle**" position for precise control over fine stitching and stippling.

All the quilting functions of the machine can be controlled easily right from the handles with the push of a button.

Positionable Hopping Foot

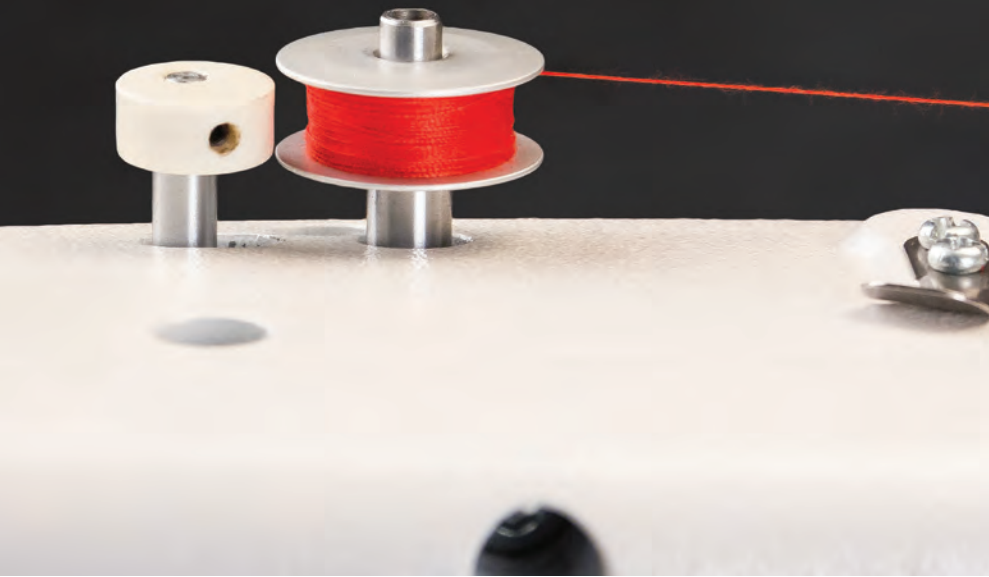

Never-Before Seen Features

The Q'nique 21 introduces some innovative new features to the quilting industry. The Grace Company has been listening to what quilters have to say about quilting and their desired features. Every aspect of the Q'nique 21 has been carefully designed to add convenience and heighten the quality of the machine, of the stitch, and of the entire quilting experience.

The patented hopping foot of the Q'nique 21 can be positioned for optimum visibility of the needle. Easily switch the hopping foot to either the side or the back of the needle according to your preference.

Automatic Bobbin Winder

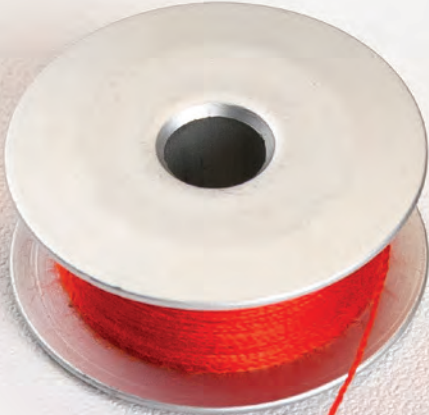

The Grace Q'nique machines features a **top-of-the-line bobbin system**, including a large M-class bobbin that is larger than standard domestic sewing machine bobbins, allowing you to quilt longer before having to refill it.

A high-speed **automatic bobbin winder** is built right into the machine. This makes refilling the bobbin a breeze! Just use the thread from one of the thread towers. The bobbin winder even shuts off automatically when the bobbin is full!

Multiple accessories can be powered directly from the machine with these convenient access ports.

Large M-Class Bobbin

Q'nique Bobbin

Standard Bobbin

Additional Accessory Ports

Accessories

Ruler Base

Use quilting rulers, guides, and templates with your Q'nique 21 by adding this ruler base to your quilting machine. It adds a level, sturdy extension to the base of your quilting machine when using a quilting frame. The ruler base is very easy to attach and remove.

