

# Replacing the Velcro in your collar tag

The following pictures illustrate how to insert fresh Velcro into your collar tag. It's not hard to do but hard to describe!

1  
Hold the fresh Velcro with the fuzzy side down. You can do it either way but we like ending with the fuzzy side out, against your pets fur.

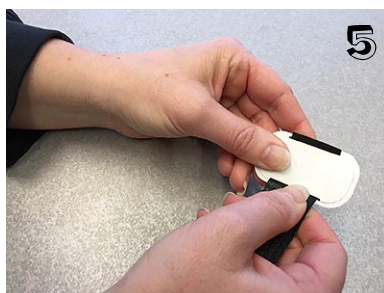

2  
Fold up and crease about 1/8" of the end.

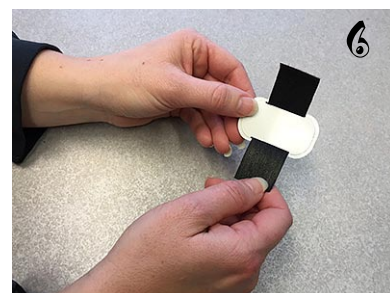

3  
Insert the creased edge into one of the openings on the back of your collar tag.

4  
Now... wiggle, wiggle, wiggle. Gently feed the Velcro in as you rock your hand back and forth.

5  
The creased end will eventually pop out the other side of the tag.

6  
Keep wiggling or gently pull the creased end until the Velcro is evenly centered on the tag. Done!
