OPEN COMFORT, CLEAR SOUND

OPEN-TYPE EARBUDS

Open Earbuds

When worn, the open earbud shape hangs in a hollow near the entrance of the ear. Since the open-type does not seal the ear canal, the user is less likely to feel a sense of their ear being sealed off. It is also convenient when users would like to enjoy calls or content and have awareness of sounds around them.

TRUE SOUND

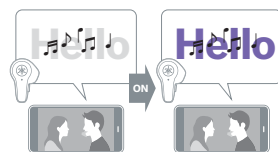

The Yamaha legacy of crafting the finest musical instruments allows a complete understanding of musical creation and how the artist's thoughts translate into their music.

CLEAR AND DYNAMIC

The TW-EF3A provides clear vocals and human voices, making it easy to listen to over extended periods of time. The 13mm drivers fully express the energy and dynamism of the music.

NEVER MISS A VOICE

Clear Voice is a function that lifts the bandwidth of the voice to make vocals easier to hear. In dialogue-driven content (e.g. dramas, news, movies, etc.), the voice becomes easier to hear without having to turn up the volume.

MULTIPOINT CONNECTIVITY

Connect two Bluetooth® devices simultaneously, such as a smartphone and a PC. When receiving a call from your smartphone while connected to your PC, take the call without have to switch connection to your smartphone.

OTHER FEATURES

LISTENING CARE

Lowering volume typically results in a perceived loss of certain frequencies, a phenomenon of human hearing. Listening Care intelligently adjusts the EQ to provide full-range sound even at a lower volume.

CALLING THAT'S CLEARLY BETTER

Convenient call function for both business and private use. You can also wear only one earbud and enjoy calls while being aware of sounds around you.*3

GAMING MODE

Reduce the lag between sound and video when watching videos or playing games.*4

ACTIVATE VOICE ASSISTANTS

Quick activate Siri® or Google Assistant with the button.

LONG BATTERY LIFE

With the charging case, it can be used for up to about 26 hours.

WATER RESISTANT

With an IPX4 water-resistance rating, a little sweat or rain won't harm these earbuds, making them perfect for exercise and life on the go.

STAY CONNECTED

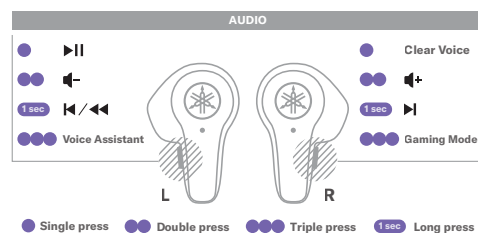

Equipped with technology that enables simultaneous L-R connection with devices for stable Bluetooth® connectivity.

GOOGLE FAST PAIR

Just one tap enables quick, effortless Bluetooth pairing with your Android*5 device.
