

Product information

RENATURE YOUR LIFE

memonizerMOBILE

Usage

The memonizerMOBILE was developed for the harmonisation of mobile phones, smartphones and cordless telephones (DECT phones).

Field of application

The memonizerMOBILE is available in several different designs and is suitable for all types of mobile phones, smartphones and cordless telephones.

Special features

The memonizerMOBILE does not require a power supply and does not have any live components. It functions without moving parts or magnetic components, is maintenance-free and does not wear off.

It is characterised by:

- long life cycle and high reliability
- simple installation

Nominal characteristic values

Dustproof, splashproof
 Temperature range: 14 to +104 °F (-10 to +40 °C)
 Humidity range: 0 to 100 % RH

Size and weight

Model	Usage	L x W x H [inch]	Weight [oz.]
MOBILE	Mobile, smartphone DECT phone	1,4 x 0,5 x 0,01	0,02

The scope of delivery includes a memonizerMOBILE in transport packaging, protective film to stick over the device.

RENATURE YOUR LIFE

memonizerMOBILE

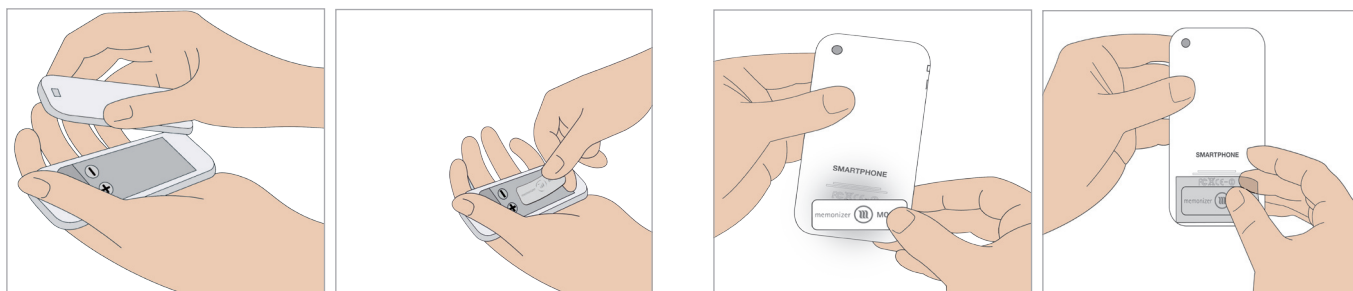

Installation

The memonizerMOBILE is simply affixed over the battery in the mobile phone or on the exterior of the smartphone.

If you have a mobile phone with a removable battery, remove the cover of the unit. The memonizerMOBILE is simply placed on top of your battery in such a way that the memon logo is still visible. Replace the cover. The memonizerMOBILE is now installed!

You can follow the same procedure for cordless phones.

For smartphones that cannot be opened, place the memonizerMOBILE on the back of the device as close as possible to the bottom of the unit or near plug connectors. Affix the memonizerMOBILE by sticking the supplied clear protective film over it.

Please note:

The memonizerMOBILE should not be used in combination with any other products for the harmonisation of mobile phones, smartphones or cordless telephones.

If you upgrade to a new mobile phone, the memonizerMOBILE can easily be removed and then reused.

Further material data sheets containing information about particular assemblies and safety data sheets for components are also available on request.
