Model Shown: DS53080 (Individual Specification Sheets Available On Request)

Load rating testing shown is for a 30,000 cycle test for extendible elements deeper than wide. Drawer runners which are installed in drawers that are wider than they are deep are subject to lateral stress which will reduce load carrying capacity. Tests are done according to ANSI/BIFMA X5.9 - 2008 Standard 15.2.1. Please contact us if you have any questions regarding product specification & testing results.
