

PERFECT TABLETOP SHOTS INSTANTLY

The FotodioX LED Studio-In-A-Box makes it easy to get perfect tabletop shots with perfect lighting every time. Photographers of any skill level can set up the portable and lightweight kit in under a minute, and it all packs flat when shooting is done. FotodioX's LED Studio-In-A-Box creates a fully-contained environment for shooting clean, professional images thanks to built-in LED lighting and a removable diffusion panel for maximum control and ease of use. It's the ideal setup for macro photographers, artists, retailers and independent Etsy and eBay sellers.

The LED Studio-in-a-Box is available in four different sizes, and each kit includes four plastic, wrinkle-free "cyclorama" backgrounds in black, white, gray and blue, a removable diffusion panel, and an integrated ring of top-mounted LED lights for a powerful, even glow. Ideal for small business owners, artisans and professional tabletop photographers, the LED Studio-in-a-Box saves an enormous amount of time and space, and allows any user to shoot dynamic, expertly lit images with any type of camera.
