DIGITAL TRENDS AWARDS

WiSA ™
WIRELESS SPEAKER & AUDIO

HIGH DEFINITION WIRELESS AUDIO
Award winning Reference Premiere HD Wireless speakers and HD Control Center are a combination of the acclaimed Reference Premiere acoustics platform with lossless wireless audio transmission. Through the use of state of the art WiSA technology, not a single detail is lost from the source to the speaker.

SIMPLE SET UP
Be immersed in high definition sound in a matter of minutes. With Klipsch's proprietary Smart Speaker Selector, one button on the rear of each speaker seamlessly makes the connection to the HD Control Center without the need for speaker wire or a complicated A/V receiver.

SYSTEM EXPANDABLITY
Start your system with as few as two speakers and expand over time up to a 7.2 surround-sound powerhouse.

FUTURE PROOF
Once you register your HD Wireless system, we will send you free firmware upgrades so you can stay current with the latest Klipsch technologies while expanding your system over time. In addition, you will receive one HD Control Center hardware upgrade - free of charge. Reference Premiere HD Wireless will grow with you providing a lifetime of wireless high definition sound.

***BLUETOOTH*® WIRELESS STREAMING**
Allows you to stream content from most mobile phones, audio devices and computers.

ERGONOMIC REMOTE CONTROL
The included remote allows you to easily change inputs, adjust volume, and modify listening preferences such as virtual surround, voice enhance and night time modes.

CUSTOM INSTALL FEATURES
Includes discrete codes for universal remote control programming.

DOLBY® DIGITAL AND DTS® DECODING
Supports multi-channel decoding for a truly immersive home theater experience.
