

## **IMPRESSION VPS**

for Implants

- Most Hydrophilic VPS
- Most Accurate VPS
- European Made
   Vacuum Packaged VPS
- Fully Scannable VPS
- Economical VPS

USE YOUR TRAY AND YOUR METHOD WITH MITI™ VPS TO ACHIEVE EXCELLENT IMPLANT IMPRESSIONS.

## FOR SUPERIOR RESULTS

follow our 6 easy to use instruction steps below

Place impression coping into mouth and verify proper seating (with x-ray if necessary).

Have assistant load MiTi Heavy-Body into tray. Apply MiTi Light-Body VPS to impression coping with intra-oral tip. Leave some of the coronal portion of coping uncovered.

After tray is filled with MiTi Heavy-Body VPS and MiTi Light-body VPS is applied to coping, apply MiTi Heavy-body VPS around the coping and the applied MiTi Light-body VPS.

Seat tray ( loaded with MiTi Heavy-Body VPS ) around coping. Wait 2.5 min until set.

Remove tray from mouth.
Unscrew impression coping from implant.

Insert impression coping into impression.
Ensure correct seating and no gaps at margin.
