

SHARKCAGE

CUSTOM CAMERA CAGES

CUSTOM FIT FOR YOUR CAMERA

The Sharkcage from Fotodiox proves that gearing up your 4K mirrorless camera for video doesn't have to be ugly. You need a camera cage to mount the critical outboard accessories that turn your camera into a 4K cinema powerhouse. Most camera cages add unnecessary bulk, turning your compact camera into a large awkward box. The Sharkcage brings a new level of sophistication and functionality to the world of camera cages by custom tailoring each model to a specific camera.

The Sharkcage hugs the profile of your camera without adding significantly to the overall size, while supercharging your camera with new flexibility and durability. Each Sharkcage adds a genuine rosewood handle for the extra stability of a two-handed grip, multiple 1/4-20" mounting points, an integrated cable pinch, configurable top handle, removable 15mm rod system, a lockable leather wrist strap, and much more.

The Sharkcage is available for Sony's $\alpha 7$ and $\alpha 7$ II series cameras, Panasonic GH4, Samsung NX1, Blackmagic Pocket Cinema, plus an innovative cage for GoPro cameras.
