#### **General Information**

Overhead holders and stops are used to prevent unnecessary damage to the door, frame, wall and other door hardware by limiting the degree of door swing. They are installed at the top of a door opening; therefore, out of the general reach and not a tripping hazard. Whether for commercial or residential application, the use of overhead holders and stops extends the life of the opening and other hardware.

#### **Functions**

ABH offers three functions for most Overhead Stops and Holders.

- Hold Open Door will stay held open at the selected degree of opening. Hold open adjustment screw controls the amount of force required to disengage the hold open mechanism.
- Stop Door stops at selected degree of opening.
- Friction Most commonly used on doors without closers. Door
  will virtually stay held open at the selected degree of opening.
  Friction tension adjustment screw controls the amount of
  resistance when opening and closing the door.

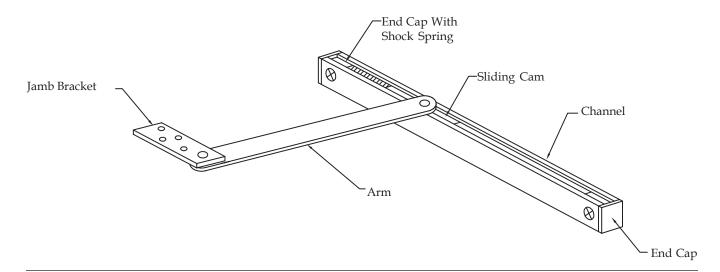

#### Standard Finishes\*

**US32D** is the standard and most cost-effective finish for the vast majority of ABH Overhead Stops and Holders. With the exception of 3500, 7000 and HD7000 series, the base material used for our jamb brackets, arms and channels is **stainless steel**.

ABH can provide **custom finishes** not listed here upon request – please contact factory.

ABH Finish	Description	
US32D	Satin Stainless Steel	
US10	Satin Bronze	
US10B	Dark Bronze	
US4	Satin Brass	
US32	Bright Stainless Steel	
US3	Bright Brass	
US26D	Satin Chrome Plated	
US26	Bright Chrome Plated	
S1	Painted Aluminum	
S2	Painted Brass	
S3	Painted Satin Bronze	
S4	Painted Black	
S5	Painted Dark Bronze	
S8	Painted White	

\*3500 Series is only available in painted finishes

# Installation Methods - Concealed vs. Surface

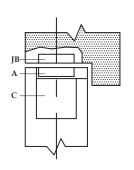

Concealed mount requires cut-outs in both the frame and door for installation. Surface mounted overhead holders mount on the face of the soffit and the face of the door, making it an easier installation for existing openings.

A = Arm
AJB = Angle Jamb Bracket
C = Channel
JB = Jamb Bracket

#### **Concealed Mount Installation**

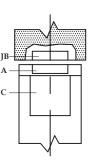

# Example 1 - Single - Acting Doors

- Jamb bracket mortised into soffit (JB)
- Arm cut-out on stop side of door only (A)
- Channel mortised into top of door (C)

# Example 2 - Double - Acting Doors

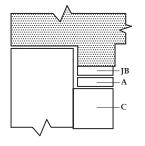

- Jamb bracket mortised into soffit (JB)
- Arm cut-outs on both sides of door (A)
- Channel mortised into top of door (C)

#### **Surface Mount Installation**

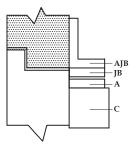

# Example 3 – Standard (push side)

- Jamb bracket mounts on top of soffit (JB)
- Channel mounts to the face of the door (C)

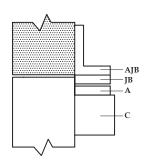

# Example 4 – Rabbeted Door (push side)

- Angle jamb bracket mounts to the face of the header (AJB)
- Jamb bracket attaches to the angle jamb bracket (JB)
- Channel mounts to the face of the door (C)

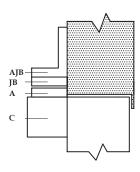

# Example 5 – Flush Door (push side)

- Angle jamb bracket mounts to the face of the header (AJB)
- Jamb bracket attaches to the angle jamb bracket (JB)
- Channel mounts to the face of the door (C)

# Example 6 – Pull Side Installation

- Angle jamb bracket mounts to the face of the header (AJB)
- Jamb bracket attaches to the angle jamb bracket (JB)
- Channel mounts to the face of the door (C)