Laser Stylus

The Q'nique Laser Stylus is the easiest way to trace patterns or pantographs while quilting on a machine quilting frame. Just attach the laser stylus to the Q'nique 21, and position it to trace the desired pattern! The laser can be attached to the front or rear handles, or even on the bottom of the machine, using the included adapter between the wheels.

Rear Handles

Double the ways you can quilt with your Q'nique 21 by adding rear handles! These let you work from the back of the machine on a quilting frame, and are a must-have item if you wish to follow pantograph patterns or the Plastic Pattern Perfect™ templates from the back of the quilting machine.

Continuum Frame

The Continuum Frame

The perfect companion to the Q'nique 21

The new **Continuum** Quilting Frame has been designed by the Grace Company to perfectly accommodate the Q'nique 21 machine. With steel and cast-alloy components, the frame is one of the sturdiest and longest-lasting frames ever designed. This modular frame has many available configurations and accessories. This is a no-baste frame designed to make your quilting projects easier, more convenient, and more beautiful. The frame is available in standard 8' or 10' packages with the machine.

Continuum Features

- Available in 8' queen or 10' king
- Expandable with optional extension
- Channel locks for easy straight lines
- Optional idler rail available
- Made from sturdy steel and cast-alloy
- Steel fabric rails
- Included leveling feet
- SureTrack Pro Dual-Wheel System

Optional Frame Accessories

Fourth Rail For Batting

2 Foot Extension

SureTrack Carriage System

The Grace Company has always been known for the smooth-gliding carriage and track systems of their quilting frames and machines.

The SureTrack Carriage System features a dual-wheel design that enhances stitch quality, accuracy, and carriage motion. The SureTrack gives you more control of fine, detailed stitching.

Q'nique 14+

The Grace Company set out to make the perfect mid-arm quilting machine for the quilting enthusiast. All of the high-end long-arm features that quilters were looking for were carefully crafted into a truly affordable quilting machine.

Many of the features found in the Q'nique 21 are also shared by the The Q'nique 14+ in a smaller mid-arm package.

Comfort-Grip Handles With 6 Quick-Access Buttons

Q'nique 14+ Accessories

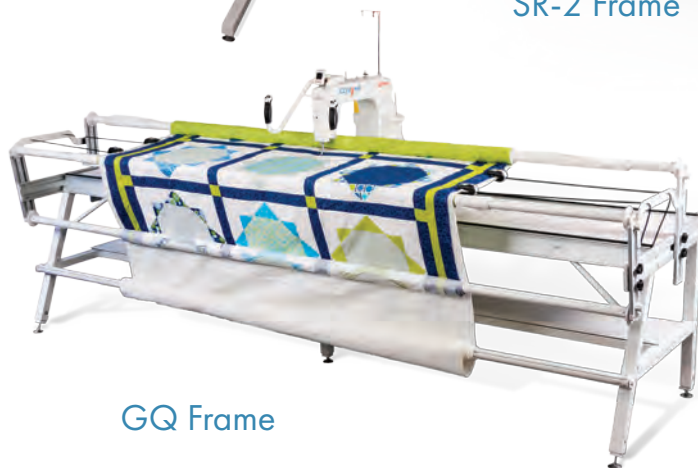

Perfectly Paired With A Quilting Frame

Q'nique 14+ Frame

SR-2 Frame

GQ Frame

The Q'nique 14+ quilting machine is designed to work seamlessly with many great quilting frames on the market for the ultimate quilting experience. The integrated steel wheels of the machine provide a smooth motion that is easily controlled with a light touch. When working from a quilting frame, you can quilt from the front or back using the optional rear handles.

Quilting with a stand-up quilting frame lets you “draw” with your stitches, creating beautiful designs with free-motion quilting. The Q'nique 14+ is also compatible with **Quilter's Creative Touch**, an automated quilting software which lets you design your patterns digitally, and then lets the machine take over to do the quilting automatically!

Frame Compatibility List

Already own a quilting frame? The Q'nique 14+ machine will work with many existing frames. When you buy a Q'nique 14+, specify which frame you'd like to use it on, and it will come with everything you need to make your machine and frame completely compatible.

