

How to use your MedicShield Starter Kit

1. Remove the spray bottle trigger.

Remove the spray bottle trigger from the top of the spray bottles.

2. Fill the spray bottle with 100ml of MedicShield.

Pour 100ml of MedicShield Hospital Grade Disinfectant into the spray bottle (there is markings on the side of the bottle every 100ml)- its recommended to use a funnel to avoid spills.

3. Dilute the MedicShield.

Fill the spray bottle with water, up to the 1L mark on the side of the bottle. Screw the trigger back on to the bottle.

4. Now you're ready to clean!

Use the ready-to-use MedicShield Hospital Grade Disinfectant as a spray & wipe. Either by spraying on to hard surface and wiping with the heavy duty wipes, or spraying on to the heavy duty wipes before wiping down the surface.