# Innovation, Quality, Customer Service...

#### **Parts**

#### **Fasteners**

Standard screw packs for all models are offered:

• **1000-SCR x Finish** - 1000 & 1000SL Series

• **1000A-SCR x Finish** - 1000A & 1000SA Series

• **3500-SCR x Finish** - 3500 Series

• **4000-SCR x Finish** - 4000 Series

• **4400-SCR x Finish** - 3300A, 3400 & 4400 Series

• **7000-SCR x Finish** - 7000 Series

• HD7000-SCR x Finish - HD7000 Series

• **8000-SCR x Finish** - 8000 Series

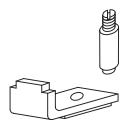

• HD8000-SCR x Finish - HD8000 Series

9000-SCR x Finish - 9000 & 9000A Series

#### **Friction Conversion Kit**

Allows you to change a stop function to a friction function in the field:

- 4000F-KIT 4000, 4400 & 3300A Series
- 9000F-KIT 1000, 1000A, 9000 & 9000A Series

#### **Hold-Open Conversion Kit**

Allows you to change a stop function to a hold-open function in the field:

- 1000HO-KIT 1000 & 1000A Series
- 4000HO-KIT 4000, 4400 & 3300A Series
- 9000HO-KIT 9000 & 9000A Series

#### **Angle Jamb Brackets**

Available for surface mount models – converts standard installation to pull side mount or push side flush mount mounting (see page B-3 for details). Specify finish when ordering.

- 44443 3300A & 4400 Series
- 70377 7000 Series
- 90541 8000, 9000 & 9000A Series

4444

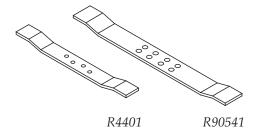

70377

90541

#### Frame Reinforcement Bracket

1/4" thick hollow metal frame reinforcements pre-drilled and tapped for ABH concealed jamb brackets:

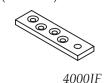

- **R4401** 4000 Series
- R90541 1000 & 1000SL Series

#### Jamb Bracket Fillers and/or Shims

Can be used as a shim to drop down an overhead holder for possible installation conflicts or as jamb bracket filler plate to fill in old concealed preps in frame heads. **Specify finish when ordering**.

- **4000**JF 4000, 4400 & 3300A Series (3/16" thick)
- **9000JF** 1000, 1000A, 8000, 9000 & 9000A Series (¼" thick)

9000JF

Architectural Builders Hardware Manufacturing, Inc. 1222 Ardmore Avenue, Itasca, IL 60143 Tel: 630-875-9900 • Fax: 630-875-9918 / 800-932-9224 Web: www.abhmfg.com • Email: abhinfo@abhmfg.com

# **Options**

#### "AJB" - Angle Jamb Brackets

Available for most surface mount models – converts standard installation to pull side mount or push side flush mount mounting (see page B-3 for details). They are also available separately, as a part.

- 44443 3300A & 4400 Series
- 70377 7000 Series
- **90541** 8000, 9000 & 9000A Series

#### "CL" - For Use with Cam Lift Hinges

Custom unit for use with cam lift hinges (½" maximum door lift)

#### "HC" - Hold Closed

Special mechanism is integrated into the overhead stop holding the door closed at 0° and essentially doubling as a roller latch (available for stop function only). Hold-closed mechanism can be disengaged.

#### "LL" - Lead Lined

Lead is provided to cover where mounting holes will pierce lead on lead-lined doors.

### "LS" - Less Spring

Typically used with a single point electronic door closer, overhead stop is supplied without the shock absorbing spring (stop function only).

# "N" - All Stainless Steel (Non-Ferrous) Components

Designed for use in wet environments - all stainless steel or non-ferrous components are provided with the unit, including all internal components and screws.

#### "SEC" - Security Fasteners

Security fasteners are provided in lieu of standard fasteners for all exposed mounting holes – specify door and frame material when ordering.

#### "SNB" - Sex Bolts

Sex bolt fasteners are added to 3500 series surface mount model screw pack, as they are not supplied standard.

#### "T" - Threaded Pivot Screw and Nylon Washer in Lieu of Jamb Bracket

Typically used when space is limited in the frame head for installation or when installing a concealed model in an existing frame with minimal field prep.