Q'nique 14+ Frame

Q'nique 14+ Quilting Frame

The perfect companion to the Q'nique 14+

The Q'nique 14+ Quilting Frame was built specifically as a companion to the Q'nique 14+ machine. The frame has been made easy to assemble, and easy to load with your quilt layers. This is a no-baste frame designed to make your quilting projects easier, more convenient, and more beautiful.

Q'nique 14+ Quilting Frame Features

- Sets up in sizes: King or crib
- Frame length: 66 to 126 inches
- Quilt sizes up to: 104 inches
- Frame material: Steel and cast-alloy
- Rail material: Steel
- Leveling Feet: Included
- Track type: Dual-wheel (For improved carriage motion)
- Optional Accessory: Fourth rail for batting

Included Leveling Feet

You must be sure your stand-up frame is level so that the machine won't slide one way or the other. These adjustable feet make leveling your frame easy!

SureTrack Dual-Wheel System

The SureTrack dual-wheel system provides the feel of a smooth gliding carriage as you quilt.

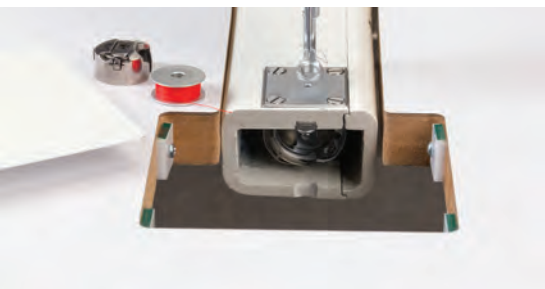

Q'nique 14+ Sit Down Table

Q'nique 14+ Sit-Down Table

For the home quilter

Get all the professional features of the Q'nique 14+ while free-motion quilting from the comfort of your favorite chair. The space-saving sit-down table is perfect for smaller quilting rooms, and still gives you the advantage of a full 15" throat length. High-quality craftsmanship and welded steel legs provide for enhanced stability.

Easy Bobbin Changes

The needle plate in the sit-down table gives you direct access to your bobbin for easy changes and adjustments.

Leveling Feet System

Both the sit-down table and the sit-down version of the quilting machine include easily adjustable leveling feet.

