4<sup>th</sup> May 2020

To whom it may concern:

As part of our school 5 Years Property Plan projects, Project floors is one of our contractors to provide acoustic upgrade solutions to all classrooms and atriums at Albany Junior High School.

The ideal solution to address the acoustic reverberation was to use Project Floors ProTile with EcoTx backing. Jade and her team worked closely with us to achieve the best outcome.

With an extremely short lead-time Project Floors achieved the desired design functionality to fit within the whanau blocks, for 6,500m<sup>2</sup> of floor space. The forecasted timeline for this project is to complete within three months due to the complexity of the school environment. However, forty-six classrooms completed within ten days, before the teachers returned to school on the 27th of January.

Project Floors achieved the impossible.

The feedback from our teachers and our students has been incredibly positive. Project Floors has successfully fulfilled all our expectations.

I have no hesitation in recommending Project Floors and their products.

Regards

Bruce Wang
