This audit evaluates the adherence level of mouldings.com as of Tue Nov 07 2023, to the "Web Content Accessibility Guidelines" (WCAG) 2.1 level AA success criteria.

Below you’ll find the results for dozens of tests that focus mainly on 3 categories: screen-reader adjustments (for blind users), keyboard navigation adjustments (for the motor impaired) and UI, design, and readability adjustments (for the vision impaired).

<span class="slideshow-slide__button slideshow-slide__button--primary" style="" background-color: #ffffff!important; color: #000000!important;" role="button" tabindex="0">Learn More</span>

<button class="flickity-button flickity-prev-next-button previous" type="button" style="top: 50%;" data-acsb-original-style="top: 50%;" role="button">Previous slide</button>
```
Buttons should include text explaining their functionality, and if icons are used as buttons, a screen-reader only text or an “aria-label” attribute should be used for that description.

Successful Elements

Buttons should include text explaining their functionality, and if icons are used as buttons, a screen-reader only text or an “aria-label” attribute should be used for that description.
Links should include text that is setting expectations to what page they are leading to. If empty links are used as layout wrapping elements, a screen-reader only text or an "aria-label" attribute should be used for that description.

Successful Elements

<a class="announcement-bar-link" href="https://mouldings.com/pages/join-our-mailing-list" >account</a>

<a href="https://mouldings.com/pages/frontpage" class="utility-bar_menu-link " style="background-color:#ffffff!important;color:#000000!important;">About us</a>

<a href="/pages/faq" class="utility-bar_menu-link " style="background-color:#ffffff!important;color:#000000!important;">FAQ's</a>

<a href="https://mouldings.com/pages/design-services" class="utility-bar_menu-link " style="background-color:#ffffff!important;color:#000000!important;">Design Services</a>
Links that open in a new tab or a new window should either have an "aria-label" attribute or a screen-reader only element explaining to screen-readers that this opens in a new tab.

Successful Elements

<a class="social-link" href="mailto:marketing@mouldings.com" target="_blank" data-acsb-tooltip="Email | New Window" > <svg width="28" height="28" viewBox="0 0 28 28" fill="none" xmlns="http://www.w3.org/2000/svg" aria-hidden="true" style=";background: none;" data-acsb-warning="true"> </svg> </a>
An H1 title provides information to blind-users using screen-readers of what the main topic of the page is and each page should have exactly one H1 title.

Successful Elements

```html
<h2 class="promo-block--header" style=";background-color:#ffffff;important; color:#000000!important;" role="heading" aria-level="1"> White river hardwoods </h2>
```

HTML title elements (H1-6) should have texts. If images or links are used, they should include an alternative or screen-reader only text.

Elements that visually appear as titles but are coded with a non-heading HTML Tag should include a "role" attribute that equals to "heading" or have their tags fixed.

Title levels should not be skipped and should be built with consistent hierarchy. For example: you cannot have "h4" titles and "h2" titles without having "h3" titles.

Interactive elements such as links, buttons and form fields should all be navigable using the keyboard by either using a focusable element (a, button, input, etc.) or including the "tabindex" attribute that equals to "0".

10. Interactive elements that can be navigated using the keyboard should be surrounded by a visual outline whenever they are focused.

<p>| | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>Yes</td>
<td>Pass</td>
<td>-</td>
<td>100%</td>
</tr>
</tbody>
</table>

11. Active popups should include an "aria-modal" attribute that equals to "true", and a "role" attribute that equals to "dialog", so screen-reader users know how to navigate within it.

<p>| | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>11</td>
<td>No</td>
<td>0</td>
<td>0</td>
<td>-</td>
</tr>
</tbody>
</table>

12. Every page should include hidden links that by clicking on them (either using keyboard navigation or a screen-reader), the user will "skip" certain blocks directly to main landmarks such as main content, menu or footer.

<p>| | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>12</td>
<td>Yes</td>
<td>Pass</td>
<td>-</td>
<td>100%</td>
</tr>
</tbody>
</table>

13. Elements that are hidden using CSS manipulations (opacity, height, text-indent, off-canvas, etc.) should be wrapped inside an element with an "aria-hidden" attribute that equals to "false", or include it directly, and have it dynamically changed to "true" when they become visible.

<p>| | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>13</td>
<td>No</td>
<td>0</td>
<td>0</td>
<td>-</td>
</tr>
</tbody>
</table>

14. Elements that are hidden using CSS manipulations (opacity, height, text-indent, off-canvas, etc.) should include a "tabindex" attribute that is below 0, and have it dynamically changed to 0 when they become visible.

<p>| | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>14</td>
<td>No</td>
<td>0</td>
<td>0</td>
<td>-</td>
</tr>
</tbody>
</table>

15. Menus should either be built using the HTML5 "nav" element or include a "role" attribute that equals to "menu" or "navigation" to indicate a navigation landmark for screen-readers.

<p>| | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>15</td>
<td>Yes</td>
<td>4</td>
<td>0</td>
<td>100%</td>
</tr>
</tbody>
</table>

**Successful Elements**
Menu items that have a dropdown menu include an "aria-haspopup" attribute that equals to "true".

Successful Elements

18 Images should have an alternative text
description that describes both the objects
and the embedded text that the image
contains, using the "alt" attribute.

Successful Elements

19 Background images that are not just for
decoration purposes and should have the
same treatment as standard images and
include a "role" attribute that equals to
"img" and an alternative text description in
an "aria-label" attribute.

Font icons, SVG or images that are being
used as spacers, decorations or their
purpose is already described by the
content should include a "role" attribute
that equals to "presentation" or "none".

