

## SIDEKYCK

### User Manual

The Sidekyck is a part that is exclusively designed around the Otterbox uniVERSE™ case system. This bracket allows for docking into the rail geometry within the cases to add on a plethora of parts.

The main purpose of the Sidekyck is to adjoin uniVERSE cases with the large selection of Mozee™ mobile payment device sleds. It offers a wide array of positions to accommodate both tablet and phone cases. To use the Sidekyck follow the simple steps listed below.

- 1) Remove the Sidekyck from the package pick which side of the tablet suits your need best, remove the rail cover and insert the Sidekyck until you feel it click in place.
- 2) Once attached take the mating sled of your choice and hover it around the 4-hole pattern on the Sidekyck to determine the best placement for the sled based on your tablet and the use. (see below for possible orientations)
- 3) With placement selected, take the 4 screws supplied in the package and a No.1 Philips screwdriver and attach the 4 screws to hold the sled securely in place.
- 4) The slide your payment device into the sled and you have a modular all-in-one solution to serve your business needs.

\*\*\*Please note some models of the Mozee™ sleds require additional steps. Please refer to the instruction card supplied with the sled for additional installation instructions.
