AT ZEE® WE LIKE TO TAKE THINGS
ONE STEP FURTHER

The importance of the garden and patio as an extension of the home has grown tremendously over the last few years.

Designers worldwide put their talent into shaping furniture, light fixtures and even weather-resistant textiles to make one's yard look as smart as a living room. At ZEE® we like to take things one step further and focus on the details as well.

The water hose is probably one of the most essential exterior tools. We use it to feed plants, vegetables and flowerbeds; we clean tools, muddy boots, bikes and cars with it. And during the summer it fills up swimming pools, water guns and balloons to bring coolness and endless fun.

Surprisingly not much attention has been paid to its design so far. So at ZEE® we agreed it was time for a change. By going for the *unicolour* look, we have managed to produce real design objects. So you can enjoy your outdoor living space even more and to the fullest. The jury of the prestigious design label *Henry Van De Velde* followed us and they attributed us the *Henry Van De Velde label* for design.

MIRTOON GARDEN HOSE

Mirtoon is a completely aesthetic redesign of the well-known garden hose with reel. It is practical and discrete and thanks to its colour scheme it allows to either blend in or stand out in its surroundings.*

MIRTOON 10M/30M

There have been hose reels on the market for many years, but they are all mainly designed for practical purposes. Our main goal was to manufacture a pretty looking hose reel and we are confident to have pulled it through.

Mirtoon comes in a 10 meter and 30 meter edition. The smaller version fits perfectly any terrace, patio or balcony. The large hose is ideal for gardens and all other practical use.

The *unicolour* look is the basis of the reels attractive appearance. The material for the production of the casing is ABS/ASA, which gives it a crisp design and a look and feel that is of far higher quality than the one offered by most colleagues on the market.

Mirtoon is ready for use. Each reel includes a hose, fittings, spray gun and nozzle. The hose has been provided with the necessary connectors to use it worldwide. No fuss. Ready, set and go. For the design of *Mirtoon* we have teamed up with the Antwerp based award winning Studio Dott.

TASMAN HOSE TROLLEY

The mirtoon hose reels are the watering (feed, clean and play...) solution for around the house. The Tasman hose trolley is the work horse with a large range. There are plenty of good quality hose trolleys on the market, but again they are all designed for practical use.

TASMAN HOSE TROLLEY

So, as our tradition demands from us, we wanted to offer a beautifully designed hose trolley.

Because we were so happy with the design of the Levantine shower, we knocked again on Alain Gilles' door. Alain designed an elegant, strong, practical & high quality garden tool.

We put 50m hose on the *Tasman* to give the user the large range. The steel frame and parts make it a strong tool. The thick powder coated matt layer on top of that makes it weather proof and beautiful. The sturdy wheels are all terrain. We added the necessary connections, a nozzle and spray gun (5 settings). Just connect the *Tasman* to the tap and it's in working order, ready to go.

LEVANTINE OUTDOOR SHOWER

Where we were looking for new territories in the garden with Mirtoon, with the Levantine we get to a market where we are certainly not alone. Yet we know we can defend ourselves in this competitive market.

LEVANTINE OUTDOOR SHOWER

Alain Gilles, *Belgian designer of the year 2012* designed *Levantine*. The sleek yet very elegant and organic design from Alain is not only a beautiful garden shower, but you can also see it as a sculpture that will emphasize your garden.

The *Levantine* is an all season quality product that survives all weather conditions. The shower is made of stainless steel. Everything is covered with a thick UV resistant powder coated layer. A chromed brass input for standard garden hose connections tops it all off. Through the repetition of black and white, *Levantine* can be combined with the *Mirtoon*.

After studying Political Sciences and Marketing Management, Alain Gilles went on to work in the international financial world for 5 years. But one has to live his own life. So, thanks to the moral support of his wife, he went back to studying Industrial design in France. He opened his own studio in late 2007 in order to pursue his own dreams and develop his personal approach to product design, furniture design, art direction and scenography. He has since started to collaborate with several international editors such as Qui est Paul ?, Galerie Gosserez Paris, Magnitude, Buzzispace, Casamania, Ligne Roset and Bonaldo. Several of his products have been awarded international prizes, such as the *Henry Van De Velde Label*, the *Design for Asia Golden Award*, The *Red Dot Best of the Best* for the *Welded table* and the *Good Design* award for the *Big Table*. In 2012, he was named *Designer of the Year* by the prestigious *Biennale Interieur Kortrijk – Belgium*.