# "THICK" - Door Thickness other than 1-3/4"

Custom fasteners will be supplied to accommodate various door thicknesses other than 1-3/4'' – specify door thickness.

#### "SPECIAL" - Special Layout

ABH can provide custom units for countless nonstandard applications. See page B-6 for order form or contact factory for assistance.

# 1000 Series Concealed Mount, Heavy Duty

#### **Standard Features**

- Concealed mount
- Heavy duty
- Stop, hold-open and friction functions available
- Single or double acting doors
- Non-handed
- For interior or exterior use on frequent traffic and heavy weight doors
- Standard installation from 85° to 110° of opening (5° increments)
- Shock absorbing spring provides 3° to 5° cushion before dead-stop
- 1-3/4" minimum door thickness
- UL Listed as Miscellaneous Fire Door Accessories for use on wood fire doors rated up to 90 minutes and metal fire doors rated up to 3 hours (stop function only)
- Average weight per unit = 6 lbs.

- LL For lead-lined door applications
- CL For use with cam lift hinges
- LS Less shock-absorbing spring for special applications
- N All stainless steel
   (non-ferrous) components for
   wet environments to prevent
   corrosion
- T Jamb bracket is replaced with a threaded pivot screw and nylon washer
- HC Hold closed
- SPECIAL Contact ABH if the dimensions, hardware, or specifications differ from what is shown on the template or if additional hardware is being used at the top of the door. A custom application and/or unit may be required.
- If using a closer, please go to our website and reference "ABH Overhead Holder & Stop Compatibility Chart" to determine possible conflict.

#### Material

• Stainless steel is the standard base material for arm, channel and jamb bracket for all finishes.

- Model Number
- Finish
- Option(s), if applicable

# 3400 Series Surface Mount, Medium Duty

#### Standard Features

- Surface mount
- Medium duty
- Side jamb mount for doors that do not extend to frame header
- Ideal for dressing room and washroom stall doors with frames
- Stop, hold-open and friction functions available
- Single acting doors only
- Non-handed
- Standard installation from 90° to 100° of opening (5° increments)
- Shock absorbing spring provides 3° to 5° cushion before dead-stop
- Standard fasteners supplied with sex bolts for 1-3/4" to 1-7/8" thick door (see options for other door thicknesses)
- Average weight per unit = 3 lbs.

#### **Options Available**

(see page B-5 for details)

- THICK Fasteners for doors other than 1-34" to 1-78" thick - Specify door thickness
- SEC Security fasteners
- LL For lead-lined door applications
- **LS** Less shock-absorbing spring for special applications
- N All stainless steel (non-ferrous) components for wet environments to prevent corrosion
- HC Hold closed
- SPECIAL Contact ABH if the dimensions, hardware or specifications differ from what is shown on the template or if additional hardware is being used at the top of the door. A custom template and/or unit may be required.
- If using a closer, please go to our website and reference "ABH Overhead Holder & Stop Compatibility Chart" to determine possible conflict.

#### **Material**

• **Stainless steel** is the standard base material for arm, channel and jamb bracket for all finishes.

Door Frame Opening	Model Number			
Hinges	Hold Open	Stop	Friction	
24" - 36"	3414	3424	3434	

- Model Number
- Finish
- Option(s), if applicable

# 3500 Series Surface Mount, Parallel Arm Holder

- Surface mount
- Heavy duty
- Adjustable hold-open position from 135° to 180°
- Single acting doors only
- For use on the inactive leaf of a pair of doors where a door closer is installed on the active leaf
- For interior or exterior use on frequent traffic and heavy weight doors
- For door openings 24" 36"
- Units are handed specify when ordering
- Standard fasteners supplied for 1-3/4" to 1-7/8" thick door (see options for other door thicknesses)
- Average weight per unit = 4 lbs.

Options A	\vai	lal	b1	e
(see page B-5	for de	tail	s)	

- THICK Fasteners for doors other than 1-34" to 1-78" thick
   Specify door thickness
- SNB Sex bolts provided for door portion screw detail
- **SEC -** Security fasteners
- LL For lead-lined door applications
- SPECIAL Contact ABH if the dimensions, hardware or specifications differ from what is shown on the template or if additional hardware is being used at the top of the door.
