**FOR IMMEDIATE RELEASE****Orthomolecular Medicine News Service, Feb 21, 2020**

## Three Intravenous Vitamin C Research Studies Approved for Treating COVID-19

by Andrew W. Saul, Editor

(OMNS February 21, 2020) Intravenous vitamin C is already being employed in China against COVID-19 coronavirus. I am receiving regular updates because I am part of the Medical and Scientific Advisory Board to the International Intravenous Vitamin C China Epidemic Medical Support Team. Its director is Richard Z. Cheng, MD, PhD; associate director is Hong Zhang, PhD. Among other team members are Qi Chen, PhD (Associate Professor, Kansas University Medical School); Jeanne Drisko, MD (Professor, University of Kansas Medical School); Thomas E. Levy, MD, JD; and Atsuo Yanagisawa, MD, PhD. (Professor, Kyorin University, Tokyo). To read the treatment protocol information in English: <http://orthomolecular.org/resources/omns/v16n07.shtml> (Protocol in Chinese at [http://www.doctoryourself.com/Coronavirus\\_Chinese\\_IV\\_C\\_Protocol.pdf](http://www.doctoryourself.com/Coronavirus_Chinese_IV_C_Protocol.pdf)

**Direct report from China**

OMNS Chinese edition editor Dr. Richard Cheng is reporting from China about the first approved study of 12,000 to 24,000 mg/day of vitamin C by IV. The doctor also specifically calls for immediate use of vitamin C for prevention of coronavirus (COVID-19). <https://www.youtube.com/watch?v=TC0SO9KDG7U>

A second clinical trial of intravenous vitamin C was announced in China on Feb. 13th. In this second study, says Dr. Cheng, *"They plan to give 6,000 mg/day and 12,000 mg/day per day for moderate and severe cases. We are also communicating with other hospitals about starting more intravenous vitamin C clinical studies. We would like to see oral vitamin C included in these studies, as the oral forms can be applied to more patients and at home."* Additional information at <http://orthomolecular.org/resources/omns/v16n11.shtml>

And on Feb 21, 2020, announcement has been made of a third research trial now approved for intravenous vitamin C for COVID-19. <https://www.youtube.com/watch?v=VMDX0RSDp1k&feature=youtu.be>

Dr. Cheng, who is a US board-certified specialist in anti-aging medicine, adds: *"Vitamin C is very promising for prevention, and especially important to treat dying patients when there is no better treatment. Over 2,000 people have died of the COIV-19 outbreak and yet I have not seen or heard large dose intravenous vitamin C being used in any of the cases. The current sole focus on vaccine and specific antiviral drugs for epidemics is misplaced."*

He adds that: *"Early and sufficiently large doses of intravenous vitamin C are critical. Vitamin C is not only a prototypical antioxidant, but also involved in virus killing and prevention of viral replication. The significance of large dose intravenous vitamin C is not just at antiviral level. It is acute respiratory distress syndrome (ARDS) that kills most people from coronaviral pandemics (SARS, MERS and now NCP). ARDS is a common final pathway leading to death."*

*"We therefore call for a worldwide discussion and debate on this topic."*

**News of vitamin C research for COVID-19 is being actively suppressed**

Anyone saying that vitamin therapy can stop coronavirus is already being labeled as "promoting false information" and promulgating "fake news." Even the sharing of verifiable news, and direct quotes from credentialed medical professionals, is being restricted or blocked on social media. You can see sequential examples of this phenomenon at my Facebook page <https://www.facebook.com/themegavitaminman>.

Indeed, the World Health Organization (WHO) has, literally, met with Google and Facebook and

other media giants to stop the spread of what they declare to be wrong information.  
[https://www.cnn.com/amp/2020/02/14/facebook-google-amazon-met-with-who-to-talk-coronavirus-misinformation.html?\\_twitter\\_impression=true](https://www.cnn.com/amp/2020/02/14/facebook-google-amazon-met-with-who-to-talk-coronavirus-misinformation.html?_twitter_impression=true)

Physician-directed, hospital-based administration of intravenous vitamin C has been marginalized or discredited. Scientific debate over COVID-19 appears to not be allowed.

Ironically, Facebook, blocking any significant users' sharing of the news of approved vitamin therapy research, is itself blocked in China by the Chinese government. As for the internet, yes, China has it. And yes, it is censored. But, significantly, the Chinese government has not blocked this real news on how intravenous vitamin C will save lives in the COVID-19 epidemic. Here is the protocol as published in Chinese: <http://orthomolecular.org/resources/omns/v16n11-chi.shtml>

Medical orthodoxy obsessively focuses on searching for a vaccine and/or drug for coronavirus COVID-19). While they are looking for what would be fabulously profitable approaches, we have with vitamin C an existing, plausible, clinically demonstrated method to treat what coronavirus patients die from: severe acute respiratory syndrome, or pneumonia.

And it is available right now.
