No	Part Description	Quantity	Torque
1	Bar End Plug	1	-
2	2.5mm O-ring	2	-
3	3mm O-ring	2	-
4			
5			

INSTALLATION

WattShop Anemoi bar plugs are simple to install and come supplied with two different O-ring sizes to suit your specific base bar or extension pole.

To fit just push the plug in to the base bar or extension pole until seated fully. The bar plugs come pre-fitted with 2.5mm O-rings, if these are too loose then they can be replaced with the 3mm O-rings.

If the internal surface is rough and uneven then the bar plug may not sit square. To resolve this a simple piece of electrical insulation tape can be used to align and retain the bar plug within the base bar or extension pole.
