

Custom kit by vanH

VanH was started by husband and wife team, Rynard and Retha van Hoven. We are passionate about sport and creating clothing that enhances your experience during sports. We started an artisan house crafting the some of the best cycling and active wear out there. We do everything in-house at our design facility and factory in Pretoria. We import fabric and do sublimation printing. Everything is sewn by our team of highly skilled seamstresses. We love what we do and welcome you to join us on this exciting journey. We hope to make kit that you will love.

Here's the process in short:

Brief

1. Our design team will meet with you to put together a draft design for your custom kit.
2. All logos must be supplied in vector format to enable us them print them.
3. If you have specific colours, they should at least be specified in pantone but preferably a sample of the colour should be supplied, so we can match it to our print samples as colours vary according to fabric.
4. The vanH logo will be incorporated in the design on the chest and back.
5. We do have sizing samples if you would like to fit or you can use the size chart below.
6. Quantities must be agreed on, design signed-off and a 50% deposit paid before we start production.
7. Production schedule will be discussed to confirm lead time.

Design

1. Our graphic designer will do three designs.
2. You can choose the one you like best and it can be altered twice where after additional changes per hour will be for your account. Charged at R450 per hour.

Costing

Quantity	Price per item (includes VAT)				
	Race cut cycling jerseys	Cycling bibs	Gillets	Sport shirts	Running Vets
1	R1597	R1798	R1093	R990	R938
2-3	R1397	R1598	R993	R858	R758
4-9	R1097	R1298	R893	R748	R638
10-19 (5% discount)	R1042	R1233	R848	R710	R606
20 or more (10% discount)	R987	R1168	R804	R673	R574

Specifications

1. Bibs are manufactured using Italian imported black lycra, Italian grippers on legs and Elastic Interface pads.
2. Cycling jerseys are manufactured from Italian light weight breathable fabric which is UV protected.
3. Sample sizes are available for fitting and it is recommended that you fit the product before your order to ensure the desirable fit.

Process

1. Once the design brief has been taken, and all the logos received in the correct format, we will supply a draft design.

2. The design needs to be signed off and 50% payment on the order has to be made before production will be started.
3. It is very important to clearly communicate deadlines and ensure that there is manufacturing capacity to meet those deadlines.
4. Manufacturing lead times will vary depending on the capacity of the factory.
