

WHAM!

INSTRUCTIONS • 2-4 PLAYERS

CONTENTS

- 75 Cards

OBJECTIVE

Win as many cards as you can to accumulate the highest score.

SETUP

- Shuffle the deck and deal out 5 cards facedown to each player. The remainder of the deck is placed facedown in the middle of all the players. Decide which player goes first.

HOW TO PLAY

- Player 1 turns over the top card of the deck. Each player then selects a card from their hand to try and win the card in play, placing it facedown in front of them. Once all players have made their selection, the players turn over and reveal their cards at the same time. The player with the highest card wins and collects ALL the cards in play, placing them off to the side (their cache).
- Players draw 5 new cards from the deck only after all 5 of their cards have been played.

For 2 Players

- When there is a tie—i.e., players throw the same

number—the cards remain in the playing field, and another card is played from each player's hand. There is no limit to the number of ties possible, and play continues until the tie is broken.

- The first player to throw the highest card collects ALL the cards in play, placing them off to the side (their cache).

For 3+ Players

- If players tie, they eliminate each other from the round, and the player(s) left with the highest card wins. If there are 3 players and 2 of those players tie, the remaining player automatically wins—even if their card was the lowest.
- If all players tie, everyone throws down another card, and play continues.
- The game ends when there are no cards left in the deck or there are not enough cards to distribute to each of the players.

WINNING

- Each player counts the FACE VALUE of the cards in their cache, and the player with the highest accumulated score is the winner!

ADD A SECOND DECK AND PLAY UP TO 8 PLAYERS!
