

PTO Switch - Panel/Dash Mounted Air Control Valve (Electrical Release)

Panel/dash mounted manually operated 4/2 directional control switch for the operation of single and double acting cylinders. These valves have 6mm push-in fitting ports and come as standard with a electrical reset and control knob indicator. This Electrical Release valve requires an electrical signal to the integral solenoid valve before the valve may be operated and is ideal for interlocking with hand-brake electrical circuits for additional safety.

Technical Specification

Media: Air to 188PSI (13 bar)
 Min. Pressure to Reset Port : 2.4 bar
 Flow: 0.12 Cv
 Neck Dia.: 5/8" (16mm)
 Body: Glass Filled Nylon
 Spool: Brass
 Fittings: Push to Connect 1/4" and 6mm
 Seals: Nitrile
 Temperature: -4° to 122° F (-20° to 50° C)
