Virtual Surround Technology

Be immersed with virtual surround sound technology.

With the unit placed under your screen, a virtual sound

field is created to reproduce left, center, right and back sound effects, so you can enjoy a fuller rich presence just like a movie theater.

Rich Bass Reproduction (Built-in SW, Passive Radiator x2, Bass Extension)

This compact sound bar incorporates a built-in 75mm

subwoofer unit and dual passive radiator. In addition, the "Bass Extension" enhances any bass signal to ensure a rich and powerful sound.

Clear Voice

Have you ever found it difficult hear dialogue through background noise and busy soundtracks?

Yamaha's clear voice processing, ensures you can

easily distinguish the human voice and dialogue from other elements of a soundtrack further increasing the detail and separation for better clarity and comprehension.

Sound Bar Remote App

With the newly developed Sound Bar Remote App its even easier to control your entertainment. The App

can switch inputs, sound modes, clear voice and bass extension functions and a simple method to power on / off from your smartphone / tablet.

Game Sound Mode

Yamaha's GAME Sound Mode further emphasizes the localization of specific individual audible effects, enhancing the player environment for an immersive experience.

Connection to PC's at low volume can still achieve significant surround sound performance.

Compact Size for Desktop Use

With a width of only 60 cm this compact sound bar can be easily positioned in any situation, whether with a monitor of a desktop PC or in front of a flatscreen TV, this modest design allows for greater level of flexibility.

(W600mm x H64mm x D94mm).