Multi-Function Foot Pedal

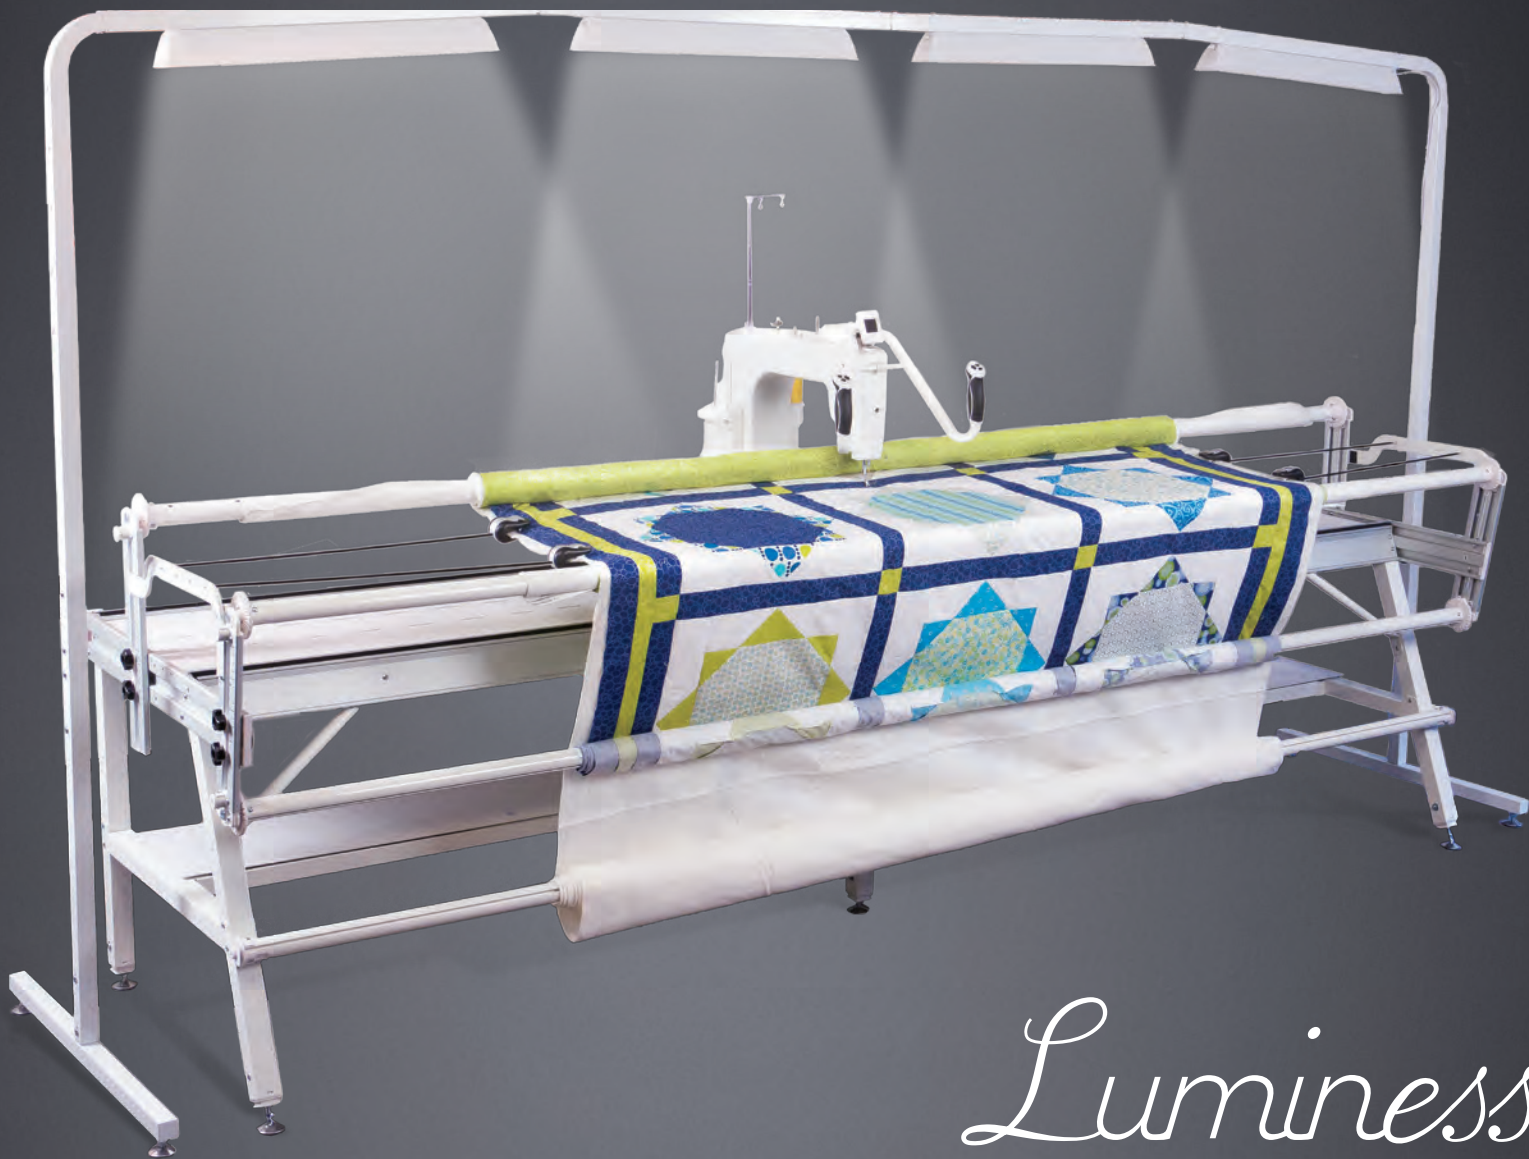

Triple Functionality:

The sit-down version of the Q'nique 14+ includes a multi-function foot pedal. Besides controlling the stitching speed, you can press the "back kick" button to raise or lower the needle. You can even change the default needle stop position by holding the back kick down for three seconds.

