

EMF HARMONIZER CAR

INSTRUCTIONS & FAQ'S

Description

- The EMF Harmonizer Car supports your health and well-being as you are exposed to the electromagnetic radiation emitted by your automobile. It works by harmonizing the damaging energetic frequencies emanating from the electronics in your car, as well as by supporting your body against their effects.
- The EMF Harmonizer Car is a small 3 inch x 2.5 inch metallic plastic sticker that you place in an area near the driver, such as the console area between the two front seats, on the steering wheel column or dashboard, or under the driver's seat (facing up). You may remove the tape on the back and use the adhesive to stick it to a surface, but that is optional.
- The EMF Harmonizer Car utilizes EMF Harmony's exclusive dual-level technology to support your health against the negative influence of electromagnetic radiation. The first level of action is a Direct Technology that harmonizes the negative energetic frequencies of the electromagnetic radiation emitted by the automobile. The second level of action is an Adaptive Technology that supports your body as it is stressed by the radiation.
- The EMF Harmony technology does not block or alter EMF activity, allowing the electronics in your car to operate normally. It is designed to provide you with much needed protection against the negative health effects of the EMF radiation in your automobile from computerized electronics, Bluetooth communication, and built in cell phone and WiFi technology.
- For an electric or hybrid vehicle, it is recommended that you install a second unit in the back area of the car.

Instructions

- The EMF Harmonizer Car should be placed in an area near the driver, such as the console area between the two front seats, on the steering wheel column or dashboard, or under the driver's seat (facing up).
- You may remove the tape on the back and use the adhesive on the back to stick it to a surface, but that is optional.
- Please do not enclose the EMF Harmonizer Car in the glove box or other closed compartment.
- For an electric or hybrid vehicle, it is recommended that you install a second unit in the back area of the car. You may use the adhesive to stick it to one of the interior sides in the back area or to the flat surface underneath the back seats, or you may place it on the flat surface behind the back seat in a sedan.
- You may move the EMF Harmonizer Car to another vehicle, but it is best not to move it frequently. It is recommended that you have one unit for each of your vehicles.

Frequently Asked Questions

- **Why do I need EMF protection?**

The negative health consequences of exposure to electromagnetic radiation have been documented in countless scientific studies. Please see the 'Why' page on our website for more details and links to many of those studies.

- **How does the EMF Harmonizer Car work?**

All of the EMF Harmony products operate using similar technology, which is described in the 'How' page of our website.

- **How long will the EMF Harmonizer Car last?**

The product will work effectively indefinitely, but the technology is updated regularly. Given the rapid pace of technological change today, we recommend replacing the product approximately every ten years.

- **If I have an EMF Harmonizer Car do I still need the other EMF Harmony products?**

The EMF Harmonizer Car is not designed to replace the other products and is ideally used in combination with them. For example, the EMF Harmonizer+ is always recommended for your cell phone, and the Home & Office offers the strongest protection from the electromagnetic radiation emitted by the many devices around your home or workplace (including EMF's emanating from outside the protected area).

- **How do I measure the effects of the EMF Harmonizer Car?**

Since the EMF Harmony technology operates at the sub-atomic level and does not block or alter EMF's, it is not possible to measure its effects with an EMF measuring instrument. However, it is possible to measure the biological effects of the technology with various measurement devices. Please see the 'Research' page on our website for studies that demonstrate biological changes from using the technology. You may of course run your own biological tests to see the results. At the bottom of the 'How' page you will find a quick test using lemon juice that will demonstrate that the technology is doing something, which is noticeable in the taste of the juice.

- **Will I feel the effects of the EMF Harmonizer Car?**

This depends on how sensitive you are to the effects of electromagnetic radiation. People who suffer from Electromagnetic Hypersensitivity will generally feel a difference, but that is more the exception than the rule. Many people will not notice a difference, mainly because most people are not ultra-sensitive to EMF's. However, that does not mean that EMF radiation does not damage their health, or that the product is not helping them.

It may be compared to taking a nutritional supplement. For example, when you take vitamins or fish oil, you do not "feel" different once you start taking them, but they nonetheless have measurable benefits to your health when taken regularly. Likewise, although you may not "feel" the effects, the EMF Harmony technology supports your body's health, which has been documented in biological testing (see the 'Research' page on our website). Whether you are sensitive to the effects of electromagnetic radiation or not, they do damage your health with long term exposure (see the 'Why' page on our website).

- **Do you offer a return policy?**

We do offer a 30 day money back return policy for new, unused products in original condition. Once you use or alter the product it may not be returned. Please contact us for return instructions.

*It is important to know that the product is not designed to treat or cure any disease or health problem.
If you are ill, you should seek medical advice from a doctor or other health care professional.*

Specifications

Contents: 1 EMF Harmonizer Car

Material: Metalized Plastic Plate with Adhesive Backing

Dimensions: Approx. 3 x 2.5 x .075 inch
