EMF Harmony Product Training

Overview of products and answers to
frequently asked questions.

EMF Harmony Product Training

EMF Harmonizer Mobility+ Bracelet

- Versatile EMF protection – protects from all EMF's everywhere you go.
- Attractive and stylish accessory.
- Comfortable enough to sleep in, completely waterproof.
- Silicon rubber band with stainless-steel plate and buckle.
- Four colored energy elements on the bottom add energy for grounding, negative ions, far infrared, and some extra EMF protection support.
- One size fits most adult wrists.
- Price = \$99

EMF Harmony Product Training

EMF Harmonizer Mobility Wristband

- Versatile EMF protection – protects from all EMF's everywhere you go.
- Sporty and durable accessory.
- Comfortable enough to sleep in, completely waterproof.
- Silicon rubber band with stainless-steel plate and buckle.
- Ideal for children, as it can be trimmed to fit any wrist size.
- Price = \$79

EMF Harmony Product Training

Mobility & Mobility+ FAQ's

- What is the difference between the Mobility wristband and Mobility+ bracelet?
 - It is primarily a question of which style is preferred. The Mobility+ is a little dressier, and the Mobility is a little sportier.
 - The Mobility is ideal for children because it can be sized to fit small wrists, it will withstand wear and tear a little better, and it would be unlikely to fall off in the rough and tumble of a kid's life.
 - The Mobility+ has four extra energy elements which offer a slightly higher level of protection for the body. Both provide excellent EMF protection, however, so if someone prefers the style of the Mobility, they should choose that.
- If I am wearing the Mobility or Mobility+ do I need the other products?
 - The bracelets are a good product to start with because they are so versatile, but they do not completely replace the other products.
 - The bracelets are focused primarily on supporting the body against the negative effects of EMF exposure, whereas the Harmonizer and Harmonizer+ are focused on harmonizing the EMF radiation from the devices to which they are attached, and the Home & Office and Car are focused on creating a totally harmonized environment, including both support for the body and harmonization of EMF radiation.
 - So for maximum support all the products work synergistically together. That said, most people will not purchase all products right away. So an ideal place to start that will provide close to maximum benefit is the Home & Office Kit for the home, a Harmonizer+ each for the cell phone and WiFi router, and a bracelet to wear when not at home.
- How do you clean the bracelets?
 - They can be cleaned with liquid soap and water. They are completely waterproof.

EMF Harmony Product Training

EMF Harmonizer Pendant Necklace

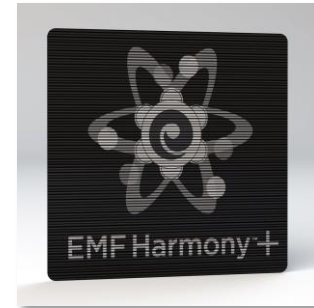

- Versatile EMF protection – protects from all EMF's everywhere you go. (Same protection as bracelet & wristband.)
- Discreet and stylish accessory.
- Stainless-steel pendant and stainless-steel necklace.
- Four colored energy elements on the bottom add energy for grounding, negative ions, far infrared, and some extra EMF protection support.
- Necklace can be shortened to any desired length and is fine for children.
- Waterproof, but remove while showering or swimming to avoid discoloring from chemicals.
- Price = \$99

EMF Harmony Product Training

EMF Harmonizer+

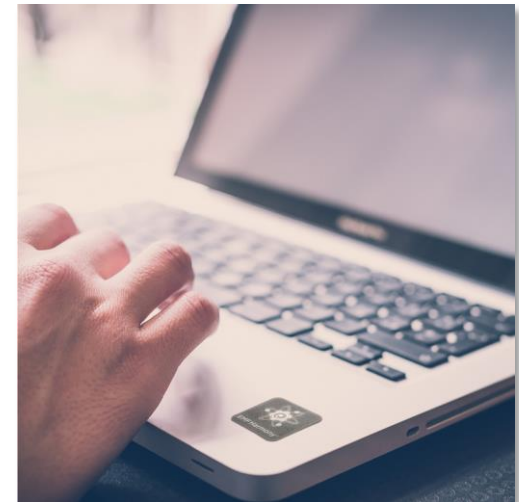

- EMF protection for cell phones and WiFi routers.
- Cell phones and WiFi routers are the two most powerful EMF emitters in most people's lives.
- It is a small 1-inch x 1-inch metallic plastic sticker / diode that you place on the phone or router. It comes with adhesive backing.
- In addition to WiFi routers, it should be used for WiFi boosters/extenders and for cable TV base units that transmit wirelessly.
- For less powerful wireless devices such as a laptop, tablet, or computer, please choose the EMF Harmonizer, which is \$20 cheaper (see next page).
- Price = \$69