FRAME CONVERSION KIT

After purchasing the Q'nique 14+ and sit-down table, the machine can be updated with a conversion kit at any time for use on a quilting frame.

Other Accessories

Luminess

Free-Standing Light Station

The Luminess features a special **True Color** balanced lighting system that's perfect for artists and crafters who need to see their colors accurately. The True Color lights also reduce glare and soften shadows, while enhancing details and textures. The low-wattage bulbs also produce more light while consuming less power, and putting off less heat than standard lighting systems.

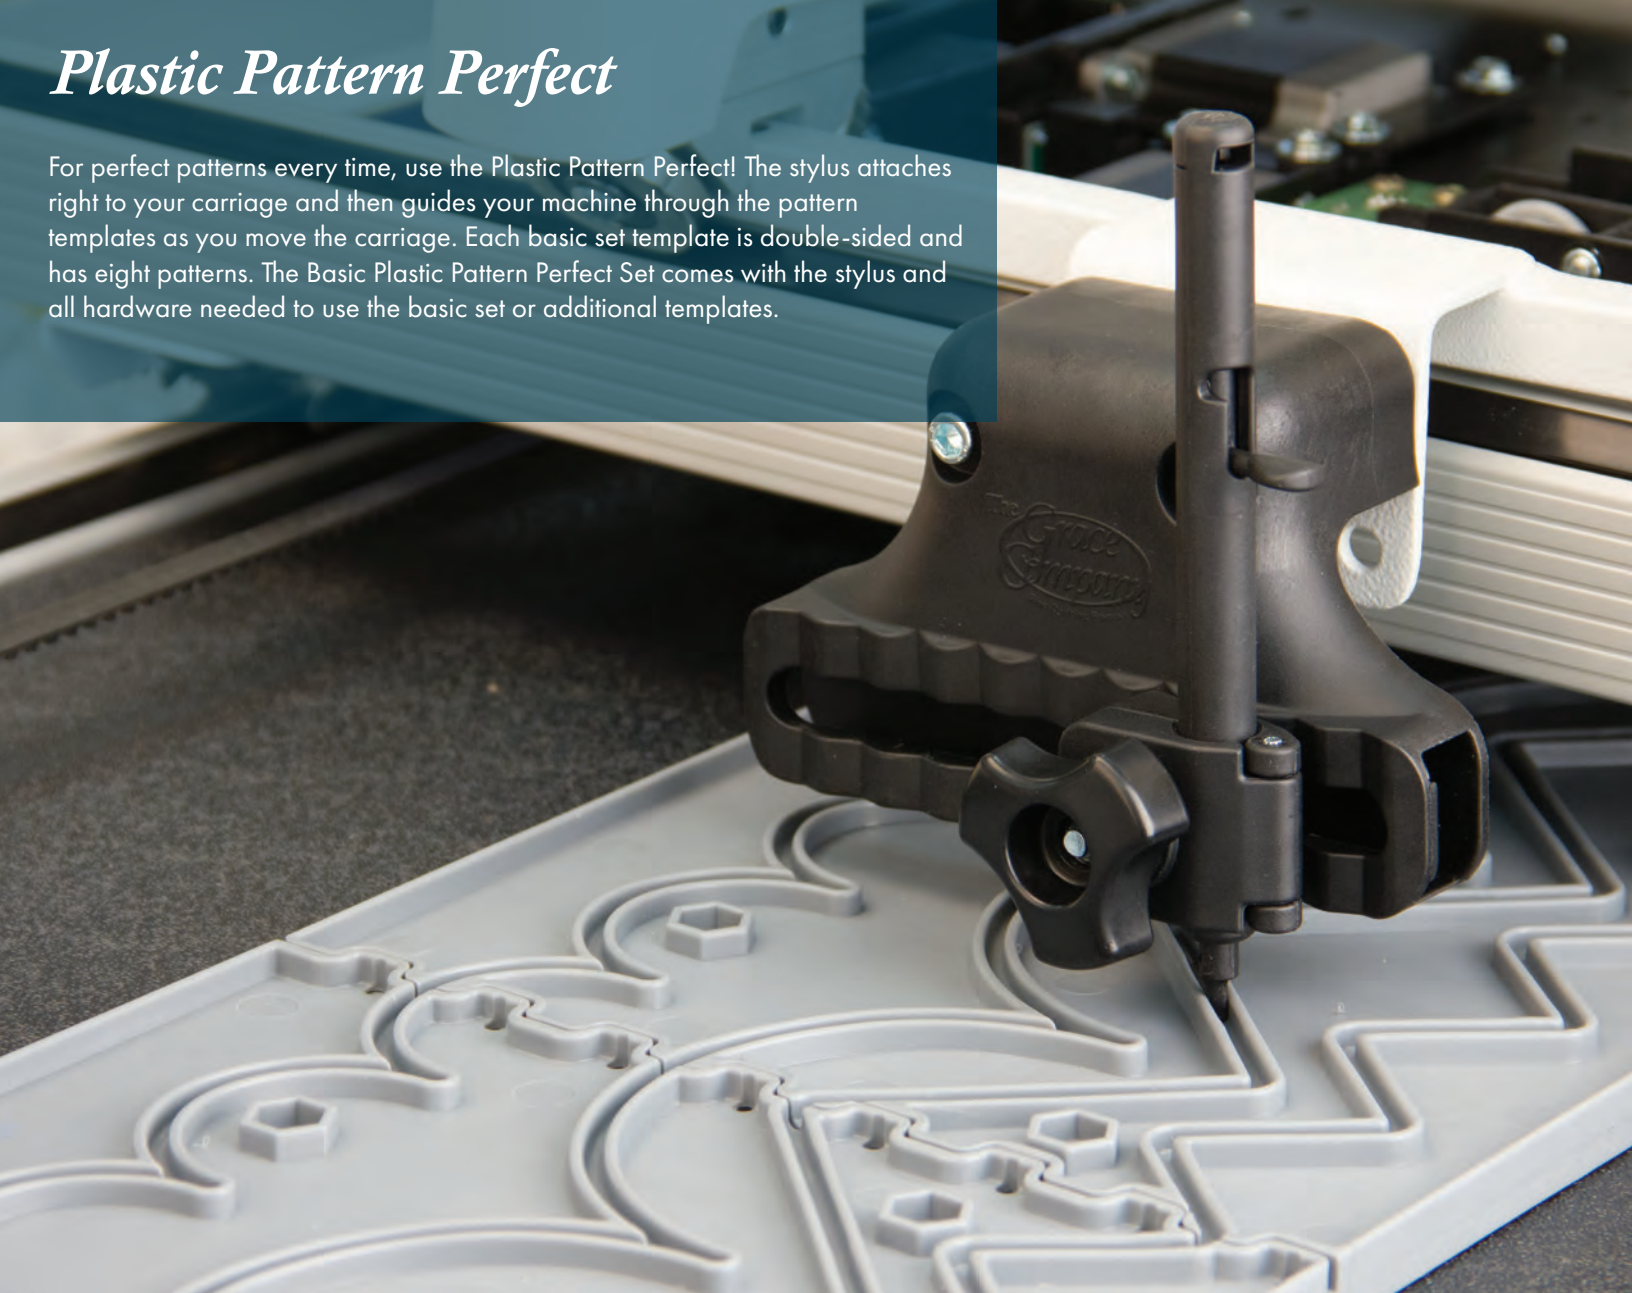

The Luminess is the perfect lighting solution for any work area. It is adjustable to three different height settings, and can be set up in one of four different lengths (with additional accessory). Each model is designed to fit the most commonly sized cutting tables, sewing tables, hand quilting frames, machine quilting frames, and general work areas.

For more information, see our Luminess catalog

Plastic Pattern Perfect

For perfect patterns every time, use the Plastic Pattern Perfect! The stylus attaches right to your carriage and then guides your machine through the pattern templates as you move the carriage. Each basic set template is double-sided and has eight patterns. The Basic Plastic Pattern Perfect Set comes with the stylus and all hardware needed to use the basic set or additional templates.

