

Yamarin 60 DC

New Yamarin 60 DC

- The design follows the 63 DC & BR and the Yamarin flagship, 88 DC.
- Same characteristic modern design, yet recognizable as a Yamarin.
- Wide hull shape makes the boat feel spacious and stable.
- 10" Yamarin Q as standard, can be combined with the Yamarin app.
- A natural first step into the exciting world of Day Cruiser boats.

Functional social sitting area, with comfortable seating for five persons.

No hatches to step on or over, no big leaps required.

The clear proper steps from the cockpit to the big sturdy bathing platforms, make them very safe and easy to access

Negative chines make the boat very stable and the driving experience well-balanced, forcing the water spray wider to the sides.

The cabin with side windows offers sleeping quarters for two or space for kids to take a nap. The cabin also serves as a great dry storage area for luggage.

Yamarin Q as standard, combines all boat and engine data, charts, weather reports and entertainment features on a single touch screen.