```
Every "area" element of a "map" tag should be regarded as a standard image and receive an alternative text description using an "alt" attribute.

Small or hidden tracker pixel images (often used for analytics or marketing purposes) should include a "role" attribute that equals to "none" or "presentation" so they are excluded from screen-readers.

Form fields should either include an "aria-label" attribute or a connected LABEL element describing the requirement of the field (email, phone, name, etc.).

Form elements cannot have the same ID, or else their corresponding label will provide false information.

Required form fields should include an "aria-required" attribute that equals to...
<table>

<button class="flickity-button flickity-prev-next-button next" type="button" style="top: 50%;" data-acsb-original-style="top: 50%;" role="button"><span data="true" aria-hidden="false" > Next slide </span><svg class="flickity-button-icon" view...>
```

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>39</td>
<td>Yes</td>
<td>2</td>
<td>0</td>
</tr>
</tbody>
</table>

A common accessibility mistake is to treat carousels as live regions using the "aria-live" attribute and the "polite" or the "assertive values. Using this practice will cause screen-readers to cut and skip announcements.

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>40</td>
<td>No</td>
<td>0</td>
<td>0</td>
</tr>
</tbody>
</table>

Carousel pagination items (usually used as small dots at the bottom of the carousel) should indicate their functionality and slide number they control using an "aria-label" and a screen-reader only text.

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>41</td>
<td>No</td>
<td>0</td>
<td>0</td>
</tr>
</tbody>
</table>

Tables that are being used as layout structures should include a "role" attribute that equals to "presentation" to indicate to screen-readers that it is not really a table.

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>42</td>
<td>No</td>
<td>0</td>
<td>0</td>
</tr>
</tbody>
</table>

If nested tables are used (a table element within a table cell), set the nested tables "role" attribute to "presentation".

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>43</td>
<td>No</td>
<td>0</td>
<td>0</td>
</tr>
</tbody>
</table>
TH elements, should include a "role" attribute that equals to "rowheader" on the TD elements of the TR that represents the visual table headings.

Visually deleted texts (often used to show a previous price of a sale) should include an "aria-label" attribute or a screen-reader only text that explains this is deleted text.

Successful Elements

```html
<div class="price__compare-at visible" data-price-compare-container="">
  <span class="visually-hidden" aria-hidden="false" style="background-color:#ffffff!important;color:#000000!important;" data="true ">
    Original price...
  </span>
</div>
```

```html
<div class="price__compare-at visible" data-price-compare-container="">
  <span class="visually-hidden" style="background-color:#ffffff!important;color:#000000!important;" aria-hidden="false" data="true ">
    Original price...
  </span>
</div>
```

```html
<span class="boost-sd__format-currency boost-sd__format-currency--price-compare" style="undefined; font-family: &quot;Open Sans&quot;; font-style: normal; font-weight: 400; font-size: 13px" data-acsb-original-style="color: rgb(148, 148, 148); font-fa..."
```

46 Breadcrumbs main element should include a "role" attribute that equals to "navigation" and an "aria-label" attribute that describes the functionality.

47 Ratings/scores that are represented visually using stars, meters or other indicators should either have an "aria-label" attribute or a screen-reader only texts conveying the score/rate.

48 Making use of an accessibility interface helps to ensure that vision impaired users can adjust some of the UI and the design
Iframe elements should include a "title" or an "aria-label" attribute explaining the purpose, the functionality or the destination of the iframe, or be tagged hidden for screen-readers if irrelevant.

Successful Elements

```html
<iframe width="256" height="60" role="presentation" name="a-j33tfh7o8e1u" frameborder="0" scrolling="no" sandbox="allow-forms allow-popups allow-same-origin allow-scripts allow-top-navigation allow-modals allow-popups-to-escape-sandbox" src="https://..." />
```