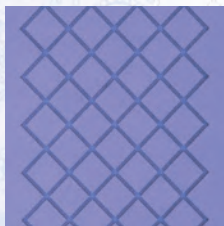

Additional Templates

6 different pattern templates are available to choose from in addition to the patterns found on the basic set: Hearts, Popcorn-Swirl, Spirals, Grid, Cross-Hatch, and Tulips. Each lightweight, easy to store panel set works with the original Plastic Pattern Perfect stylus.

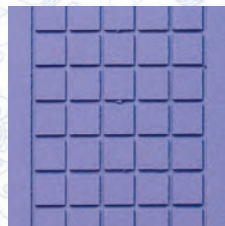

Additional patterns are available in either a double panel set or full frame set with 6 panels of one pattern design.

Cross-Hatch

Popcorn-Swirl

Quilt Clips

Quick and Easy Fabric Tension and Control

Start-Right™ Quilt Clips are the easiest and fastest way to control and adjust the layers of fabric on your quilting frame! They're also a great help when "floating" your quilt on the frame, making loading your fabric easier with less pinning!

Each package includes four Quilt Clips, each 24 inches long. Quilt Clips are purchased in either 1 ½ inch or 2 inch diameters, so you can get the set that will best fit your frame.

Bungee Clamps

The new and improved Grace Company Bungee Clamps have been designed with a sleek new profile to make attaching and removing them even easier!

The Bungee Clamps provide excellent and even side tension for your quilts at the edges of your machine or hand quilting frame. All Grace frames except for the EZ3 currently come with a set of four clamps.

Bobbins, Bobbin Case, Needles

Extra bobbins, bobbin case, and needles are a necessity when quilting. You do not want to be caught without a spare of any of these should you damage, misplace, or simply need more on hand for quick change-outs. Many professionals recommend having 10 or more bobbins and varying grade needles on hand at any time. Of course not as many bobbin cases are needed, but 3 to 6 is a preferred minimum.

Thread Cutter

The TrueTrim is the easiest way to add thread cutting capability to any sewing machine! Just attach the adhesive mount, and then use the TrueTrim both on and off the machine! It quickly slides on or off the sewing machine mount for easy on-quilt thread cutting. The blade also rotates 360° for an unlimited cutting surface.

Start-Right™ Cloth Leaders

A time-saving product to help you attach your fabric to your frame easily, and accurately. Includes three king-size cloth leaders printed with precise guide marks and pin lines. It works great with our Fabri-Fast system, but also includes a Velcro® attachment kit that can be used to secure the cloth leaders to your frame. Choose the size that's best for your frame. 136" is great for a king-size frame with the extra 2 foot extension. The 112" cloth leader is good for the normal king-size frame or smaller. If you have a crib size frame, you may need to get a 112" size and then cut it down.

Quilter's Creative Touch 4

Quilter's Creative Touch 4 is the top-of-the-line automated quilting system. The ability to create, design, and quilt with absolute precision are right at your fingertips.

Based on our original software, QCT 4 is now more powerful, yet easier to use than ever before.

For more information, see our Quilter's Creative Touch catalog

Powered by QuiltCAD

Perfect Patterns In 3 Easy Steps

1. Select

Select from an extensive library of over 200 patterns or design your own.

2. Place

Place a sewing area on your quilt with your machine. The screen will show your pattern in relation to your placement and how it will really appear as sewn!

3. Sew

Quilter's Creative Touch controls your sewing machine to accurately stitch your patterns, exactly as you placed them!

Other Features

- Library of over 200 quilt-ready patterns, or design your own
- Size and position blocks, pantographs, and full quilt layouts
- Panto Stacker: Easy pantograph creation and editing
- Create your own patterns or trace them from photographs
- Runs on your own Windows 10 or later tablet
- Record any free-hand quilted patterns to use or edit later
- Precise pattern placement methods
- Runs on your own windows tablet
- Switch between computer-guided, and free-motion quilting
- Import and export pattern file types from other programs
