528 CUSTOMS GOON 22/24 RDA

Why the hype?

Please note that all descriptions, specifications, and claims are based on manufacturer information. Information listed and provided are to be used at the sole discretion of the consumer.

The Goon 22/24 RDA by 528 Customs presents one of the most innovative and intuitive terminal designs to date, featuring a two post clamp style design in which the coil leads are inserted and sandwiched between a large flat surface area that makes setting coils extremely easy. Positioning and inserting coil leads is done within a 4mm wide space between each posts screws, and has a large range of vertical room if necessary, making this design one of the most build friendly and efficient designs to date. Each side of the clamp is 24K Gold Plated to ensure consistent and strong conductivity, and features a flat surface area to increase contact with each lead.

The build deck itself features a 20mm inside diameter, a 5mm deep juice well and PEEK insulators, making it a roomy and capable deck purpose built for builders. Airflow enters the Goon's chamber right above the build deck through three 3mm diameter airholes on each side, with a single side airflow option that

can be throttled all the way down to a single air hole. Airflow is adjusted via the top cap, and allows for a versatile range of options, from fully open to one air hole per side, and finally to the aforementioned single air hole option. This range, coupled with a hybrid compatible copper 510 connection, makes the Goon an excellent all around platform, from flavour enthusiasts all the way to cloud chasers.

The Goon uses a proprietary drip tip with a bore measuring 10.5mm and manufactured out of delrin. With one of the most ambitious yet functional build decks on the market, the 528 Customs Goon RDA makes for an excellent, well rounded rebuildable dripping atomiser.

Key Features

- 22/24mm Diameter
- Innovative Two Post Build Deck
- Clamp Style Posts
 - 4mm of Width Between Screws
 - Easily Secure Very Large Leads
 - Gold Plated Posts for Conductivity
 - Purpose Built for Builders
 - Two Phillips Screws Per Post
 - 5mm Deep Juice Well
 - PEEK Insulation
 - 20mm Inside Diameter Build Deck
- Adjustable Dual Triple Air hole Airflow
 - 3mm Diameter Each
 - Single Coil Compatible
- Three Piece Assembly
- 10.5mm Delrin Drip Tip
- Copper 510 Contact
- High Quality Stainless Steel Chassis
- CNC Engraved
