

# ELAC

The life of sound.

## Discovery™ Series

**Opens every room to music... wirelessly.**

The Discovery Connect is the perfect companion to an ELAC Discovery Music Server or other Roon-Based music server. The included digital and analog outputs allow for a wide variety of system setups. Built-in Wi-Fi eliminates the need for an Ethernet port near your audio system. Support for Spotify Connect, AirPlay and Bluetooth ensures you will never run out of music options. Embedded AirX2 transmitters allow you to eliminate speaker wires when paired with our ELAC Navis powered loudspeakers.

## Discovery Connect

**Make the connection... with no connection at all!**

The Discovery Series includes the Discovery Music Server, designed to be the heart of a serious music system, and the Discovery Connect Streaming Music Endpoint that eliminates wires and pairs with ELAC Navis powered loudspeakers or our amazing Discovery Z3 Wireless Speaker system, a stand-alone music system for every room.