EMF Harmony Product Training

EMF Harmonizer

- EMF protection for wireless devices that communicate via WiFi or Bluetooth.
- Appropriate devices are laptops, tablets, computers, monitors, wireless speakers, “smart” TV’s & appliances, baby monitors, wireless land line phones, etc.
- It is a small 1-inch x 1-inch metallic plastic sticker / diode that you place on the surface of the device. It comes with adhesive backing.
- For cell phones and WiFi routers, please use the Harmonizer+ (see prior page).
- Price = \$49

EMF Harmony Product Training

Harmonizer & Harmonizer+ FAQ's

- What is the difference between the Harmonizer and Harmonizer+?
 - The Harmonizer+ is more “powerful” than the Harmonizer since cell phones and WiFi routers broadcast EMF's with a strong signal. Other wireless devices that simply communicate over WiFi or Bluetooth are not broadcasting, and so do not emit as much EMF radiation.
- Where to I place the sticker?
 - For a cell phone it should be placed anywhere on the back of the phone. It is fine to cover it with a case.
 - For WiFi routers and other devices it can be placed anywhere on the device. For example on a laptop it could be on the keyboard area or on the bottom.
- Can I reuse them on another device?
 - Yes, they come with an adhesive backing to hold them in place, but they can generally be removed and they will still be “sticky” enough to be placed on another device. If not, they may be taped or glued in place on the new device.
- Do I need these if I am wearing an EMF Harmony bracelet or have the Home & Office Kit?
 - In an ideal scenario for maximum protection you would still use them even with a bracelet or Home & Office Kit. However, the most important is the Harmonizer+ for the cell phone and WiFi router, which we always recommend since they are such strong emitters of EMF's. The Harmonizer would be important if you are not wearing a bracelet and use a device outside of an area protected by the Home & Office Kit.

EMF Harmony Product Training

EMF Harmonizer Home & Office Kit

- Creates an EMF protected zone where all people (and pets and plants) are protected from all EMF's, those coming from both inside and outside the zone.
- The Home & Office also creates a healthier environment by generating a natural balance of positive and negative ions, helping to remove unhealthy fine particulate matter from the air.
- Each kit comes with one larger metal plate (2 x 2 ½ inch) for the fuse box, and a number of smaller plates (2 ¼ x ½ inch) for outlets – the number of smaller plates depends on the size of the kit.
- The kits sizes are chosen according to the square footage of the area to be covered.
- Price:
 - \$399 – Kit 1500 – for areas up to 1,500 sq ft
 - \$599 – Kit 2600 – for areas between 1,500 & 2,600 sq ft
 - \$799 – Kit 3700 – for areas between 2,600 & 3,700 sq ft
 - \$999 – Kit 4800 – for areas between 3,700 & 4,800 sq ft

EMF Harmony Product Training

Home & Office Kit FAQ's

- How do I calculate the square footage of the area to be covered?
 - It should be calculated based on the area serviced by the fuse box, or if there are multiple fuse boxes, then by the area serviced by the electricity meter. This includes a garage or basement if they have electricity in them. For areas larger than 4,800 sq ft you purchase an additional Single for each extra 375 sq ft (see instructions referenced below).
- Where to I place the plates?
 - The large plate goes on the inside of the fuse box door, and the small plates go on various outlets around the space (or light switches if there are no convenient outlets). Detailed installation instructions can be found in the Instructions & FAQ's section of the product page here: emf-harmony.com/products/harmonizer-home-office
- What if I don't have access to the fuse box?
 - You may purchase individual Home & Office Singles to cover a partial area when access to the fuse box is not available. The Single is the small plate for the outlets, and you need a minimum of 4 for up to 1,000 square feet, and then 1 for each additional 375 square feet above 1,000. See the instructions referenced above for more details.
- How many plates come in each Kit?
 - All kits come with one of the large plates, and this number of small plates: 1500 – 4; 2600 – 7; 3700 – 10; 4800 – 13
- Do I need the other EMF Harmony products if I have the Home & Office Kit?
 - In an ideal scenario for maximum protection you would still use the Harmonizer+ and Harmonizer on your devices even with a Home & Office Kit. However, the most important is the Harmonizer+ for the cell phone and WiFi router, which we always recommend since they are such strong emitters of EMF's. And of course the bracelets are important to wear when outside of an area protected by the Home & Office Kit.

