Anemoi Armrests - Drilling Dimensions

Please use this guide to provide us with the dimensions needed to allow us to drill your armrests for you.

DIMENSION A

Overall armrest width. This is measured from left armrest outer edge to the right armrest outer edge.

DIMENSION B

Riser stack lateral centres. This is measured from left bolt centre to right bolt centre.

DIMENSION C

Rear edge of your armrest to the rear bolt centre.

DIMENSION D

Rear bolt centre to front bolt centre.

NB, this dimension may be a lateral bolt centre rather tahn the fore-aft bolt centre dimension shown in the image.

If desired we can drill a 9-holw hole grid for you but will require these four dimensions to allow us to drill the hole grid. If you would like a hole grid please let us know at point of order.

Drilled armrests can not be returned so please check and double check you are happy with all supplied dimensions.
