

Colloidal Silver: a Powerful Natural Antibiotic

🕒 4 minutes

Colloidal silver is a completely effective treatment for treating all kinds of infectious diseases. It's different from modern antibiotics and chemicals because it isn't habit-forming and doesn't cause bacterial or viral resistance.

Colloidal silver is an **antibiotic with the ability to get rid of fungi, viruses, bacteria, and parasites.**

This is a mineral supplement that kills all of the microorganisms that cause diseases. Because of this, it's very powerful.

In this article, we want to tell you more about this natural remedy that's been used for ages.

What You Need to Know about Colloidal Silver

To be able to talk about the first uses of silver you have to go back in history. Specifically, you need to go back to the imperial ages of Greece and Rome. Both civilizations used this material for **making cooking utensils and water storage containers.**

Herodotus wrote that King Cyrus of Persia carried silver flasks with boiled water with him. He only drank from these. It appears that **this king knew this material stopped the development of microorganisms**, especially the ones that are able to ruin drinks and food.

In traditional Chinese medicine and the Ayurveda, they have also used silver for centuries. It's been used to prevent or treat infections. They also use it to **rejuvenate patients who are affected by pain or age-related weakness.**

A little more recently, farmers in the US collected silver coins. They would put them in a container with fresh milk. This **preserved the milk longer and prevented mold from appearing.**

Since the start of the 20th century, **we've known that no bacteria, yeast, microbe or virus can survive contact with silver.** This happens even if it's a particle.

This metal destroys any pathological organism in minutes.

That's why it makes such a great antibiotic.

”

Colloidal silver is obtained through a process called electrolysis. To do this, you combine silver with distilled water. The result is one of the most powerful antibiotics that exists.

The good news is that **it doesn't produce negative side effects or allergic reactions.** The speed it works at and its safety make it a solution for many problems and diseases.

The Remarkable Benefits of Colloidal Silver

There's something surprising about this powerful antibiotic. The amount of silver you need to make it is really very small.

Here are just a few of its amazing benefits:

- The microscopic particles in this material fight bacteria, mold, and [viruses](#). Plus, it can start doing this very quickly. Because of this, it's used for **strengthening your immune system**. It also prevents certain diseases from appearing. These include colds or even problems related to HIV or herpes.
- Colloidal silver **increases the fluid and lymphatic drainage by taking toxins out of your tissues**. It also increases your cellular oxygenation. Plus, it provides you with a better energy flow all over your body.
- In addition, it's used both for **prevention and for healing and regeneration**.
- It's also used for **curing many oral bacterial conditions**. This includes tonsillitis.
- If you put it on your skin, it helps **fight acne, athlete's foot, sores, eczema, open wounds, and warts**.
- In addition, it helps cure **eye infections or inflammation**. This includes things like conjunctivitis, also known as pink eye.

If that wasn't enough, **it can work all over your body**. It attacks different pathogens at the same time. The antibiotics you buy in the pharmacy can only get rid of a handful of these microorganisms and nothing more.

Since it's tasteless, **you can drink it without any problems**.

How To Use Colloidal Silver

Colloidal silver doesn't interact with most medications. Plus, it's practically nontoxic to humans. As a result, **you can use it at any age to treat all kinds of conditions**.

remember to easily excreted through your urine.

Its uses and dosages are very versatile. You can:

- Do **mouth washes or gargle with it.**
- Soak gauze to **clean wounds and burns.** This is also useful for treating breakouts on your skin.
- Put it in a small container to do eye washes.
- Some people use it for vaginal or anal douches.
- In addition, you can also use it to **deodorize your feet.**
- It can even be inhaled in your nose with an atomizer, as a vapor, etc.

The recommended dose is **one drop for every 2.2 pounds you weigh.** That means if you weigh 155 lbs., the most you should take is 70 drops per day. It should always be dissolved in drops and **taken in two different sittings.**

To increase your absorption of colloidal silver, it's necessary to **keep the liquid in your mouth for a couple of minutes before swallowing it.**

You should **take it on an empty stomach and wait half an hour before eating.** For instance, you can take it when you wake up.

Lastly, if you're using it to clean water, you should **add a tablespoon for every gallon.** You can double the dose if the water is contaminated by bacteria or germs.
