TOLHUIJS
DUTCH DESIGN WITH A STORY

OUR MISSION

SOCIALLY RESPONSIBLE ENTREPRENEURSHIP

We believe in social design; a fair supply chain that supports society. We aim to produce all our products locally and we try to help people who are at a disadvantage in the labour market. Therefore, we choose to have our products made by prison inmates and in social workshops. Besides manufacturing our products, the workers can also improve their skills by obtaining various certifications.

UPCYCLING

Normally failed designs end up in the rubbish bin, but that is exactly the place where our products begin. Every day, factories throw out high-quality waste material that could be put to new use. We use these materials as the starting point for our sustainable design products. Transforming waste materials into new products of better quality is called 'upcycling'. We believe in giving second chances, and by using these products we hope to raise awareness for the waste cycle and the quality of these materials.

DESIGN FIRST

The quality and the beauty of our designs have priority over all else. Our style is characterised by modern and playful creations that you can customise to get the perfect functionality for your space. This way you can design your own story.

FENCY

An upcycled storage system

The story of the FENCY

The FENCY is a multi-functional storage system with great design flexibility. The steel frames are waste materials of a fence factory. We got creative with these fences and played with the colours and measurements. After receiving a fresh powder coat and several wooden or Perspex shelves these fences are now well equipped for a new adventure. FENCY comes in different sizes and colours and is waiting for you to be equipped with your choice of shelves, hooks, and magnets.

SPOOL
HANG BASIC
YELLOW
€129,-

SPOOL
FLOOR BLACK
WHITE
€129,-

The story of the SPOOL

The product's name, "SPOOL", derives from the copper-coloured spool that is the heart of our lamp. That spool was once part of a welding machine. An electrode wire, wound around the spool, was used in the welding process.

Once the wire is finished the spool is quite useless for the welder, and hundreds of spools find themselves out on the streets.

Luckily, that is when we come in to save the spools and we transform them into industrial-looking lamps for your home.

The SPOOL is produced in social workplaces and by prison inmates.

By using a SKIN you can dress up your SPOOL and give it a different colour. The industrial feel and tough look make this lamp

a perfect addition to your interior. They feel right at home above a kitchen table, a desk, or a dining table. They are also available in a bundle or a triple edition.

SPOOL Deluxe

Available in Floor, Wall and Triple.

For the Deluxe edition of the SPOOL we have dressed the spool up in its original fashion. We re-wound the electrode wire around the spool, using a specially designed re-wind machine. The Deluxe will give your spool that old-school industrial feel. Also available in the Floor, Wall, and Triple edition.

ANDY & BENDY

TOLHUIJS
DUTCH DESIGN WITH A STORY

It is sustainable...

The metal body of Andy & Bendy comes from waste at a Fence manufacturer. The wood comes from wasted pallets.

...and social:

The beam is cut, bent and powdercoated in a Dutch prison. Social workplaces assembled the lamp.

ABLE

A sustainable table.

TABLE LEGS

The metal legs are made of waste metal from a steel manufacturer. In Dutch prisons the legs are welded, and coated to give the colour you like. Each table leg can be ordered on any type of table top

NORMAL PALLET WOOD

This table is made of discarded pallets. Each plank is sawed & sanded to create a high quality 5cm thick table top.

HERRINGBONE PALLET WOOD

The herringbone table is made the same as the normal pallet table only then carefully positioned in a herringbone pattern.

PRESSED PALLET WOOD

This oak wood comes from demolished old train wagons. The rough and industrial history is still visible.

OAK TRAIN PARTS

Every pallet plank is checked for nails, planed to an equal thickness and glued together to create a unique table.

A BOOK FULL OF RUBBISH

And 33 DIY projects on how to turn trash into treasures.

A BOOK FULL OF RUBBISH
€16,95

The story of A BOOK FULL OF RUBBISH

Upcycle and re-use your everyday items including your waste materials. Create funny, innovative and new objects by giving these products a second life.

Many items in your garbage bag can be given a second life so easily, you just need to be a little creative. To help you a bit, we launched 'a book full of rubbish'. As the title explains, a book with all sorts of tips and tricks on how to upcycle those 'waste' items in your trash can.

Cat Scratching Post

A large supply of cardboard is not something you might have around the house, but your office, local supermarket, or the library might have. So, do your furry friend a favour and go on a little expedition. This DIY Cat Scratching Post is also a great family project; you fix the base, the children fix the cardboard, and the cat, well the cat can just enjoy.

- SUPPLIES:**
- SAW
 - WOODEN POST
 - BASE WOOD
 - SCREWS
 - (ELECTRIC) SCREWDRIVER
 - (PLENTY OF) CARDBOARD
 - UTILITY KNIFE/SCISSORS
 - GLUE
 - METAL RULER
 - CAT

1
Cut a wooden post to the desired height of your final product.

2
Attach the post to base.

3
Cut multiple layers of cardboard.

4
Cut a hole in the cardboard the size of the diameter of the pole.

5
Slide cardboard around post, apply glue, repeat.
