Handmade Chain Maille Jewellery

## Materials

Jump rings (aluminum or anodized aluminum):

- 8 small rings (18 SWG 5/32", AR 3.4)
- 4 large rings (18 SWG 1/4", AR 5.5)

Scales (anodized aluminum):

- 2 small (9/16" x 7/8")
- 2 large (7/8" x 1.41")

Findings:

- 2 earring hooks

Tools:

- 2 pliers (toothless, to avoid making marks on the rings)

## Instructions

Step 1: Using one of the small rings, connect one small and one large scale. Make sure both scales are lying flat against each other (both curved sides up).

Step 1 – Connect both scales

Step 2 – Two parallel rings

Step 2: Connect a second ring next to the first.

Step 3: Take one of the large rings and connect it through the two smaller rings, taking care to not go through the hole in the scales.

Step 4: Connect a second ring next to the first.

Step 3 – Through the rings only!

Step 5: Fold the large rings down over the scales on each side (one on the front, one on the back).

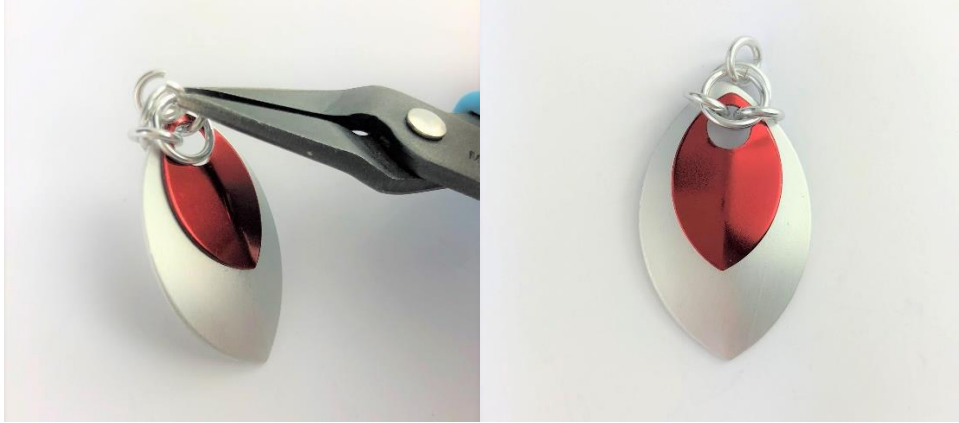

Step 5 – Front and back views

Step 6: Push the small rings apart at the tip of the scale and push the large rings through the opening you made. This step can be a bit tricky so don't be shy to really wiggle them!

Step 6 – Push small rings apart / wiggle, wiggle, wiggle / End position

Step 7: Take one small ring and connect it to the top of the two large rings, as shown.

Step 7 – almost done!

Step 8 – One beautiful earring

Step 8: Use the last small ring to attach your earring hook.

Step 9: Repeat steps 1–8 for your second earring

Step 9 – A pair of beauties!

Step 10: Show off your great new earrings – handmade by you!

Step 10 – Show them off. You earned it!

I hope you had fun making your scale earrings. If you have any questions or get stuck on any of the steps please don't be shy to ask! Shoot me an email at [info@floatorfly.com](mailto:info@floatorfly.com) or send me a message on Instagram or Facebook.