EMF Harmony Product Training

EMF Harmonizer Car

- Protection from EMF radiation while in your car.
- Protects all passengers from all EMF's from both inside and outside the car. Modern cars are full of EMF's from their electronics, built-in cell phone and WiFi technology, etc.
- Ideal for people who commute or otherwise spend a lot of time in their car.
- It is a 3 x 2 ½ inch metal plate with adhesive backing, although it does not need to be adhered to a surface. An air vent holder is also available.
- For an electric or hybrid car, two units are recommended, one in the front and one in the back.
- Price = \$89

EMF Harmony Product Training

EMF Harmonizer Apple Watchband

- Protection from EMF's emitted by the Apple Watch and from all other EMF's the wearer is exposed to.
- Operates like the EMF Harmony bracelets by providing versatile protection everywhere from all EMF radiation.
- Two connector widths available to fit any series of the Apple Watch.
- Available in small/medium or medium/large lengths to fit most wrist sizes.
- Price = \$89

EMF Harmony Product Training

Apple Watchband FAQ's

- Can I take the metal piece off and put it on my own Apple Watch band?
 - You can take the metal clip off the band and put it on another one, the difference is that this will only protect against the EMF's from the Apple Watch itself, but not all EMF's that you come into contact with. The silicon rubber band carries energy information also, and by having that along with the clip you get the broader protection because it circles the meridians in your wrist which then circulates the energy throughout your whole body. This is how our EMF Harmony bracelets work also.
- How do I determine whether to get the 38/40 or 42/44 mm version?
 - This refers to the width of the connector where the band inserts into the watch. The newer Apple Watch Series 4 and Series 5 models come in 40mm and 44mm, and the older models (Series 3 or lower) came with the 38mm and 42mm casing. You can refer to the manual or your receipt to determine which size you purchased.
- How do I determine whether to get the small/medium or medium/large size?
 - Below are the appropriate lengths according to wrist size:
 - 38/40 mm S/M: suitable for 5.7" ~ 8.35" wrist
 - 38/40 mm M/L: suitable for 6.7" ~ 8.27" wrist
 - 42/44 mm S/M: suitable for 6.3" ~ 7.87" wrist
 - 42/44 mm M/L: suitable for 6.1" ~ 8.97" wrist

EMF Harmony Product Training

All Product FAQ's

- Will the products protect against 5G technology?
 - Yes, all EMF Harmony products will work for 5G EMF radiation. They in fact work on all forms of electromagnetic fields, including from conventional electricity and even geopathic stress.
- Do the products block EMF radiation?
 - No, EMF Harmony technology does not block EMF's, it harmonizes them, and it provides support for the body – all at the sub-atomic / quantum level. This means all wireless devices continue to operate normally. This also means their effectiveness cannot be measured with an EMF meter. See the 'Why' page on our website for more details.
- How long will the products last?
 - The products will work effectively indefinitely, but the technology is updated regularly. Given the rapid pace of technological change today, we recommend replacing the products approximately every five years, although for the Home & Office Kit it could be every 10 years.
- How do I measure the effects of the products?
 - Since the EMF Harmony technology operates at the sub-atomic level and does not block or alter EMF's, it is not possible to measure its effects with an EMF meter. However, it is possible to measure the physiological health benefits of the technology with various health measurement devices. Please see the 'Research' page on our website for studies that demonstrate this. You may of course run your own physiological tests to see the results as well. At the bottom of the 'How' page on our website you will find a quick test using lemon juice that will demonstrate that the technology is doing something, which is noticeable in the taste of the juice.
