TW-EF3A Reset Procedure

This will restore all of the earbud settings to their factory defaults. The information for devices registered (paired) will be deleted.
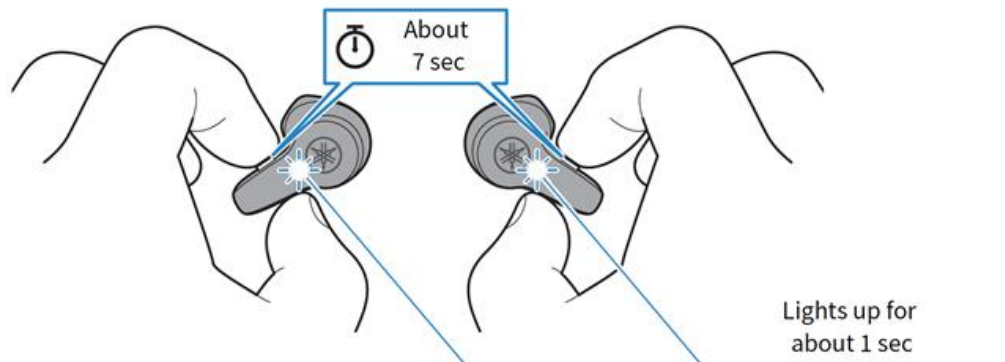

1 **Remove earbuds (L) and (R) from the charging case.**

The indicators light up for about one second.

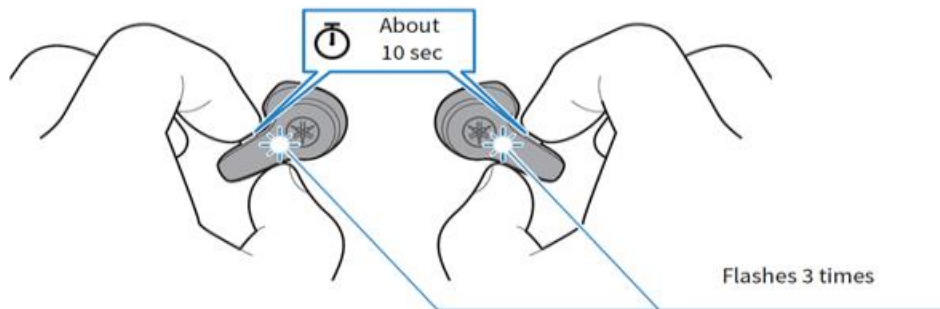

Lights up for about 1 sec

Lights up for about 1 sec

2 **Hold down the function keys on earbuds (L) and (R) for about seven seconds to turn off the earbuds.**

Make sure that the indicator lights up as shown below.

About 7 sec

Lights up for about 1 sec

3 **After the earbuds have been turned off, hold down the function keys on earbuds (L) and (R) for about 10 seconds.**

Make sure that the indicator lights up as shown below.

About 10 sec

Flashes 3 times

4 **Place earbuds (L) and (R) in the charging case.**

The earbuds are now initialized (factory reset).

NOTE

Initializing the earbuds (performing a factory reset) restores all of the earbud settings to their factory defaults. As this deletes all information for devices registered (paired), you must register (pair) the devices again.
